MANAGED DETECTION AND RESPONSE (MDR SOLUTION)

ADDENDUM #1

QUESTIONS & ANSWERS

- Number of Faculty and Staff within the district - **About 600**
- Total Number of Students broken out by segment
 - Number of K-6 **1500 students** K-5
 - Number of Middle School students **About 800**
 - Number of High School Students **About 1100**
- Number of Servers; Virtual and Physical? **24 Virtual**
- Does the District have any hosted cloud WMs in MS Azure or AWS? **No**
 - If yes, how many in each?
- Number of sites that have Direct internet access **1**
- Bandwidth capacity of the Internet Access per locations and normal “in school hours” steady state bandwidth (this is for the sensors needed for ingress/egress network traffic...we don't want to over design this. If you r capacity of 10G but your steady state is 1G then we want to put in a sensor for 1G. Most districts are hub and spoke with a single IA headend (multiple providers at D-Mark) but we have seen some districts with separate IA circuits at different locations. **The aggregate of all locations fluctuates up to 1.5Gbps.**
- How many MS O365 or Google Workspace accounts for Faculty **About 800**
- How many MS O365 or Google workspace for Students **About 3400**
- Duration of Log Retention needed? Usually, 1 year is needed for compliance of Cyber Insurance, but some districts just use the standard 90 days. **1 year**
