Tuberculosis (TB) Risk Assessment:

Is your student in contact with any of the following persons: Immigrants from another country, someone diagnosed with or treated for TB, incarcerated children or adults, HIV infected, homeless, nursing home residents, institutionalized children or adults, illegal drug users, migrant farm workers?

For your student/student, please circle yes or no below, and explain any yes answers in space provided.

Diagnosed or treated for TB? _____ No _____ Yes _____
 Immigration from another country? _____ No _____ Yes _____
 Traveled to another country? _____ No _____ Yes _____
 Ever been in jail or in 20/20 juvenile center? _____ No _____ Yes _____

Has your child received the COVID-19? Yes No

Consent for Nitrous Oxide Sedation

Patient Name: _____

If your child needs dental treatment, it may be beneficial or necessary to use nitrous oxide sedation in order to complete the dental treatment. Nitrous oxide relaxes children, makes them more comfortable, and gives them an all-around better experience at their dental appointment. By signing this form ahead of time it will be easier for us to do the treatment in a more timely and efficient manner. We will attempt to call you prior to using nitrous oxide on your child. Please read the following and sign at the bottom if you consent to treatment with nitrous oxide sedation. It will only be used if necessary.

I give permission for a Cincinnati Health Department dentist to give my child nitrous oxide sedation if indicated. I understand that some side effects could occur including:

1. Nausea and vomiting – we suggest that no food be eaten for at least two hours before the appointment.
2. Excessive sweating and patient may get red or flushed.
3. An unusually high amount of saliva is sometimes produced.
4. Although not common, a patient may get a sensation of having the chills.
5. In unusual circumstances, a child may become temporarily hyperactive.

The benefits include relaxation and possibly eliminating the need for local anesthetic injections (“Novocaine”). For those patients who may need both, the use of nitrous oxide/oxygen will make the injections much easier for the patient.

At no time will the patient be “asleep” and at all times the patient will be given more oxygen than what is present in room air. Patients will be monitored continually by the dentist and staff, and a parent can be present as well if requested.

If you would like to be present, please make a note on the top of this form and we will be happy to schedule an appointment for you at your convenience.

☐ I consent for my child to receive nitrous oxide sedation as deemed necessary by the dentist. I understand the dental staff will attempt to contact me prior to administering nitrous oxide.

☐ I do not consent for my child to receive nitrous oxide sedation.

PLEASE REVIEW THE FOLLOWING INFORMATION

Program Description School-Based Health Center Cincinnati Health Department

Welcome to the School-Based Health Center. The School-Based Health Center makes medical, dental and vision care available to all students when needed. If your child/adolescent becomes sick at school or if your child/adolescent needs a check-up, sports physical, immunizations, routine dental care, or a vision exam they can have it done in the School-Based Health Center. If your child/adolescent develops a dental problem at school, a dentist can see your child at one of school-based dental centers located at Academy of World Languages, Withrow High School, Western Hills High School, Oyler School, Crest Smiles Shoppe, or other CHD Health Centers. If you have any questions or need help with the application, please call the School Health Program 357-2809 or contact your school nurse

Patient Rights and Responsibilities:

- Respectful and equal treatment, care, and accommodations are available regardless of race, age, ethnicity, creed, sex; or sexual orientation.
- To have a health care assessment and plan of care and participate in your health care plan.
- To talk to your health care provider openly and privately.
- It is the patient's responsibility to carry out the recommended treatment plan.
- Allow 30 days for completion of insurance or disability forms..
- Notify the SBHC if you have received treatment in an Emergency Room or hospital.
- After hours, in case of emergency call 911 or go to the nearest emergency room. If you have an urgent issue and would like to speak with the provider on call, please call 357-7320.

Regarding PAYMENT FOR SERVICES:

- If you do not have health insurance for your child, you will be responsible for the bill at the appropriate **discounted fee**. However, no child will be denied care due to inability to pay for services.
- If you do not have health insurance for your child, information about your household income will be requested to ensure compliance with federal requirements and to determine if you qualify for reduced or waived fees based on the Cincinnati Health Department sliding fee scale. This information will be kept strictly confidential.
- No child will be denied care due to inability to pay for services.
- We can help you if you need assistance applying for Medicaid, you can stop by our center or call 513-357-2787.

Regarding the SHARING OF HEALTH INFORMATION:

- The School-Based Health Center may request medical records/information from any health care provider or facility where your child has been seen.
- Results of the visit will be sent by the School-Based Health Center to your child's regular doctor/clinic.
- The PHHC, School-Based Health Center and/or the Cincinnati Health Department (CHD) school nurse will share medical information with each other as needed.
- The school has other community resources available, including mental health. If services for mental health are needed, the health center provider may initiate a referral to the mental health provider at your child's school or a community site. The mental health provider will contact you for consent. The health center provider and the mental health provider will coordinate your child's care as needed. All information will be kept strictly confidential.
- Dates of service regarding completed dental, vision and medical care (ie. Immunizations, annual well-child check and asthma care) may be shared with your child's school if you agree and sign the Authorization form provided with this consent.

I have the right to receive or review a copy of the Notice of Privacy Practices. I acknowledge that I have been offered a copy of the Notice of Privacy Practices:

 I have received or reviewed a copy (signature and date) _____

I do not want a copy (signature and date) _____

I authorize the SBHC to call my home or cell phone number and leave a message with an adult that answers the telephone or on the voicemail pertaining to my child's medical care, including laboratory results.

INFORMED CONSENT FOR SILVER DIAMINE FLUORIDE

Silver diamine fluoride (SDF) is an antimicrobial liquid used to treat tooth sensitivity and to help stop tooth decay. Reapplication of SDF may be necessary to better control caries progression and is recommended every 3, 6 or 12 months but may be applied more frequently if needed. Treatment with SDF may not eliminate the need for dental fillings or crowns to repair function or esthetics. Additional procedures may incur a separate fee.

Facts for consideration:

- The procedure involves: 1) Proper isolation of the area and drying of affected teeth. 2) Rub a small amount of SDF on the decayed area. 3) Allow SDF to act on the tooth surface for at least 1 min, preferably up to 4 minutes. 4) Rinse tongue and oral mucosa.
- I should not be treated with SDF if: 1) I am allergic to silver or ammonia. 2) There are painful sores or raw areas on my gums or anywhere in my mouth (i.e., ulcerative gingivitis, gingivostomatitis).

Benefits of SDF treatment:

- It is quick, easy and painless.
- No need to numb teeth.
- It arrests 80% of cavities when applied twice yearly.
- It can help relieve tooth sensitivity.
- It is a temporary treatment option for young, fearful, or special needs patients that may require sedation for extensive dental care.

patients

Risks related to SDF:

- **The affected area will stain black permanently.** Healthy tooth structure will not discolor. Stained tooth structure can be covered with a filling or a crown in the future.
- If accidentally applied to the skin or gums, a brown or white stain may appear that causes no harm, cannot be washed off, and it will disappear in a few days to 2 weeks.
- You may notice a very temporary metallic aftertaste.
- SDF may not work for all cavities and decay will progress with poor oral hygiene and food impaction. In that case, the affected tooth will require further treatment, which can involve a filling or a crown, root canal therapy, extraction, or referral for specialty dental care.

Alternatives to SDF, not limited to the following:

- No treatment, which may lead to progression of cavities, severe pain and more serious dental infection.
- Depending on the location and extend of the tooth decay as well as the level of patient behavior and cooperation, other treatment may include fluoride varnish, a filling or crown, extraction, or referral to a specialist.

I hereby acknowledge that I have read and understand this consent and the meaning of its contents. All questions have been answered in a satisfactory manner. I have seen the photo displaying the discoloration of the cavity after SDF application. I consent to have Silver Diamine Fluoride (SDF) treatment with a dentist or another qualified dental staff at any dental site operated by the Cincinnati Health Department.
