BUILDING A HIGH SCHOOL

We provide rigorous academic work for our students to be competitive at any level of education. Courses were determined based on two factors: state requirements and suiting student interests and achievement levels. Our students are not just high achievers, but trailblazers. Our rigor is highlighted by our honors, AP, and DE offerings and STEM classes. As our high school grows, so will our course offerings.

STEM CERTIFICATE

Students who receive our STEM Certificate have completed 3 continuous years of specific STEM courses. Our STEM courses are certified through Project Lead The Way. Our instructors go through rigorous training to be certified to teach each course. These courses are considered honors courses with a 0.5 grade boost. The students receive special recognition upon graduation.

CLASS RANK

Due to the highly academic nature of our school and the small class size, we do not rank students numerically. Instead individual weighted grade point averages are reported. No reports other than the top 10% will be given to colleges.

GRADING SYSTEM
