

FUTURE READY

PARK HILL

Future Ready Assets are industry and college-level credentials or distinctions that make students more marketable after graduation. Research shows students who leave high school with a diploma and a credential, like a future ready asset, are more likely to enroll in post-secondary education/training and successfully navigate the journey from school to employment. Students engage in skill-building experiences that create a more seamless transition from school to post-secondary education and/or the workplace making further education and training more affordable and more attainable.

By the year 2030, 100% of Park Hill seniors will graduate with a career and/or college future ready asset.

Career Ready Assets are experiences, credentials, and distinctions that will benefit students as they navigate potential careers post high school.

★ **Internship**

Successfully completes internship in a field of interest
