

# ✓ **Leadership in Mathematics Series:** 2023 Mathematics Framework Toolkit

*For District Leadership, Site Administrators, Teacher Leaders, Instructional Coaches, & Counselors*

**Leo Kostelnik** will lead an in-depth exploration of the 2023 CA Mathematics Framework, highlighting best practices and resources to enhance instruction and ensure access for multilingual learners and other diverse student groups. This professional learning series will provide both theoretical knowledge and practical strategies for implementing equitable, language-rich mathematics instruction aligned with the Framework.

Participants will develop a shared vision for effective math teaching, strengthen leadership and coaching skills, and support educators in integrating content, pedagogy, and technology. The series emphasizes equity through inclusive practices that foster positive math mindsets, affirm student identity, and build on the linguistic and cultural assets of multilingual learners, while engaging in collaboration to sustain meaningful implementation.

***Sessions to be held on Wednesdays in-person at the Marin County Office of Education from 10:00am - 12:00pm***

## **November 5, 2025**

- Centering Equity & Cultivating a Mathematical Mindset

## **February 11, 2026**

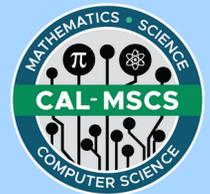

- Deepening Understanding Through Investigation and Connection

## **April 22, 2026**

- Designing Instruction and Assessment Around Big Ideas
- Progressions in Number Sense: Foundations for Learning
