Students

SUBJECT: USE OF INTERNET-ENABLED DEVICES DURING THE SCHOOL DAY

The District consulted with local stakeholders including employee organizations representing each bargaining unit, parents, and students to develop this policy to prohibit the use of Internet-enabled devices by students during the school day on school grounds. This policy aims to ensure that students remain focused on their academic responsibilities throughout the school day, which includes all instructional and non-instructional periods such as homeroom, lunch, recess, study halls, and passing time.

For purposes of this policy, the following definitions apply:

- a) "Internet-enabled devices" means and includes any smartphone, tablet, smartwatch, or other device capable of connecting to the Internet and enabling the user to access content on the Internet, including social media applications;

"Internet-enabled devices" does not include:

1. Non-Internet-enabled devices such as cellular phones or other communication devices not capable of connecting to the Internet or enabling the user to access content on the Internet; or
 2. Internet-enabled devices supplied by the District, charter school, or Board of Cooperative Educational Services (BOCES) that are used for an educational purpose.
- b) "School day" means the entirety of every instructional day as required by subdivision 7 of the Education Law Section 3604 during all instructional time and non-instructional time, including but not limited to homeroom periods, lunch, recess, study halls, and passing time.
- c) "School grounds" means in or on or within any building, structure, athletic playing field, playground, or land contained within the real property boundary line of a district elementary, intermediate, junior high, vocational, or high school, a charter school, or a BOCES facility.

Students are generally prohibited from using Internet-enabled devices during the school day anywhere on school grounds.

However, students may be authorized to use an Internet-enabled device during the school day on school grounds:

- a) If authorized by a teacher, principal, or the District for a specific educational purpose;
- b) Where necessary for the management of a student's health care;

(Continued)

**SUBJECT: USE OF INTERNET-ENABLED DEVICES DURING THE SCHOOL DAY
(Cont'd.)**

- c) In the event of an emergency;
- d) For translation services;
- e) On a case-by-case basis, upon review and determination by a school psychologist, school social worker, or school counselor for a student caregiver who is routinely responsible for the care and well-being of a family member; or
- f) Where required by law.

Students must be permitted to use an Internet-enabled device where the use is included in the student's:

- a) Individualized Education Program (IEP); or
- b) Section 504 Plan.

On-Site Storage of Internet-Enabled Devices Including Cell Phones

[Districts must provide one or more methods for on-site storage where students may store their Internet-enabled devices during the school day, which may include student lockers. Example language has been provided. However, the District should customize this section to reflect its actual practices.]

Students must store their Internet-enabled devices in designated on-site storage areas during the school day. On-site storage areas may include, but are not limited to, student lockers, designated storage bins in classrooms, or secure storage areas in the school's main office. The designated on-site storage areas must be easily accessible to students and provide adequate security to ensure the safekeeping of the student's devices. The District will communicate the procedures for storing and retrieving devices, ensuring that students understand their responsibilities in using the on-site storage facilities provided.

Methods for Parents to Contact Students During the School Day

[Districts must provide one or more methods for persons in parental relation to contact their student during the school day. A list of examples has been provided. However, the District should customize this list to reflect its actual practices.]

To accommodate necessary communication, parents or persons in parental relation may use the following methods to contact their student during school hours while adhering to this policy:

- a) School Office Phone: Parents or persons in parental relation may call the school's main office, and the office staff can relay messages to the student or call the student to the office to speak with their parent or person in parental relation.

(Continued)

**SUBJECT: USE OF INTERNET-ENABLED DEVICES DURING THE SCHOOL DAY
(Cont'd.)**

- b) Designated Contact Email: Schools may provide a designated email address for parents and persons in parental relation to send messages. These emails may be monitored by school staff who can then pass the messages on to the students.
- c) Classroom Intercom System: In case of an emergency, the school's main office can use the classroom intercom system to notify students directly or ask them to come to the office.
- d) School Messaging Application: Schools may use a secure messaging application or platform where parents or persons in parental relation can send messages to their student. The messages can be monitored and delivered by school staff.
- e) Written Notes: Parents or persons in parental relation can drop off written notes at the school's main office, which can then be delivered to the student by school staff.

Parents and persons in parental relation will be notified in writing of the methods that are available for contacting their student during school hours upon enrollment and at the beginning of each school year.

Student Discipline for Accessing Internet-Enabled Devices During the School Day

The District is prohibited from suspending a student solely for accessing internet-enabled devices in violation of this policy.

Posting and Translation of Policy

The District will post this policy in a clearly visible and accessible location on its website. Translations of the policy into the 12 most common non-English languages spoken by limited-English proficient individuals in the state will be provided upon request by a student or other persons in parental relation to a student.

Reporting and Mitigation Action Plan

Beginning September 1, 2026 and annually thereafter, the District will publish an annual report on its website detailing enforcement of this policy within the District in the prior school year. This report will include non-identifiable demographic data of students who have faced disciplinary action for non-compliance and analysis of any demographic disparities in enforcement of this policy. If a statistically significant disparate enforcement impact is identified, the report will include a mitigation action plan.

NOTES

- The CENTEGIX® Safety Platform™ is comprised of the following solutions:
 - **CrisisAlert™** is the badge-based incident response solution worn by every staff member that empowers staff to get help from school administrators or put the entire campus in lockdown with the push of a button. Used 98% of the time for medical emergencies, physical altercations, and behavioral situations the badge is always on for notification of extreme threats to safety. CrisisAlert can notify 911 dispatch— including room-level location details—and initiate visual and audio notifications so that everyone on campus knows that a site has been locked down.
 - **Visitor Management** makes monitoring who's coming in and out of your schools easy, ensuring that only authorized visitors are allowed on campus. Screen all school visitors, create custom banned person lists, monitor custody issues, log student tardies and early releases, send security alerts to staff, and create detailed reports on all activities tracked.
 - **Safety Blueprint** provides dynamic, digital mapping that elevates safety management, planning, and preparedness. With every building and safety asset mapped in one system, responders are fully equipped for immediate action.
- Note: 1 CrisisAlert badge allocated per staff member and additional CrisisAlert badges included as set forth in the quote for sites purchased. Additional CrisisAlert badges beyond original

allocation are available via CENTEGIX Customer Support for an additional fee and delivered to a central location for the Customer to distribute.
