

EL CAMINO TRACK AND FOOTBALL FIELD - OCTOBER 2013

Measure J Bond

October 30, 2013

Vol. 1, No. 4

FALL & WINTER PROJECTS

Bond Program Update

James "Larry" Scott

The Bond Program celebrated two ribbon cutting ceremonies at Alta Loma Middle School and Skyline Elementary School showcasing the Science Building and Library respectively. Principals Delorio and Banister cut the ribbons to their featured buildings to a crowd of eager onlookers. After the ribbon cutting, the plaques that dedicate the buildings to their particular sites were uncovered. A short tour of the other new buildings and refreshments wrapped up two exciting afternoons.

The Bond Team commends Project Frog and USS Cal Builders for these top of the line learning environments. The students and the faculty at the four Phase One schools are enjoying their new classrooms. Phase Two school sites are eager for next summer when they will have some new buildings as well.

USS Cal has broken ground on the six classroom two-story Science Buildings at El Camino High School. By next spring, there will be new Science facilities for our high school students at El Camino.

Interstate Grading & Paving is putting the finishing touches on the El Camino's Track and Field. An intimate ceremony was held on Thursday, October 3rd. The Superintendent, some Board members, a City Council member and Principal Putney welcomed the athletic teams who will be utilizing these new grounds and gave them some maintenance tips.

They enjoyed watching the kids get to know their new turf. Anticipation is growing for the celebrated Bell Game on November 16th. Turnout is expected to be great. Hope to see you all there. It will be an exciting game.

Although the Bond Team paused to celebrate these various inaugural events, they are already back in gear with the fall and winter projects: El Camino's two-story Science Buildings, Spruce's Elevator and Ramp Replacement, and the kickoff to the Athletic Field & Bleacher project at South San Francisco High School.

The Bond work will continue uninterrupted for the next four years with heavyweight projects such as: SSFHS Two Story Classroom Building, Martin's entire modernization, Parkway's renovation and the highly anticipated 15,000 s.f. Green Schoolhouse as well as Buri Buri's new school facility.

ALMS Ribbon Cutting @ Science Room – Sept. 30, 2013

NEXT YEAR'S PROJECTS – 2014/15

South San Francisco High School 20 New Classrooms
Modulars @ Spruce, Ponderosa & Westborough
Parkway Heights Green Schoolhouse
New Buri Buri Elementary School

Two-story 20 Classrooms – SSFHS

Measure J Bond Program

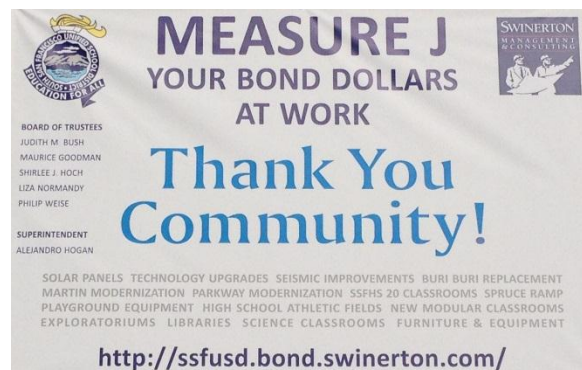

The Bond Team, on behalf of the District staff and faculty of the SSFUSD, would like to thank the community of South San Francisco for supporting the Measure J projects. The District is working very hard to get the most bang out of each bond buck. With a very productive summer under our belt, we move on in confidence and excitement to the next set of projects.

Skyline Elementary Library – October 1, 2013

South San Francisco Classrooms Building

One of our long term projects is set to begin next year. A two-story classroom structure will be the home of 20 new South San Francisco High School Classrooms. The Bond Team and its designers are working diligently to get all the necessary DSA approvals to begin this gem of the Measure J Bond projects. Construction will commence in the spring 2014.

Spruce Ramp Replacement & Elevator

The Bond Office received five bids on October 10th for the Spruce Elementary School Ramp Replacement Project. After careful review, the Bond Office recommended the low bidder S & H Construction, Inc. of Fremont to the Board of Trustees at the October 24th Board meeting. A new exterior ramp, staircase and elevator tower will be constructed. The project will start on Halloween and wrap up by the end of February 2014.

WINTER ACTIVITY

El Camino High School Science Buildings
South San Francisco High's Athletic Field & Bleachers
Spruce Ramp Replacement and Elevator
Design - Phase 2 - Ponderosa, Spruce & Westborough
Design - Parkway Heights Green Schoolhouse & Buri Buri Elementary
