What Can I Do to Make My Board Better?

- Board works fastest as a standalone computer
- Close processes often
- Plug in iPevo Doc Camera to Board

Remote

- Can be used as a clicker
- Do NOT press the colored buttons. If your board says the word “Locked” when you try to touch, you have hit one of the colored buttons. Hit the same one again to unlock.

Helpful Apps to Download

- ☐ Google Slides
- ☐ Canva
- ☐ Google Classroom

Cleaning the Board

- Use a clean microfiber cloth to wipe away dust and smudges.
- For harder to remove smudges, spray water on the microfiber cloth and wipe.
- **NEVER SPRAY ANY LIQUID DIRECTLY ON THE BOARD!**

Gestures

Your owner account should be set to Traditional Gestures

Traditional Gestures provides the arrows on both sides of the screen to get to home, processes, mark up, etc.

Gestures can be changed in "Settings"

Words of Advice

Don't be afraid of the board. Play around with it. Try new things. You aren't going to mess it up. If you do, by chance, we can fix it.

Add Website to Home Screen

1. Open the browser and navigate to the website: Launch the Samsung Internet app and open the website you want to save as a shortcut.
2. Open the menu and select "Add page to": Tap on the menu icon (three vertical dots or lines) and then select the "Add page to" option.
3. Choose "Home screen": Select the "Home screen" option from the list of options that appears.
4. Rename and add: You can rename the shortcut icon if desired, and then tap "Add" to place the shortcut on your home screen.
