

DIESEL ELECTRICAL/ELECTRONICS SYSTEMS TECHNICIAN

Technical Certificate of Credit

The Diesel Electrical and Electronic Systems Technician Certificate program provides the student with training for becoming an entry-level diesel electrical/electronics systems technician. The topics presented include diesel shop safety and tool use, basic electrical and electronics theory, starting and charging systems, and electronic controls and accessory systems.

Students may enter the program beginning any semester. This certificate program generally takes one (1) or two (2) semesters to complete.

Courses:

Fall or Spring Semester:

DIET 1000	Introduction to Diesel Technology (3 hours)
DIET 1010	Diesel Electrical/Electronics (7 hours)

Potential Jobs & Salaries

Graduates of the Diesel Electrical and Electronic Technician Certificate program are eligible to be employed as Lube Technicians and Maintenance Technicians with an approximate annual salary of \$31,000. The completion of additional certificates and a diploma in Diesel Technology lead into Level I and Level II Diesel Technician entry-level positions with annual salaries ranging from \$45,000-\$75,000.
