

48 HOUR BOOTCAMP: Building Effective FBAs and BIPs for Student Success

Join us for a dynamic *TWO-DAY INTENSIVE TRAINING* designed to empower educators and professionals with the tools to transform challenging student behaviors into opportunities for growth!

On Day 1, you'll gain a solid foundation in Functional Behavior Assessments (FBAs) -- discovering the principles of behavior, learning how to collect and analyze data, and exploring real-world case studies that highlight both success stories and common barriers (with solutions you can use right away!).

On Day 2, take your skills to the next level as you dive into the creation and implementation of Behavior Intervention Plans (BIPs). Through interactive, hands-on activities and practical simulations, you'll learn how to design effective, individualized strategies that prevent problem behaviors, teach replacement skills, and promote long-term success. Packed with evidence-based practices, resources, and engaging exercises, this training will leave you confident, prepared, and inspired to make a lasting impact.
