Township of Ocean Schools

Assistant Superintendent
Office of Teaching and Learning

SPARTAN MISSION:

Meeting the needs of all students with a proud tradition of academic excellence.

DEPARTMENT Mathematics

COURSE Math Test Prep

A-CED.A.2 Create equations that describes numbers or relationships

Create equations in two or more variables to represent relationships between quantities; graph equations on coordinate axes with labels and scales.

A-REI.B.4.Solve equations and inequalities in one variable

Solve quadratic equations in one variable

S.CP.B.9 Use the rules of probability to compute probabilities of compound events in a uniform probability mode

Use permutations and combinations to compute probabilities of compound events and solve problems.

S-MD.B.6 Use probability to evaluate outcomes of decisions

Use probabilities to make fair decisions (e.g., drawing by lots, using a random number generator)

Learning Objectives and Activities

SWBAT answer the following questions:

- What does the SAT look like?
- How do you do your best on the SAT?
- What does the SAT measure?
- What math do you need to know?
- Can you study for the SAT?

SWBAT demonstrate understanding of the following:

- Know what to expect on test day.
- Become test wise.
- Learn general math strategies.
- Learn special math strategies.
- Special math strategies for regular multiple-choice questions.
- Review SAT math topics.
- Take practice exams under test conditions.
- Students will practice the skills needed to succeed on the SAT.
- Students will learn about the test and its structure.
- Students will learn about different strategies for taking each part of the test.
- Students will learn about how the test is scored.
- Students will learn to pace themselves and to skip some questions when necessary.
- Students will understand the functions and importance of the test parts and the test as a whole.

Learning Activities:

- Approaches to taking the SAT
- How the SAT Math Sections are organized, timed and scored
- Calculators and the SAT
- Tips for boosting your score

SPARTAN MISSION:

Meeting the needs of all students with a proud tradition of academic excellence.

DEPARTMENT Mathematics

COURSE Math Test Prep

- Making Educated Guesses
- Pacing and Timing
- Modeling Wild Guessing and Educated Guessing (Bean Probability Game)- Mastering the Math SAT – Paul Lawrence pg 363-364
- Know what you're up Against pg 3 Barron's
- Math Strategies you need to know pg 23 Barron's
- Skills 1-5 from McGraw Hill's Top 50 Skills for a Top Score SAT Math
- Skills 1-5 Flash Cards from McGraw Hill's Top 50 Skills for a Top Score SAT Math

Assessments

Formative:

- Daily Practice Problems
- Teacher Observation
- Class Debate of Approaches/Mathematical Methods
- Entrance/Exit Cards
- Pretest from McGraw-Hill's Top 50 Skills for a Top Score SAT Math

Summative:

- Quizzes
- Practice Test 1 from Barron's SAT math workbook

Alternative:

- Observation Assessment with Problem-Solving

Interdisciplinary Connections

Science: MS-PS3-1: In lessons on comparing distance-time graphs to speed-time graphs students will construct and interpret graphical displays of data to describe the relationships of kinetic energy to the mass of an object and to the speed of an object.

Career Readiness, Life Literacies, and Key Skills

Technology Integration

All students will use digital tools to access, manage, evaluate, and synthesize information in order to solve problems individually and collaboratively and to create and communicate knowledge.

- 9.4.8.TL.6: Collaborate to develop and publish work that provides perspectives on a real-world problem.
- 9.4.5.CT.3: Describe how digital tools and technology may be used to solve problems.

Supplemental instruction and math games will be presented using IXL Math and Video Tutor bigideasmath.com.

Home of the Spartans!

Office of Teaching and Learning

SPARTAN MISSION:

Meeting the needs of all students with a proud tradition of academic excellence.

DEPARTMENT Mathematics

COURSE Math Test Prep

- 9.4.12.TL.1: Assess digital tools based on features such as accessibility options, capacities, and utility for accomplishing a specified task

Students will use graphing calculators to use math tools strategically and attend to precision and will use Desmos in order to discover new concepts involving graphing and functions.

- 9.4.8.IML.3: Create a digital visualization that effectively communicates a data set using formatting techniques such as form, position, size, color, movement, and spatial grouping

Additional resources and extension activities will be posted on Google Classroom in order to encourage students to reflect on their learning and expand on their knowledge.

- 9.4.12.TL.4: Collaborate in online learning communities or social networks or virtual worlds to analyze and propose a resolution to a real-world problem.

Students will utilize Geogebra to further investigate scale drawings and similar figures to demonstrate understanding of standards.

- 9.4.8.IML.3: Create a digital visualization that effectively communicates a data set using formatting techniques such as form, position, size, color, movement, and spatial grouping

Students will access SAT sites to further investigate lesson concepts and demonstrate understanding of standards.

- 9.4.12.TL.1: Assess digital tools based on features such as accessibility options, capacities, and utility for accomplishing a specified task

Career Education

CRP8: Utilize critical thinking to make sense of problems and persevere in solving them.

CRP11: Use technology to enhance productivity.

Time Frame	2 cycles ~ 6 (56 minute) days
Topic	
Arithmetic Skills and Concepts	
Alignment to Standards	
N-RN.A.1 Extend the properties of exponents to rational exponents Explain how the definition of the meaning of rational exponents follows from extending the properties of integer exponents to those values, allowing for a notation for radicals in terms of rational exponents.	
Learning Objectives and Activities	
SWBAT answer the following questions:	

Home of the Spartans!
#spartanlegacy

Township of Ocean Schools

Assistant Superintendent
Office of Teaching and Learning

SPARTAN MISSION:

Meeting the needs of all students with a proud tradition of academic excellence.

DEPARTMENT Mathematics

COURSE Math Test Prep

- What is the essential vocabulary needed to answer math questions?
- How can I remember all of the exponent rules?
- Will my calculator ALWAYS get me the correct answer? (order of operations)
- Will reviewing basic arithmetic skills and concepts help me get through the SAT math test easier?
- Can I FINALLY overcome my fear of fractions?
- Do we really use percent every day?

SWBAT demonstrate understanding of the following:

- Knowing that the "Basic Skills" learned are still needed.
- The more Arithmetic Skills are mastered, the better your speed and accuracy on the SAT.

Learning Activities:

- Numbers, Symbols and Variables
- Powers and Roots
 - Divisibility and Factors
 - Number Lines and Signed Numbers
 - Fractions and Decimals
 - Operations with Fractions
 - Fraction Word Problems
 - Percent
- Create five SAT problems about this topic. Let your classmates solve them.
- Modeling Fractions with Connecting Cubes - Mastering the Math SAT – Paul Lawrence pg 84-85
- Number Sense and Estimation - Mastering the Math SAT – Paul Lawrence pg 76
- Computational Competency Test (Integers) - Mastering the Math SAT – Paul Lawrence pg 92
- Computational Competency Test (Order of Operations) - Mastering the Math SAT – Paul Lawrence pg 95-96
- Developing "Please Excuse My Dear Aunt Sally" - Mastering the Math SAT – Paul Lawrence pg 97-105
- Skills 6-11 from McGraw-Hill's Top 50 Skills for a Top Score SAT Math
- Skills 6-11 Flash Cards from McGraw Hill's Top 50 Skills for a Top Score SAT Math

Assessments

Formative:

- Classwork
- Teacher Observation
- Class Debate of Approaches
- Math Scavenger Hunt/Trail
- Lesson 3-1 to 3-8 Tune-Up Exercises from Barron's SAT Math Workbook

Home of the Spartans!

- 9.4.12.TL.1: Assess digital tools based on features such as accessibility options, capacities, and utility for accomplishing a specified task

Career Education

CRP4: Communicate clearly and effectively with reason.
CRP11: Use technology to enhance productivity.

Time Frame	2 cycles ~ 6 (56 minute) days
Topic	
Algebraic Method	
Alignment to Standards	
A-APR.A.1 Perform arithmetic operations on polynomials Understand that polynomials form a system analogous to the integers, namely, they are closed under the operations of addition, subtraction, and multiplication; add, subtract, and multiply polynomials. F-IF.C.8 Analyze functions using different representations Write a function defined by an expression in different but equivalent forms to reveal and explain different properties of the function A-REI.B.4.Solve equations and inequalities in one variable Solve quadratic equations in one variable A-SSE.B.3 Write expressions in equivalent forms to solve problems Choose and produce an equivalent form of an expression to reveal and explain properties of the quantity represented by the expression A-REI.C.5 Solve systems of equations Prove that, given a system of two equations in two variables, replacing one equation by the sum of that equation and a multiple of the other produces a system with the same solutions A-REI.C.6 Solve systems of equations Solve systems of linear equations exactly and approximately (e.g., with graphs), focusing on pairs of linear equations in two variables. A-CED.A.1 Create equations that describe numbers or relationships Create equations and inequalities in one variable and use them to solve problems. Include equations arising from linear and quadratic functions, and simple rational and exponential functions	
Learning Objectives and Activities	
SWBAT answer the following questions:

DEPARTMENT Mathematics

COURSE Math Test Prep

- I need to completely solve every equation?
- Are you answering the question asked?

SWBAT demonstrate understanding of the following:

- If you are taking too long on one equation, you are not doing the problem correctly.
- Plug your solution of an equation back into the original equation to make sure that it works.
- Algebraic methods need to be done quickly and accurately to work through your SAT correctly.

Learning Activities:

- Solving Equations
- Equations with More Than One Variable
- Polynomials and Algebraic Fractions
- Factoring
- Quadratic Equations
- Systems of Equations
- Algebraic Inequalities
- What's the Rule? Write a verbal and symbolic description of the relationship between the variables - Mastering the Math SAT – Paul Lawrence pg 134-138
- The Evaluation Game (Variables) - Mastering the Math SAT – Paul Lawrence pg 146-147
- Using Cards to Model Variables - Mastering the Math SAT – Paul Lawrence pg 108-110
- The Addition/Subtraction/Multiplication Game (Review Systems of Equations) - Mastering the Math SAT – Paul Lawrence pg 320-321
- Create five SAT problems about this topic. Let your classmates solve them.
- Skills 12-15 from McGraw-Hill's Top 50 Skills for a Top Score SAT Math
- Skills 12-15 Flash Cards from McGraw Hill's Top 50 Skills for a Top Score SAT Math

Assessments

Formative:

- Daily Practice Problems
- Teacher Observation
- Class Debate of Approaches/Mathematical Methods
- Math Scavenger Hunt/Trail

DEPARTMENT Mathematics

COURSE Math Test Prep

G-C.A.2 Understand and apply theorems about circles

Identify and describe relationships among inscribed angles, radii, and chords

G-C.A.3 Understand and apply theorems about circles

Construct the inscribed and circumscribed circles of a triangle, and prove properties of angles for a quadrilateral inscribed in a circle

G-C.A.4 Understand and apply theorems about circles

Construct a tangent line from a point outside a given circle to the circle.

G.GMD.A.3 Explain volume formulas and use them to solve problems

Use volume formulas for cylinders, pyramids, cones, and spheres to solve problems.

G.GPE.4 Use coordinates to prove simple geometric theorems algebraically

Use coordinates to prove simple geometric theorems algebraically

Learning Objectives and Activities

SWBAT answer the following questions:

- What are the important relationships among angles formed when two lines intersect?
- What are the angle and side relationships in an equilateral triangle?
- What are the triangle inequality relationships?
- What are the angle and side relationships in polygons with three or more sides?
- What are the many properties needed to solve circle problems?
- What are the many properties needed to solve solid figure problems?
- How do you find the distance between two points?

SWBAT demonstrate understanding of the following:

- Knowing and being able to apply the many facts of angle relationships.
- Applying the angle and side relationships in triangles to solve SAT problems.
- Polygon properties needed to solve SAT problems.
- Perimeter and area within an SAT style problem.
- Geometric concepts needed to solve an SAT style problem.
- Geometric reasoning needed to solve an SAT style problem.

Learning Activities:

- Angle Relationships
- Special Triangles
- Triangle Inequality Relationships
- Polygons and Parallelograms
- Perimeter and Area
- Circles
- Solid Figures
- Coordinate Geometry
- The Special Triangle Game (30-60-90 & 45-45-90 Triangles) - Mastering the Math SAT – Paul Lawrence pg 441-442
- Understanding Perimeter (Experiment) - Mastering the Math SAT – Paul Lawrence pg

- What are the three types of statistics that can be used to describe a set of numbers?
- What are the many ways to solve counting problems?
- How can you find the solution to probability problems?
- Are you able to find within a graph the information needed to solve the problem?

SWBAT demonstrate understanding of the following:

- Arithmetic mean, median and mode can be used to describe a set of numbers.
- Counting problems can be solved by making a list, using the fundamental counting principle and the Venn diagram.
- Know the fundamentals of probability to solve an SAT type problem.
- Recognizing the type of graph will help you answer questions involving graphs.

Learning Activities:

- Average Problems
- Counting Problems
- Probability Problems
- Graphs and Tables
- Miscellaneous Problem Types
- The Symbol Game (Evaluating Expressions using symbols) - Mastering the Math SAT – Paul Lawrence pg 409-412
- Create five SAT problems about this topic. Let your classmates solve them.

- 9.4.12.TL.1: Assess digital tools based on features such as accessibility options, capacities, and utility for accomplishing a specified task

Students will use graphing calculators to use math tools strategically and attend to precision and will use Desmos in order to discover new concepts involving graphing and functions.

- 9.4.8.IML.3: Create a digital visualization that effectively communicates a data set using formatting techniques such as form, position, size, color, movement, and spatial grouping

Additional resources and extension activities will be posted on Google Classroom in order to encourage students to reflect on their learning and expand on their knowledge.

- 9.4.12.TL.4: Collaborate in online learning communities or social networks or virtual worlds to analyze and propose a resolution to a real-world problem.

Students will utilize Geogebra to further investigate scale drawings and similar figures to demonstrate understanding of standards.

- 9.4.8.IML.3: Create a digital visualization that effectively communicates a data set using formatting techniques such as form, position, size, color, movement, and spatial grouping

Students will access SAT sites to further investigate lesson concepts and demonstrate understanding of standards.

- 9.4.12.TL.1: Assess digital tools based on features such as accessibility options, capacities, and utility for accomplishing a specified task

Career Education

CRP6: Demonstrate creativity and innovation.

CRP8: Utilize critical thinking to make sense of problems and persevere in solving them.

Time Frame

4 cycles ~ 12 (56 minute) days

Home of the Spartans!

Assistant Superintendent
Office of Teaching and Learning

SPARTAN MISSION:

Meeting the needs of all students with a proud tradition of academic excellence.

DEPARTMENT Mathematics

COURSE Math Test Prep

Topic
Algebra II Methods
Alignment to Standards
A.APR.2 — Arithmetic with Polynomials & Rational Expressions N.RN.2 — The Real Number System F.BF.1 — Building Functions F.LE.2 — Linear & Exponential Models A.REI.12 — Reasoning with Equations & Inequalities
Learning Objectives and Activities
SWBAT answer the following questions: • Do you know the rules of exponents? • Can you solve an equation containing a radical? • Can you solve an equation containing an absolute value? • Can you work with functions? SWBAT demonstrate understanding of the following: • Rules of exponents will be applied to many of the problems on the SAT. • Radical equations are common on the SAT. • Absolute value equations are difficult for many students. • Functions within equations and graphs. Learning Activities: • Zero, Negative and Fractional Exponents • Equations Involving Radicals and Exponents • Absolute Value Equations and Inequalities • Working with Functions • Some Special Functions • Reflecting and Translating Function Graphs • What's Happening in Your Car? (Interpreting Graphs Experiment) - Mastering the Math SAT – Paul Lawrence pg 283-290 • Create five SAT problems about this topic. Let your classmates solve them. • Skills 40-50 from McGraw-Hill's Top 50 Skills for a Top Score SAT Math • Skills 40-50 Flash Cards from McGraw Hill's Top 50 Skills for a Top Score SAT Math
Assessments
Formative: • Classwork and Homework

SPARTAN MISSION:

Meeting the needs of all students with a proud tradition of academic excellence.

DEPARTMENT Mathematics

COURSE Math Test Prep

- IXL Practice
- Teacher Observation
- Graphic Organizer
- Math Scavenger Hunt/Trail
- Entrance/Exit Cards

Summative:

- Quizzes
- Problem-based Quiz/Test

Benchmark:

- Cumulative final exam with multiple choice, short answer, and extended constructed response questions.

Alternative:

- Observation Assessment with Problem-Solving

Interdisciplinary Connections

ELA: W.11-12.1: When students are justifying their reasoning on short answer and extended constructed response questions they write arguments to support claims in an analysis of substantive topics or texts, using valid reasoning and relevant and sufficient evidence.

Career Readiness, Life Literacies, and Key Skills

9.1.12.CDM.8: When learning exponential equations students will compare and compute interest and compound interest.

9.3.ST.2: When determining a regression model that fits data students will use technology to acquire, manipulate, analyze and report data.

Technology Integration

All students will use digital tools to access, manage, evaluate, and synthesize information in order to solve problems individually and collaboratively and to create and communicate knowledge.

- 9.4.8.TL.6: Collaborate to develop and publish work that provides perspectives on a real-world problem.
- 9.4.5.CT.3: Describe how digital tools and technology may be used to solve problems.

Supplemental instruction and math games will be presented using IXL Math and Video Tutor bigideasmath.com.

- 9.4.12.TL.1: Assess digital tools based on features such as accessibility options, capacities, and utility for accomplishing a specified task

Students will use graphing calculators to use math tools strategically and attend to precision and will use Desmos in order to discover new concepts involving graphing and functions.

- 9.4.8.IML.3: Create a digital visualization that effectively communicates a data set using formatting techniques such as form, position, size, color, movement, and spatial

grouping

Additional resources and extension activities will be posted on Google Classroom in order to encourage students to reflect on their learning and expand on their knowledge.

- 9.4.12.TL.4: Collaborate in online learning communities or social networks or virtual worlds to analyze and propose a resolution to a real-world problem.

Students will utilize Geogebra to further investigate scale drawings and similar figures to demonstrate understanding of standards.

- 9.4.8.IML.3: Create a digital visualization that effectively communicates a data set using formatting techniques such as form, position, size, color, movement, and spatial grouping

Students will access SAT sites to further investigate lesson concepts and demonstrate understanding of standards.

- 9.4.12.TL.1: Assess digital tools based on features such as accessibility options, capacities, and utility for accomplishing a specified task

Career Education

CRP8: Utilize critical thinking to make sense of problems and persevere in solving them.

CRP11: Use technology to enhance productivity.

Modifications (ELL, Special Education, At-Risk Students, Gifted & Talented, & 504 Plans)

ELL:

- Work toward longer passages as skills in English increase
- Use visuals
- Introduce key vocabulary before lesson
- Teacher models reading aloud daily
- Provide peer tutoring
- Use of Bilingual Dictionary
- Guided notes and/or scaffold outline for written assignments
- Provide students with English Learner leveled readers.

Supports for Students With IEPs:

- Allow extra time to complete assignments or tests
- Guided notes and/or scaffold outline for written assignments
- Work in a small group
- Allow answers to be given orally or dictated
- Use large print books, Braille, or books on CD (digital text)
- Follow all IEP modifications

DEPARTMENT Mathematics

COURSE Math Test Prep

At-Risk Students:

- Guided notes and/or scaffold outline for written assignments
- Introduce key vocabulary before lesson
- Work in a small group
- Lesson taught again using a differentiated approach
- Allow answers to be given orally or dictated
- Use visuals / Anchor Charts
- Leveled texts according to ability

Gifted and Talented:

- Create an enhanced set of introductory activities (e.g. advance organizers, concept maps, concept puzzles)
- Provide options, alternatives and choices to differentiate and broaden the curriculum
- Organize and offer flexible small group learning activities
- Provide whole group enrichment explorations
- Teach cognitive and methodological skills
- Use center, stations, or contracts
- Organize integrated problem-solving simulations
- Propose interest-based extension activities
- Expose students to beyond level texts.

Supports for Students With 504 Plans:

- Follow all the 504 plan modifications
- Text to speech/audio recorded selections
- Amplification system as needed
- Leveled texts according to ability
- Fine motor skill stations embedded in rotation as needed
- Modified or constrained spelling word lists
- Provide anchor charts with high frequency words and phonemic patterns
