

THE POLSON IMPROVEMENT PLAN

The Polson Middle School Improvement Plan will dramatically improve the building's look, feel, and functionality. In keeping with the referendum, the plan renovates the building's learning and community spaces without disrupting students and staff. Beginning in 2026, a multi-year slate of projects will address the following key areas: HVAC, Auditorium & Gym, building envelope, and learning spaces.

YEAR 1 PROJECTS

HVAC

Cool all instructional spaces by:

- Installing new cooling systems in currently uncooled spaces
- Replacing existing 30+ year old heating/cooling/ventilation systems

Auditorium

In addition to adding cooling to the space, the auditorium renovations include:

- Replacing all seating and flooring
- New lighting and sound system in the auditorium
- Stage renovations

Electrical System

Electrical improvements include:

- Updating the building's main electrical system
- Installation of whole-building generator
- Select ceiling and lighting renovations in common areas

Main Gym

In addition to adding cooling to the space, the main gym renovations include:

- Floor restoration
- New bleachers
- New lighting, paint, and finishes
