

Dear Faculty, Staff, Parents/Guardians:

In 1986, Congress passed the Asbestos Hazard Emergency Response Act (AHERA) which mandated the Asbestos-Containing Materials in School Rule, 40 CFR Part 763. It requires all buildings owned by a school district to be inspected by AHERA accredited inspectors. The inspectors identify all asbestos-containing or presumed asbestos-containing building materials within the building. The rule further requires the development of a management plan by an AHERA accredited management planner that is based on the findings of the inspection. The management plan outlines the intent in controlling the potential for exposure to asbestos fibers in school buildings. The AHERA law requires that a visual surveillance of asbestos-containing or presumed asbestos-containing areas be completed every six months and a re-inspection should be conducted every three years.

It has been determined by the Illinois Department of Public Health (IDPH) and federal Environmental Protection Agency (EPA) that asbestos is a potential health hazard and precautions should be taken to avoid disturbing any asbestos-containing or presumed asbestos-containing materials.

The initial inspection of most of the school buildings was conducted in 1988 with subsequent initial inspections, as necessary. The inspections identified some asbestos-containing and presumed asbestos-containing materials. Since that time, periodic surveillance inspections and re-inspections have been performed to ensure that the materials remain in good condition and do not pose a hazard to building occupants.

An asbestos management plan was drafted for each building based on our initial inspection and submitted to IDPH. The asbestos management plan outlines, in detail, the methods utilized to maintain the materials in a safe manner. The management plan is updated as asbestos is removed or conditions change. A copy of the management plan is on file in the Plant Operations office, on site at each building, and is available for review during regular school hours.

If there are any questions, please contact the Environmental and Sustainability Coordinator or designee at Plant Operations at 847-888-5060.
