

## **Noninstructional Operations Risk Management**

### Risk Management

The Board believes the District must identify and measure risks of loss due to the damage or destruction of District property or to claims against the District by others claiming to have been harmed by the action or inaction of the District, its offices or staff.

It is the duty of the Board to require an independent inspection of the school facilities to determine whether those school facilities comply with codes addressing safety and health standards for facilities, including electrical, plumbing, mechanical, elevator, fire safety, boiler safety, life safety, structural, snow loading, and sanitary codes. The independent inspection shall be done once, every school year.

The Board directs the Superintendent to create and implement a risk management program that encompasses the district in its entirety to reduce or eliminate risks where possible, and to determine which risks the District can afford to assume.
