Madeira's New Baseball Field Hits a Home Run

Madeira High School's (MHS) Varsity Baseball team won their first scheduled home opener of the spring 2025 season on a brand new turf infield.

Work on the team's home field, which is located in Sellman Park at Madeira Middle School, began last fall when the field's existing turf was removed to make way for drainage pipe installment and gravel base work. The project was part of Phase II of the district's athletic facilities renovation.

Phase I of the renovation project included air conditioning in the Madeira High School gym lobby, main gym, and back auxiliary gym, as well as the repainting of the main gym, auxiliary gym, and wrestling rooms. Funding for this part of the project was made possible using federal monies provided by ESSER Covid funds and the allowable expense of improving indoor air quality. Thanks to the support of the Madeira Athletic Boosters, the auxiliary gym floor was also resurfaced.

It the summer of 2024 the boys' and girls' locker rooms and coaches' offices at MHS were renovated. New graphics were installed in the hallway leading out to the main gym featuring all-time Madeira leading scorers Mary Englert and Andrew Benintendi.

Currently in the main MHS gym the bleachers and the gym floor have been removed. By the summer of 2025 there will be newly redesigned bleachers and a new upgraded wood gym floor installed as the final stage of the athletic facilities renovation's Phase II.

Funds to update the athletic facilities are a part of the district's long term Permanent Improvement strategy developed in 2010 that provides direction on capital improvements such as roofs, flooring, classroom furniture, safety items, needed updates, etc.
