MEASURE J BOND UPDATE

BY MICHAEL KRAUSE, ASST. SUPERINTENDENT,
BUSINESS SERVICES

The Measure J Bond Program has achieved some significant accomplishments since our last newsletter. Many construction projects at Buri Buri Elementary School, Parkway Heights Middle School, and Martin Elementary School have moved forward this couple of months. The SSFUSD is pleased with the progress of the last construction projects.

BURI BURI ES MPR PROJECT

Buri Buri is pleased to present their new Multi-Purpose Room. Students are enthusiastic about their new MPR, which will allow them a more modern facility to watch presentations and dine in. The overwhelming positive response has even prompted the Board of Trustees to request the February 22nd Board meeting be held there.

PARKWAY HEIGHTS SITEWORK & PARKING LOT PROJECTS

The landscaping and parking lot projects are nearing completion at Parkway Heights Middle School. In addition to the modular buildings being built, the campus has received new landscaping. The new landscaping requires little water and maintenance for upkeep, a positive for ongoing water conditions throughout the State. The second project of note is the parking lot. It has been resurfaced with new gate-work and iron fencing. A final Parkway project will be going up for bid in the months to come.

CBOC MEETING

Thursday February 15

Time : 6:15 PM

MARTIN ES SITEWORK PROJECT

Before

After

Sitework at Martin Elementary continues to go underway and is making great progress. Of note, many uneven surfaces have been regraded and the modular restrooms have been installed.

Victoria Vargas, Bond Construction Manager, and Bill Savidge, SSFUSD’s Bond Consultant, have worked tirelessly this past summer to ensure these 3 above projects are meeting their completion due dates.

We are pleased to continue to bring new and healthy learning environments to our students. (The Bond Department Office would also like to thank all the communities involved for their patience, understanding and input. Final completion of the Measure J Bond Program is anticipated for the end of 2018.)

Thank you for your support!
