

TAG at Chattahoochee Overview

TAG offers classes and experiences that students can participate in.

TAG Directed Studies (10th, 11th or 12th): This class is a self-directed class that each individual student decides what they will study. This can be things that are enrichment beyond the class offerings at Chattahoochee (advanced computer sciences, criminal psychology, etc), classes not offered (foreign languages, culinary arts, etc), or extensions of academic extracurriculars (Science Olympiad, Academic Team, LaunchX, etc). We have even supported some community enrichment activities (Eagle Scouts, well being at public schools, etc.). This is a great opportunity which can be either semester or year long. They are allowed to work on their subject during their Directed Studies period and in some cases, also allowed to do it virtually. They will create 9 to 12 gradable, college level projects/assignments that they will complete over the course of the semester which are due at even intervals. Any grade level is allowed to participate, if they can work it into their class schedule. It is considered to be an academic elective and is not a substitute for any required class to graduate.

TAG Internship (11th & 12th – but must be able to drive & taken the Hire Me Seminar): The TAG Internship program gives students a chance to gain real-world experience by working an unpaid job for 5 hours each week, totaling 70 hours per semester. Students shadow professionals and contribute to projects in a field they're interested in, giving them firsthand insight into their potential future career. It's an excellent way to find out whether a path they're considering is truly the right fit. Internship experience also stands out on college applications, showing initiative and early commitment to a specific area of interest.

Hire Me Seminar: This is a lunch-and-learn Seminar, designed for 10th & 11th graders, provides essential career readiness skills outside the traditional classroom. Delivered through about 10 lunch-and-learn sessions, the program covers resume writing, creating effective cover letters, interviewing strategies, career exploration, and more. Participation in this seminar is a required prerequisite for joining the Internship program.

In this course, the use of generative AI tools is permitted only with explicit teacher approval for specific assignments. AI can serve as an aid to enhance understanding and interaction with course content, within the boundaries of academic integrity. If AI tools are used, all AI-generated content must be accurately cited, and students are responsible for the integrity and correctness of their submissions, including any content derived from AI tools. It is essential to critically evaluate AI outputs to ensure they meet academic standards. Unauthorized use of generative AI, without proper citation, is considered a violation of the Fulton County Schools Code of Conduct and may result in disciplinary action.
