Sierra Roof and Relocation Update

September 2, 2025

Dear Sierra Community,

Roof work at Kyrene de la Sierra has resumed. Crews are conducting preparation work this week, and barring weather delays, will operate on the following timeline:

Sierra roof construction estimated* timeline:

- **September:**
 - Finish demo, lay base and cap sheet
 - Detail all roof penetrations, curbs, and parapet walls.
- **Sep/Oct:**
 - 30-day break (required time for 2 ply roof to cure)
 - Install parapet wall copping
- **Oct/Nov:**
 - Spray coating (10 days)
 - 30-day break (required time for coating to cure)
 - Skylight installation
- **December:**
 - Air quality re-testing
 - Full-campus deep cleaning
 - Move Sierra staff back in to building

***Various factors impact construction timelines, including weather delays. This timeline is approximate.**

Thank you for your patience with this process. As I shared in my last message, roof construction was paused to conduct air quality testing and implement mitigation measures. Once that work was complete, we provided time for Sierra teachers to

access the building to retrieve additional items for their classrooms.

I have advised families and staff to prepare to remain at Cerritos/Altadena through winter break, but if roof work is completed sooner, and we can welcome you back before winter break, we absolutely will.

Sincerely,

Laura Toenjes
Superintendent
