SUMMER PROJECTS

Bond Program Update

James "Larry" Scott

The newsletter starts its second volume with this publication. It is amazing to see the progress of just one complete year of construction. The play structures are installed, the path of travel complete, the new Colt Field up and running, 25 new classrooms on our Phase One campuses and the Spruce Ramp demolished and reconstructed with a brand new elevator. If you think Year 1 was exciting, just wait for Year 2. There are several projects starting up this summer. The Warriors will soon have a new field of their own. Parkway's long term project will start, and the new modulars at Ponderosa, Spruce and Westborough are set to begin nearly the minute school ends.

Westborough Middle School will not only receive two new modular buildings as part of the Phase 2 Modulars project, but they will also receive new renovated classrooms. The Westborough Science Renovation project went out to bid in April, and the Bond Office received three bids from the District's prequalified contractors. USS Cal Builders, Inc. of Stanton, CA was the low bidder and the Board of Trustees approved awarding the contract to them on May 8, 2014.

What turned out to be a tenacious little project, the Spruce Ramp and Elevator finally nears completion. Many thanks for the patience and cooperation of the Spruce Elementary School staff and student body.

Last December, construction began on the two-story science building at El Camino High School. On Tuesday, April 15, hundreds of people turned out for the formal building dedication for the El Camino High School Science Building. Emceed by the SSFUSD Superintendent Alejandro Hogan, the brief ceremony was attended by not only students and staff from El Camino, but also representatives from the SSF City Council, City of Daly City, County of San Mateo as well as from Assembly member Kevin Mullin's and Congresswoman Jackie Speier's offices.

Buri Buri Elementary School Renovation plans are set to be approved by DSA before the summer and the long awaited new campus will begin construction.

El Camino Science Building Dedication – April 15, 2014

SSFHS/NFL Athletic Field Dedication coming soon!!

Parkway Heights MS Demolition - May 2014

Parkway Heights Middle School

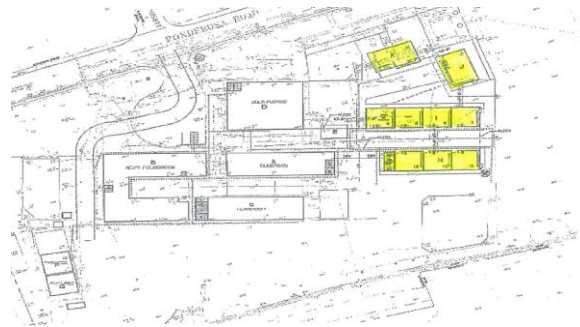

A major campus renovation has begun at Parkway. The Interim Housing was installed this spring, and students have moved in. Portable demolition and/or removal has begun and then work will begin on the Boys' and Girls' Locker Room Buildings to convert one into new locker rooms and the other into two classroom spaces. Further work will begin this summer with the first of many new modular buildings. By this time in 2016, Parkway will be a completely new campus.

Spruce ES Staircase – May 2014

Phase 2 Modulars

This summer, the Bond will launch another phase of modular construction at Ponderosa, Spruce and Westborough. Ponderosa will receive a new library, an Exploratorium and seven (7) new classrooms. Spruce will receive nine (9) classrooms and a new library. Westborough will receive two (2) new classroom buildings. Also, a classroom remodel project will provide Westborough with 3 new science classrooms and a prep room. Lessons learned from last summer indicate a much smoother transition into the new classrooms.

Ponderosa Elementary School Modulars

SSFHS Modulars

This summer, work will begin to construct new classroom buildings at the South San Francisco High School Campus. Interim Housing was installed last winter, and students moved into these classrooms after spring break. Demolition of existing portables has begun. One two-story building will house six science classrooms, another two-story building will house 12 classrooms and one 2 PK classroom building will complete the modular work at SSFHS.

SUMMER ACTIVITY

*SSFHS Athletic Field *Phase 2 Modulars *Parkway Heights Middle School Renovation *Westborough Classroom Remodel
