

Required Parent Notification Update School Health Related Services

Dear parents/guardians,

We would like to inform you of an important change in state law that affects how our campus provides health related services to students. Effective September 1, 2025, all public schools are required to obtain annual written parental consent before providing any routine health care services to students by qualified school staff, including school nurses and athletic trainers.

What does this mean for your child?

Starting September 1, school staff, including school nurses and athletic trainers, will be required to have parent/guardian written consent on file before providing any non-emergent health-related services or medical care to students.

Routine Health-Related Services Provided at Your Child's Campus:

- Non-emergent first aid after initial injury evaluation
- Non-emergent assessment and evaluation of illnesses and physical symptoms
- Administration of prescription medications in accordance with the law
- Administration of over-the-counter medications in accordance with law
- Monitoring of chronic health conditions (e.g., asthma, diabetes, seizures)
- Vision, hearing, and scoliosis screenings
- Acanthosis screening
- Coordination of health care

Without consent, school staff will not be able to assess or treat your child for non-emergent health concerns. **In case of a serious emergency**, staff will still act to protect your child's safety, call for emergency services, and contact you immediately.

To ensure your child continues to receive timely health-related care and support during the school day, we ask that you complete the **Health Services Annual Consent Form** as soon as possible using the appropriate link(s) below. You may also find this information on the [CFISD Health Services webpage](#).

We understand this is a significant change, and we appreciate your prompt attention to this matter. If you have any questions or need assistance accessing the form, please contact your child's school.

Thank you for your continued partnership in keeping our students safe, healthy, and supported.

Please select the appropriate form according to your child(ren)'s campus level(s) and complete a separate form for each child.
