

Radiation + Technology

FOUNDED IN 2014

RDI builds precision radiation measurement tools for quality assurance and verification in cancer radiotherapy. Our team is bridging our diverse scientific and industrial experience to push clinical precision boundaries of treatment delivery.

SERVICES PROVIDED:

- RDI offers design-through-simulation assistance in multiple disciplines, using a wide array of simulation tools and customized methods.
- RDI operates a large-volume outgassing vacuum chamber (22 q.ft./ 10^{-6} Torr) equipped with a 100 amu residual gas analyzer.
- RDI team offers expertise in mechanical design and CAD drafting, with particular focus on the medical device industry.
