COURSE DESCRIPTION: Honors Chamber Choir

The Honors Music program offers advanced opportunities for individual musical growth and academic study to gifted and motivated instrumental and vocal students in grades 10-12 who have been enrolled in band or choir classes for at least a year prior to auditioning for the honors program. Designed for students concurrently participating in Concert Band or Chamber Choir, this rigorous program fosters leadership within ensembles while providing enhanced performance preparation and experiences.

Students in the Honors Music program are expected to engage in advanced-level work, which may include:

- Developing and presenting a comprehensive performance portfolio
- Maintaining a personal practice log, journal, and reflection process
- Conducting performance-related research projects
- Participating in additional group and individual lessons
- Preparing for and participating in advanced performance opportunities

This program is ideal for students who are passionate about deepening their musical expertise and pursuing an elevated level of study and performance excellence.

A student in Honors Chamber Choir...

- is musically talented.
- is intellectually curious.
- embraces music and culture.
- takes risks willingly, with the understanding that the goal is music proficiency, not the grade.
- takes the initiative to practice on their own outside of the classroom in order to improve.
- sees music performance as a way of expressing themselves and connecting with others.
- dedicates themselves to the study of music with the intent of applying it outside of the classroom.

Students are admitted to the Honors Music – Chamber Choir program by audition only in early June. Admission to the program assumes the student is seriously interested in the study of music and is expected to do work commensurate with honors level study. Students enrolled in this course comprise the leadership of all of the vocal activities, and in addition to the requirements of the Chamber Choir course, are expected to meet the following additional criteria:

Descriptors for High School Proficiency Levels

(Source: [NJ Department of Education 2020 NJSL-S-VPA](#))

At the high school level (grades 9–12), all students are required to complete five credits in Visual and Performing Arts as part of the course requirements to receive a high school diploma (N.J.A.C. 6A:8-5.1). Because students' experiences and course offerings at the middle and high school levels may vary, the new grade 9–12 standards are described in three levels of proficiency. The three levels—proficient, accomplished, and advanced—are flexible enough to accommodate varying degrees of achievement by students during high school, including those who build on their K–8 foundation by pursuing deeper engagement in one arts discipline, as well as those who explore a wide range of artistic pursuits and experiences at the high school level.

Proficient	Accomplished	Advanced
<p>Students at the proficient level have developed the foundational technical and expressive skills and understandings in an art form necessary to solve assigned problems or prepare assigned repertoire for presentation; make appropriate choices with some support; and may be prepared for active engagement in their community. They understand the art form to be an important form of personal realization and well-being, and make connections between the art form, history, culture and other learning.</p>	<p>Students at the accomplished level are, with minimal assistance, able to identify or solve arts problems based on their interests or for a particular purpose; conduct research to inform artistic decisions; and create and refine arts performances, products, or presentations that demonstrate technical proficiency and personal communication and expression. They use the art form for personal realization and well-being and have the necessary skills for and interest in participation in arts activity beyond the school environment.</p>	<p>Students at the advanced level independently identify challenging arts problems based on their interests or for specific purposes and bring creativity and insight to finding artistic solutions. They are facile in using at least one art form as an effective avenue for personal communication, demonstrating a higher level of technical and expressive proficiency characteristic of honors or college level work. As arts learners, they exploit their personal strengths and apply strategies to overcome personal challenges. They are capable of taking a leadership role in arts activity within and beyond the school environment.</p>
<p>A level of achievement attainable by most students who complete a high school level course in the arts (or equivalent) beyond the foundation of quality K–8 instruction.</p>	<p>A level of achievement attainable by most students who complete a rigorous sequence of high-school level courses (or equivalent) beyond the proficient level.</p>	<p>A level and scope of achievement that significantly exceeds the accomplished level. Achievement at this level is indisputably rigorous and substantially expands students' knowledge, skills, and understandings beyond the expectations articulated for accomplished achievement.</p>

Interdisciplinary Connections

Music encompasses a broad multidisciplinary field within its own academic area, including the teaching of creative process, history of the arts and culture, performing and aesthetic responses & critique methodologies. The NJSLS are designed to integrate four core music standards related to creative process, history of the arts and culture, performing and aesthetic responses & critique methodologies. These interdisciplinary connections, as a result, are present within the current standards. Interdisciplinary connections in this document expand outside of the distinct field of music into: science, social studies, mathematics, and technology; and literacy/language arts.

- **Math:** Using songs and poems in instruction to determine patterns and rhythm.
- **ELA:** Listening to regular beats, alliteration, rhymes and repeated lines to determine the meaning in a story, poem or song.
- **Social Studies:** Identify common, recognizable musical forms and characteristics related to specific cultural traditions. Identify compositional techniques used in different styles and genres of music vary according to prescribed sets of rules. Identify stylistic considerations that vary across genres, cultures, and historical eras.
- **Technology:** Comparing the same work in different media. Compare and contrast the text to an audio, video, or multi-media version while analyzing each medium's portrayal of the subject.
- **Science:** Deepen student understanding of the scientific method and the elements of music. Students will develop a basic understanding of core concepts related to musical terms based in science: pitch, tempo, timbre, interval, chord, harmony, melody, and rhythm. Students will conduct scientific experiments to explore and understand the properties of sound.

Assessments

Music assessments like other content area assessments should be a natural and ongoing part of the teaching and learning process. The more authentic the chance that students will see the interdisciplinary connections between music and other areas of study, as well as the role of music in their lives as citizens, the better.

1. What factors should be considered in planning for assessment?
 - Content mastery (which standards are being assessed)
 - Analysis of content
 - Skills development
 - Connections between and among essential learnings
 - Connections between the past, present, and the future
 - Interdisciplinary connections
 - Diversity in student learning styles and needs
 - Opportunities for democratic participation
2. How are goals of instruction and assessment related?
 - Are the goals for learning actually being assessed?
 - To what degree are we asking students to extend learning?
 - Can students transfer their learning to a new situation?
 - Does the assessment reflect what is valued instructionally?
 - Does the assessment benefit the learner by informing teaching practices?
 - Does the assessment allow for a variety of learners to demonstrate their understanding?
3. What should you consider as you develop criteria for scoring?
 - How many ways can students demonstrate they have learned the material?
 - How will students be scored?
 - How will the needs of a variety of learners be addressed with this assessment?
 - Does the scoring tool reflect the learning goals?
4. What are the most constructive assessment designs and methods for music educators?
 - Performance assessment
 - Authentic assessment
 - Authentic instruction
 - Portfolio assessment

Music and Technology K-12 Indicators

As teaching, learning and curriculum across New Jersey evolves to better meet student needs, teachers when addressing standards in music are expected to integrate Technology Education, Engineering, Design, and Computational Thinking - Programming, and 21st Century Skills into their classroom practice. To that end, the following standards are being integrated into their classroom practice.

The following content statements can be integrated into any of the adopted Music strands (creative process, history of the arts and culture, performing and aesthetic responses & critique methodologies).

8.1 Educational Technology

- Understand and use technology systems.
- Select and use applications effectively and productively.
- Apply existing knowledge to generate new ideas, products, or processes
- Create original works as a means of personal or group expression.

8.2 Technology Education, Engineering, Design, and Computational Thinking - Programming

Differentiation/Modifications

Curriculum Differentiation is a process teachers use to increase achievement by improving the match between the learner's unique characteristics: prior knowledge, cognitive level, learning style, motivation, strength or interest and various curriculum components: Nature of the objective, teaching activities, learning activities, resources and products. This broad notion applies to learners from a diverse range of abilities, including: Gifted and Talented, English Language Learners, Students with Disabilities, and Students at Risk of School Failure. Music is a field of education that provides educators with a wealth of opportunities for differentiation, but also real challenges of meeting the needs of diverse learners. This addendum reveals pathways for music differentiation specific to four distinct student populations.

Teachers can differentiate

- Content: What we teach and how we give students access to the information and ideas that matter
- Process: How students come to understand and "own" the knowledge, understanding, and skills essential to a topic
- Product: How a student demonstrates what he or she has come to know, understand and be able to do as a result of a segment of study

According to students'

- Readiness-The current knowledge, understanding, and skill level a student has related to a particular sequence of learning
- Interest- What a student enjoys learning about, thinking about, and doing
- Learning Style-A student's preferred mode of learning. It is influenced by learning style, intelligence preference, gender and culture

The NJ Music Framework <http://www.state.nj.us/education/archive/frameworks/arts/index.html> contains an in-depth overview for meeting the needs of diverse learners in Music. Many of these content specific suggestions are classroom ready. Note: The Standard notations in this framework document are not according to the 2014 Music Standards.

The aim is to lower the language barrier by making the classroom communication simple, clear, and meaningful to the student. #	STUDENT LEARNING OBJECTIVES	New Jersey Music Anchor Standards
1	Aurally and visually identify melodic and/or rhythmic motifs and identify changes in time signature, tempo, rhythm, melody, harmonic and timbre that are the same, different and/or recurring.	4
2	Identify the genre and historical period and culture of various musical selections, using identifying elements such as tempo, rhythm, melody, harmony and timbre.	4, 11
3	Analyze compositions from different world cultures and genres with respect to technique, musicality, and stylistic nuance, and sight-read/ or play simple pieces from at least two cultures or genres, with technical accuracy, appropriate musicality, and the relevant stylistic nuance.	7, 10, 11

4	Perform and record a musical selection (using a digital recording device or program such as Smart Music) and use self evaluation and/or class critique to identify what was performed well technically and where additional practice/study would improve performance and assist in accomplishing musical objectives. Record the same selection again and compare and contrast the two performances and set new performance goals.	2, 5, 9
5	<p>Content Statement: Understanding nuanced stylistic differences among various genres of music is a component of musical fluency. Meter, rhythm, tonality, and harmonics are determining factors in the categorization of musical genres.</p> <p>Cumulative Progress Indicator: Examine how aspects of meter, rhythm, tonality, intervals, chords, and harmonic progressions are organized and manipulated to establish unity and variety in genres of musical compositions.</p>	9
6	<p>Content Statement: Cultural and historical events impact art-making as well as how audiences respond to works of art.</p> <p>Cumulative Progress Indicator: Determine how dance, music, theatre, and visual art have influenced world cultures throughout history.</p>	8,9,11

Vocal Music Lessons

In addition to the normal class meeting time, students are required to attend one lesson every two weeks to fulfill the Chamber Choir requirement, and an additional honors lesson per month, based on mutual availability, to fulfill the honors requirement. These lessons aid students in improving their individual vocal performance. This year an open lesson period policy will be in place. The lesson schedule will be posted weekly and students have the option to attend during a period that works with their schedule. The lesson schedule is designed to keep flexibility and student development in mind. Make up lessons and grading are created to foster student growth and further ownership of their musical development.

Lesson Grading Rubric
