Dear Parent,

Your high school student has been invited to participate in Texas College Bridge, an opportunity to take free, online college preparatory classes.

Texas College Bridge was developed to help students prepare to be college ready and set them up for postsecondary success. The free, online courses in English and math are individualized, self-paced, and teacher facilitated.

With Texas College Bridge:

- Students are invited to take online, individualized college prep courses with a teacher facilitator.
- Students will take a pre-assessment that personalizes the course content just for them, allowing them to focus on the skills they need and skip those they have already mastered.
- Students can work at their own pace in completing the identified readiness skills.
- When successfully completed, students receive a certificate of completion and, at the time of high graduation, can earn a Texas Success Initiative (TSI) exemption at more than 100 partnering colleges and universities across Texas.

Texas College Bridge is one of the most important steps in guiding your child toward a postsecondary program that can further their education and set them on the path for a high-demand career.
When your child receives the invitation to participate, please encourage them to register. It's free, and at their own pace. Visit TexasCollegeBridge.org to learn more.
