- Reevaluations are generally recommended every three years to ensure continued alignment of support with student needs.
- **Reevaluations are required when deemed necessary** by the SSP team, particularly in cases of significant changes in the student's needs, such as new diagnoses, academic struggles, or shifts in the effectiveness of current support.
- **A reevaluation is required during middle school**, as third-party testing accommodations (e.g., SSAT, ISEE) typically require documentation to be within the past three calendar years.

Documentation Requirements:

- Diagnosis
- Educational impact
- Specific accommodations recommended

SSPs will be reviewed annually. The meeting review team will vary specific to those currently working with the student.
