

# Tier 3 - Intensive Interventions and Supports

## What is Tier 3 in MTSS?

- Tier 3 interventions are distinguished from Tier 2 interventions because they are individualized based on data collected in individual problem solving, occur with smaller student-teacher ratios, and possibly occur for a longer duration of time.
- Tier 3 interventions occur in conjunction with Tier 1 and Tier 2 support.
- Hempstead UFSD defines students in need of support at Tier 3 as students having scored below the 10<sup>th</sup> percentile on the District's Universal Screeners.
- About 5-15% of students will require this level of intensive support.
- The intervention's intensity/frequency and duration are considered based upon need.
- Tier 3 intervention plans include more than what occurs during intervention time. They also include strategies for maximizing student outcomes during core instruction (Tier 1), support provided at Tier 2, as well as supports to use at home or in the community.
