Longwood Central School District

Capital Projects Update!

August 2025

WELCOME BACK

This summer, schools across our district received upgrades to classrooms, arts and music spaces, athletic areas, and common spaces for our staff and students. Work also included maintenance projects such as flooring, painting, and important equipment upgrades.

NEW CAREER AND TECHNICAL EDUCATION CENTER

Construction also began on the new Career and Technical Education facility. With programs on the horizon in Automotive Technology, Cosmetology, Barbering, Culinary Arts, Engineering, Medical Assisting, and Media Production, our students will continue to develop the skills and industry certifications needed to support their individual college and career goals.
