EmUrgentCare®
ALBANY MED Health System

Dear Broadalbin-Perth CSD Families,

Albany Med EmUrgentCare is proud to partner with Broadalbin-Perth Central School District to bring convenient, high-quality medical care directly to your child—without them ever having to leave school.

Tentatively scheduled for this September, students will have access to full-service telemedicine visits from the school nurse's office. With your consent, the nurse can connect your child with an urgent care provider in real time to evaluate and treat a variety of minor health concerns.

As part of this program, Broadalbin-Perth CSD will be equipped with **specialized diagnostic devices**, allowing our providers to conduct more comprehensive virtual exams—such as viewing the ears, nose, and throat—to support more accurate diagnoses and care plans.

Parents are welcome to join the telemedicine visit remotely and participate in the appointment, giving you the opportunity to stay involved in your child's care.

Common Conditions We Can Evaluate via Telehealth

LIST OF SERVICES	
Sore Throat	Skin Rash
Ear Pain	Cuts and Wounds Evaluations
Pink Eye/ General eye complaints	Prescription Refills
Concussion	Nausea, vomiting, upset stomach
Headache	Dental Pain
Cold Symptoms	Seasonal Allergies
Triage Consultation	Upper Respiratory Infections
Fever	Asthma Flare-ups
Menstrual Cramps	Impetigo
Sinus Infections	Scabies

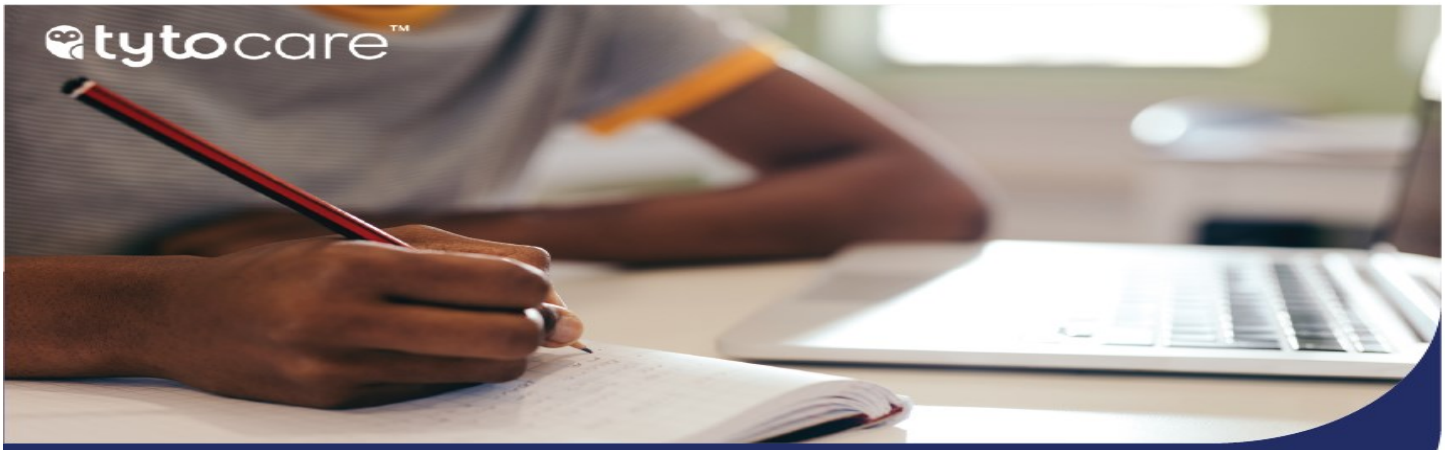

Services are billed through your child's health insurance. If your child does not have insurance, we are committed to ensuring access to care and will work with your family through the Albany Med Health System's Financial Assistance Program.

Consent forms and additional program information are being distributed by the school. Registration must be complete for your child to be eligible to receive care through the program during the school day.

We're excited to bring this innovative model of care to Broadalbin-Perth and support the health and well-being of your child.

Warmly,
The Albany Med EmUrgentCare Team

Keeping Kids Where They Belong

Our on-demand telehealth services connect your child directly with a local medical provider to deliver quick and quality care. With 98% of students returned to class.

Keeping Parents/Guardians Where They Belong

Join the virtual visit and observe as the school nurse and one of our medical Providers evaluates and treats your child right from the nurse's office.

Let Us Take Care of the Details

EmUrgentCare will supply specialized telehealth equipment, COVID/Flu and strep tests and over-the-counter medications for a complete evaluation from the nurse's office.

Closing Gaps in Care

We are able to treat students with or without insurance. With Albany Med Health System's financial assistance program we can help students get quality, local care at affordable prices.

Local Providers with Families in Mind

Your students are guaranteed to be evaluated by a local medical provider. If further care is needed, we will provide an expedited in-person visit at one of our 9 convenient locations, or a visit summary to bring to your preferred facility.

Ready to sign your child(ren) up? Scan the QR code!

Any Questions? Please contact us at 518-264-9060 or emurgentcareschoolprogram@amc.edu

Meet Sam

Sam came to school feeling well. However, after lunch, Sam was sent to the nurse's office for a sore throat.

If the school nurse feels Sam would benefit from a telehealth visit, they will contact the child's parent or guardian to see if they would like Sam to be seen virtually by one of our EmUrgentCare Providers. If a visit is requested, the parent or guardian will be connected with one of our staff members to register Sam and conduct the virtual visit with parent or guardian present. Below are three possible outcomes for the visit.

[1] Visits will be processed through patient's insurance
[2] Albany Med Health System Financial Aid Program is available

	Outcome 1	Outcome 2	Outcome 3
Evaluation	No fever, sore throat	Fever, sore throat	Fever, sore throat, stomach pain
Tests	Negative Strep test	Positive Strep test	Negative Strep test
Medications/ Prescriptions	• Provider orders pain reliever to be administered by the nurse	• Provider orders pain reliever to be administered by the nurse • Provider sends prescription to family's pharmacy	• Provider orders pain reliever to be administered by the nurse • Provider is concerned it is more serious
Discharge method	Child sent back to class	Child sent home, parent picks up prescriptions	Additional care recommended at a clinic: • Parent picks up child and brings him to Albany Med EmUrgentCare for expedited care • Parent picks up child and brings him with visit notes to their preferred provider office
Program Benefits	• Parent joins visit virtually • Limited loss of class time • Confidence that child can return to class • Pain reliever given to student to be more comfortable going back to class	• Parent joins visit virtually • Prescription sent to pharmacy at end of visit • Parent can pick up child from school and go home • Child returns to school quicker • School note is already with the school nurse	• Parent joins visit virtually • Parent will be provided with visit summary to give to their preferred facility
