

Securly Home

Issaquah School District
Student Technology and Family Partnership

What is Securly?

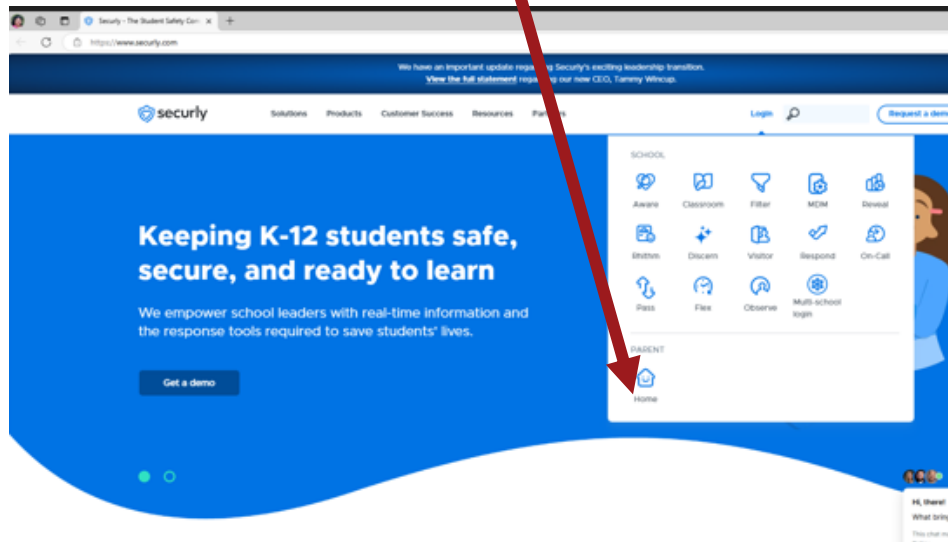

- **Securly Home** provides families the ability to manage their student's **school laptop** while at home (you cannot override school plan).
- Some of the features include
 - Flagging sites - identifying web searches of concern
 - setting alerts
 - establishing rules for internet use while your child is at home
 - setting offline schedules
 - pausing the internet with the push of a button
 - viewing activity reports

Who has access to Securly Home?

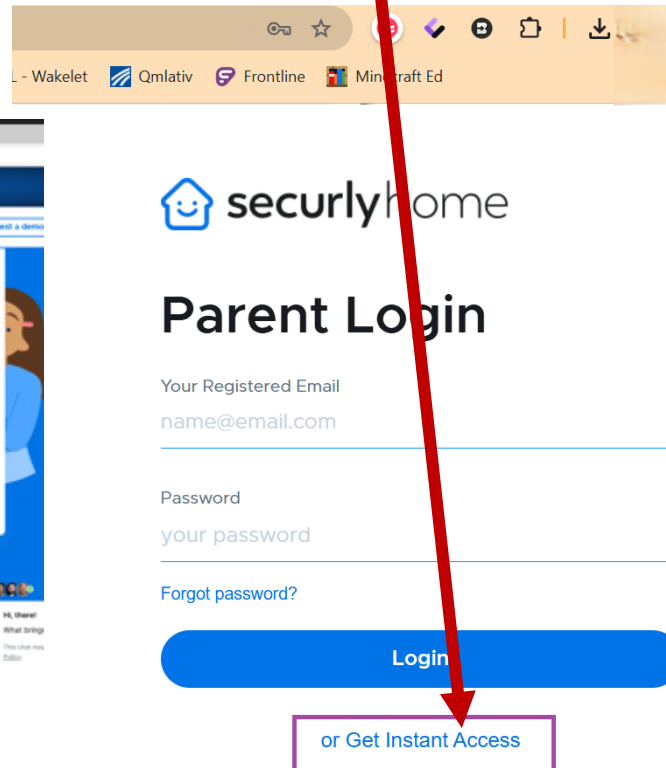

- All families with students in grades 6-12 in the ISD.
- Family members listed in the "Family 1 and Family 2" fields of Skyward can use Securly Home.
- Activate Securly Home accounts by visiting <https://www.securly.com/home-parent>.
- Use Securly Home on your mobile device.

How can parents download it on a Computer?

1. Go to [Securly.com](https://www.securly.com)
2. Hover over "Login" and Click "Home"

3. Click "Get Instant Access"

4. Type in your Skyward family 1 or 2 email and click "Get Instant Access"

Parent Login

Click "Get instant access" to get an email with a magic login link that will automatically log you in.

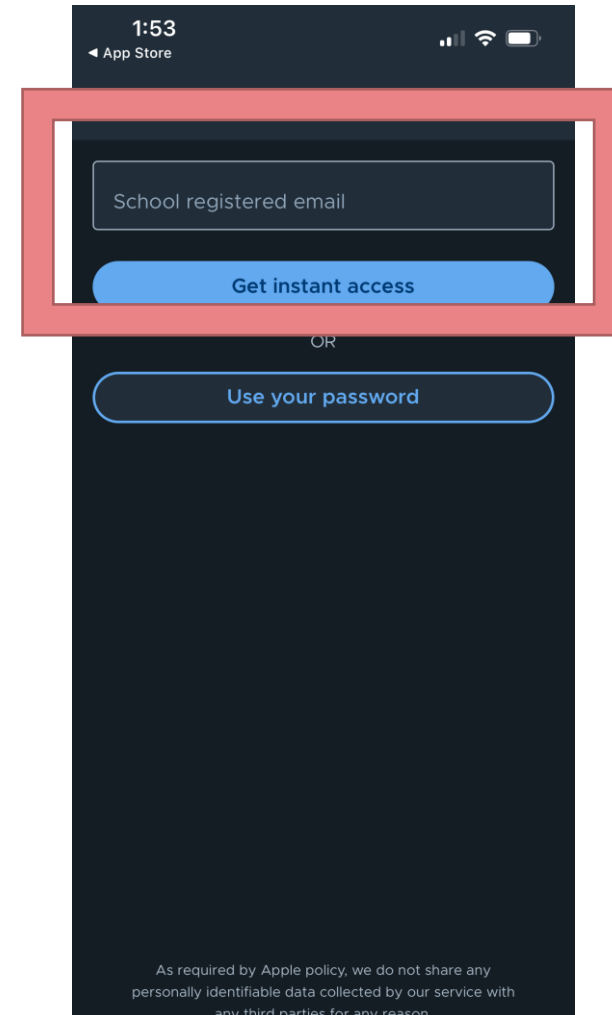

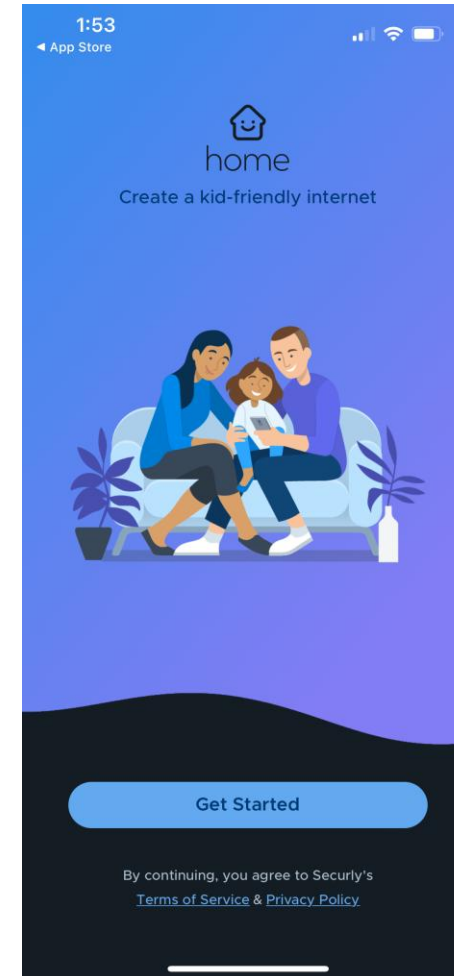

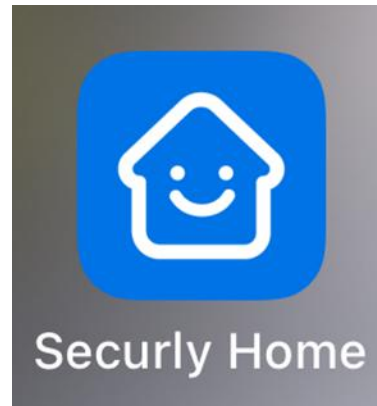

Your Registered Email

name@email.com

Get Instant Access

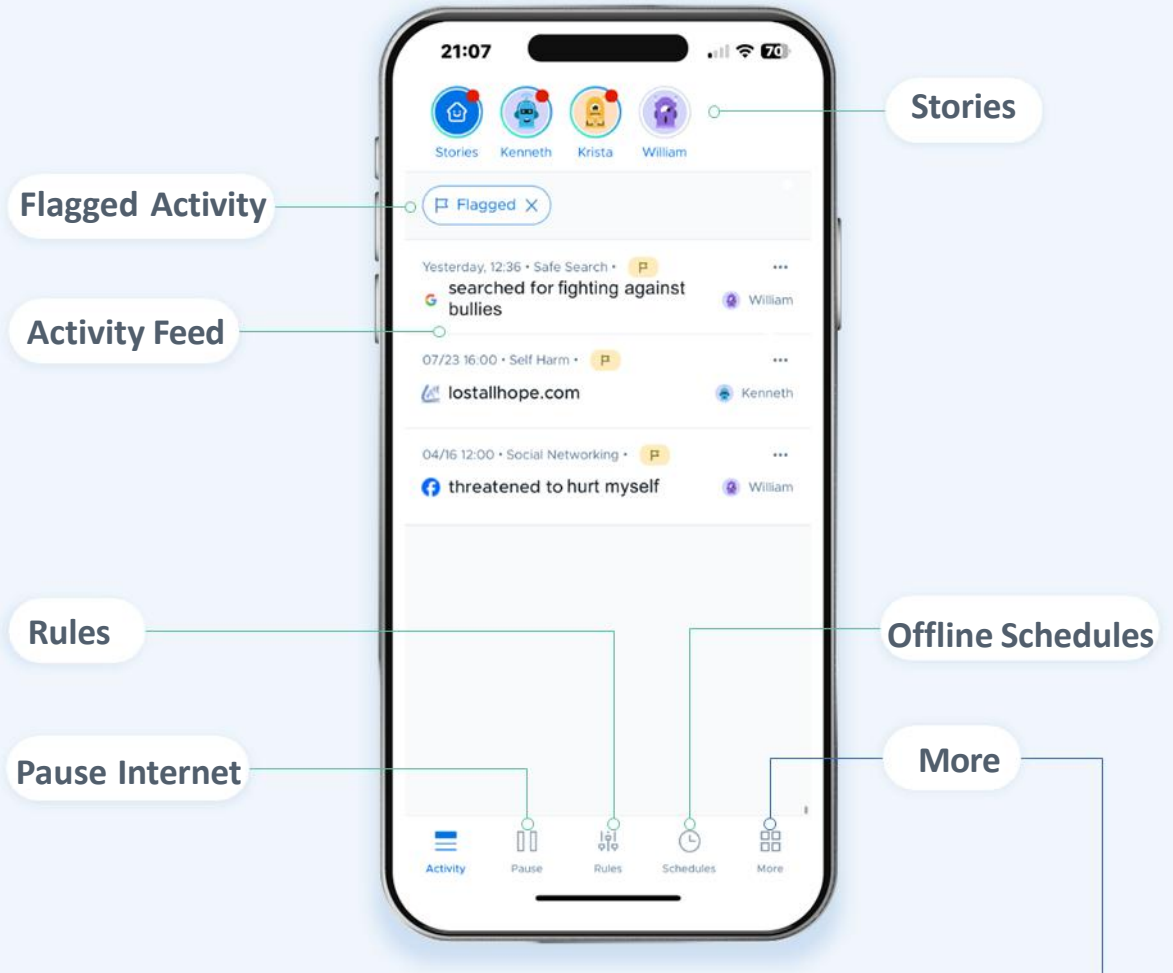

How can parents download it on a mobile device?

- Download the Mobile Securly Home App
- Get Started
- Type in the email address from Family Access Parent email
- Click “Get instance access”
- You will get an email to set up your account

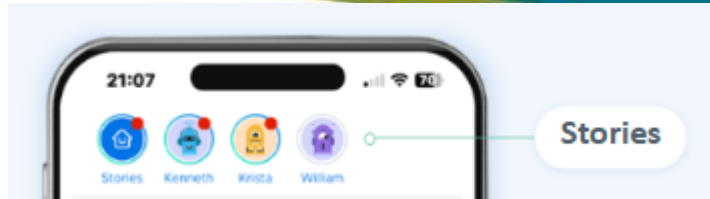

Home screen

After logging in, parents will see the navigation menu of the Securly Home app displayed at the bottom.

From the "More" menu in the bottom right, parents can access account settings and reach out to Securly for technical support.

Stories

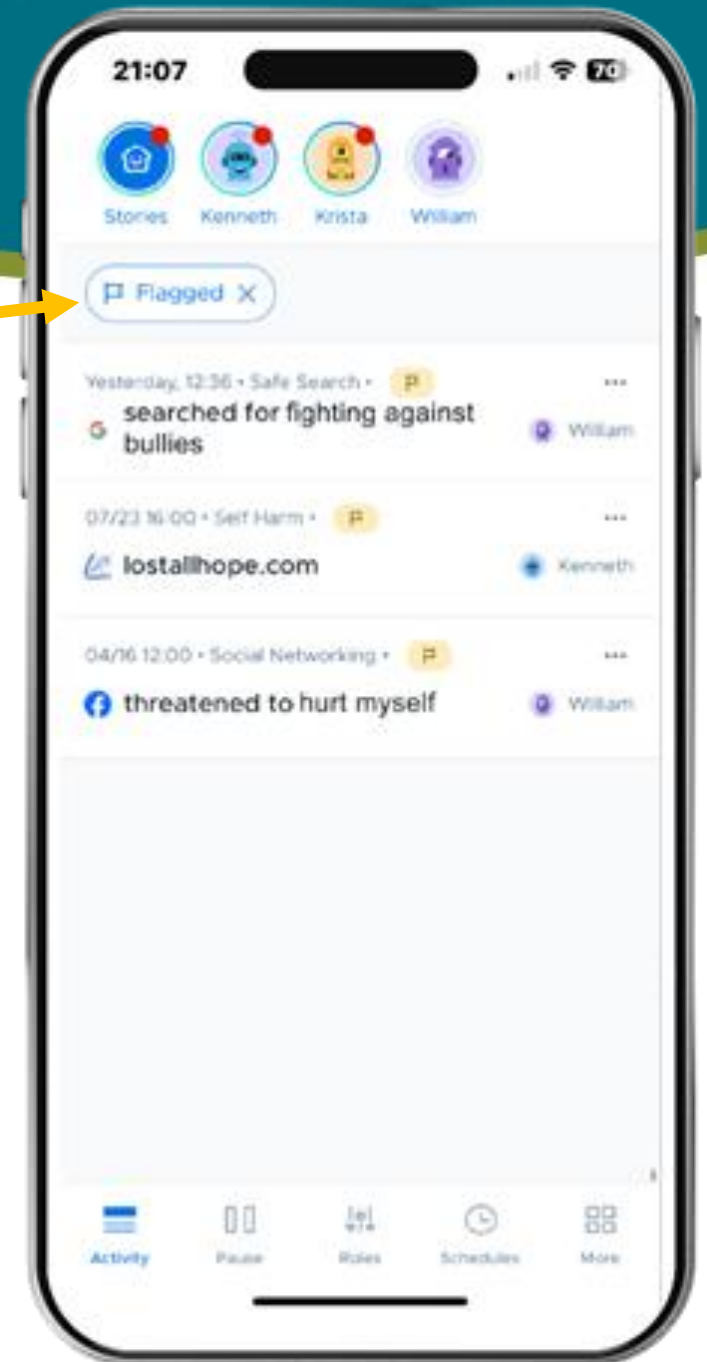

- Allows families to quickly see curated summaries of their child's recent online activity.
- Swipe left to advance and right to go back.
- If there is a lot of content to view, a link will appear at the bottom of the screen to view more.
- Updated daily at 4 pm (refresh page)

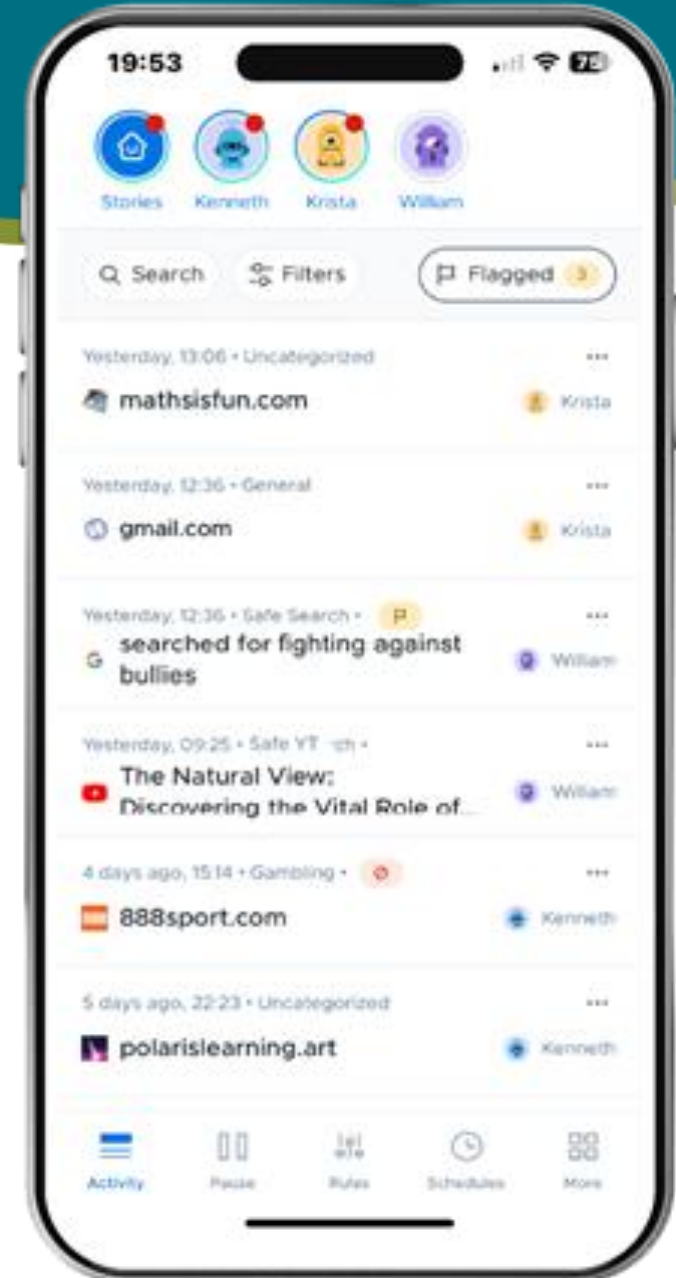

Flagged Activities:

- Shows a list of activities that the Securly AI flagged as indicative of self-harm or bullying.
- Gives parents a glimpse into potentially serious activities relating to their child's wellbeing.

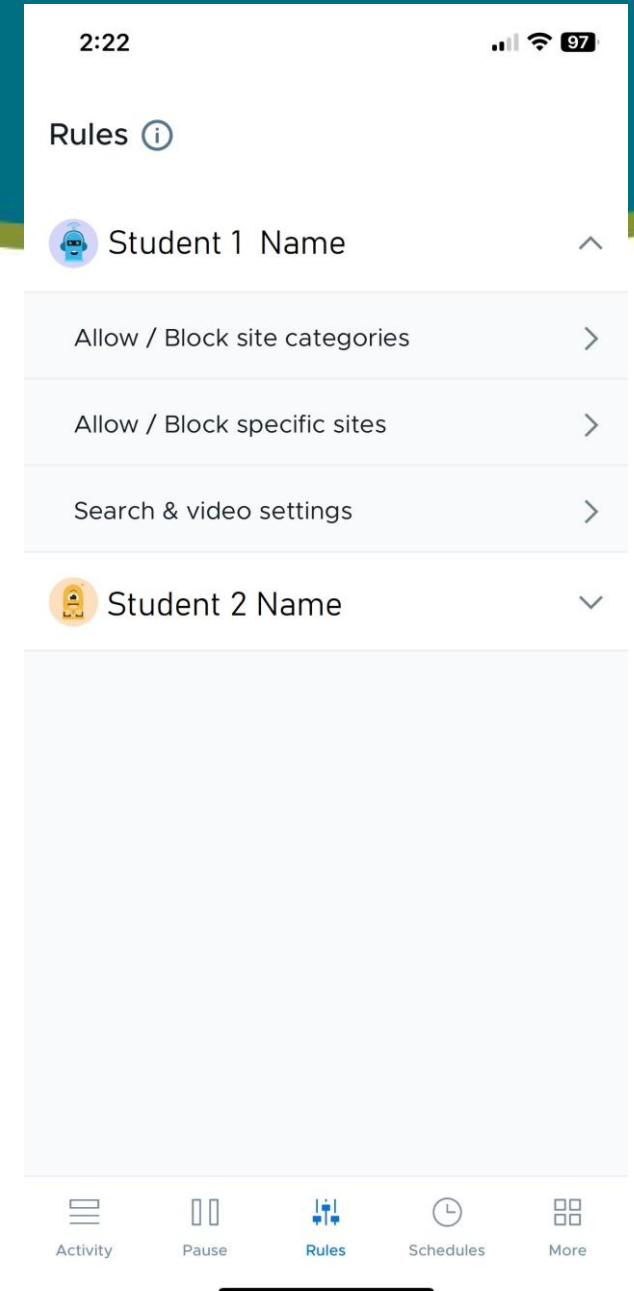

Activity Feed:

- Parents see an Activity Feed by default when they log in.
- The feed shows a child's online activity in real-time, starting with the most recent.
- Each activity displays the URL, content category, date, time, and the child's email.
- Parents with multiple kids can switch between them using the Filters button.
- The Filters button also allows displaying specific activity types.
- Parents can search for specific activities or websites using the Search button.

Rules:

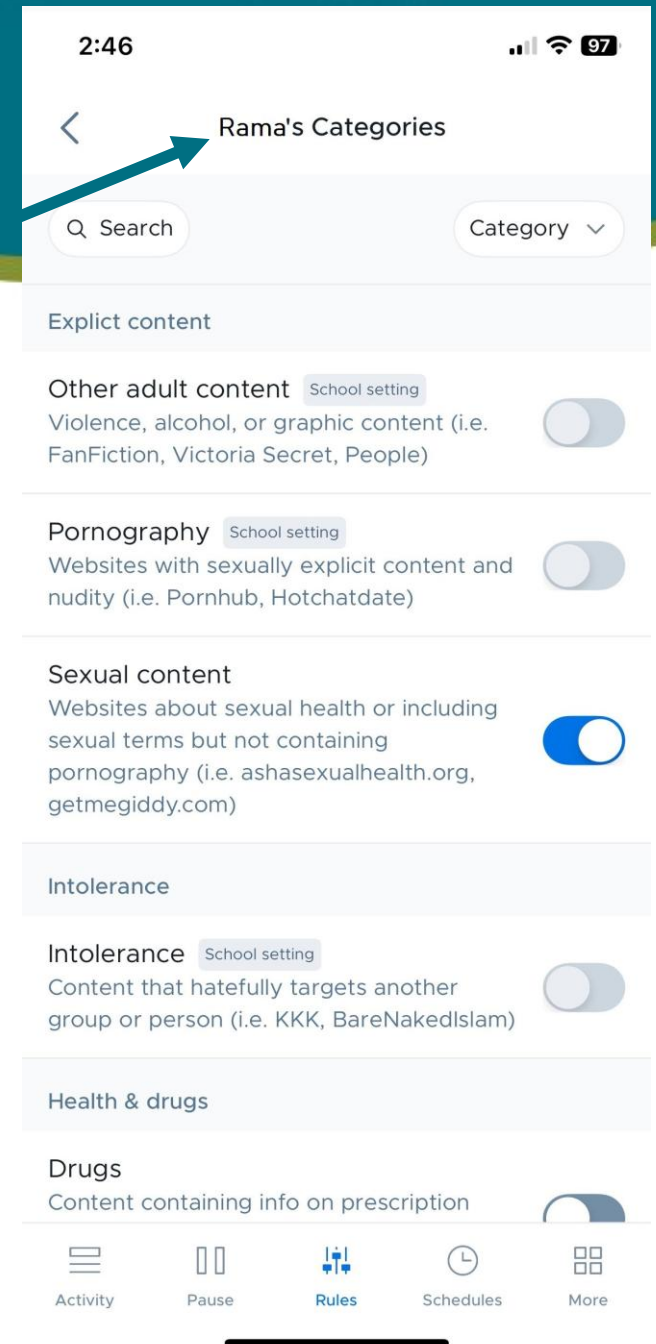

- The Rules section lets parents set rules for their child's school-issued devices. Including:
 - Site categories
 - Specific web sites
 - Set rules for Search and video settings

Rules:

Allow and Block site Categories feature:

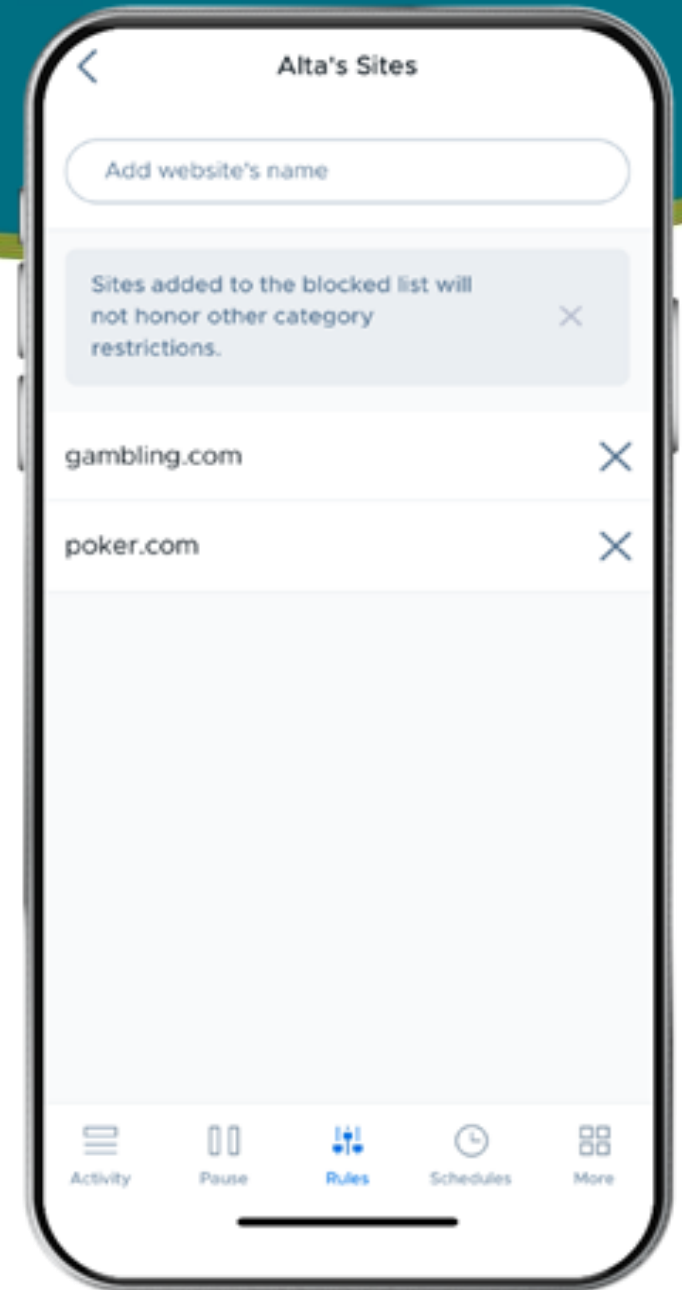

- Note – some categories have been locked by the school to always be blocked to prevent access.
 - If there is a site you are unable to block or have concerns about, please reach out to your school administrator (principal or assistant principal).
- The **Categories tab** allows parents to block or allow predefined categories with one tap.
- Sites in a blocked category will be inaccessible on the child's device at home.
- The Categories tab also offers settings for popular websites (e.g., Google Safe Search, YouTube Safe Video) to toggle on or off.

Rules:

Allow and Block specific site feature:

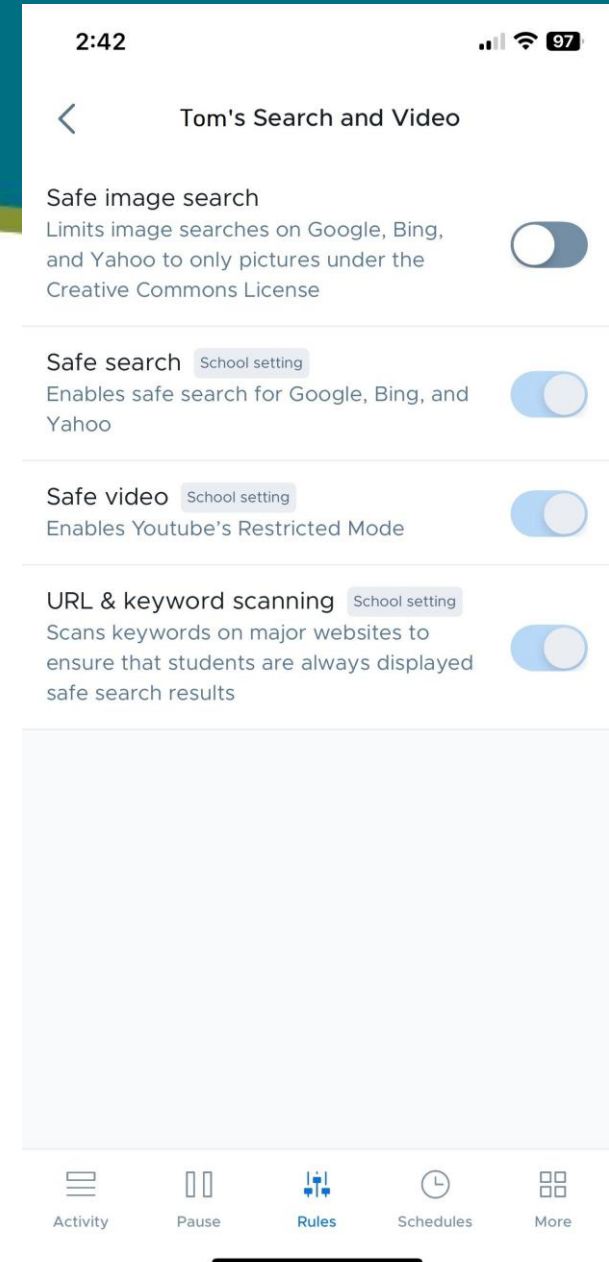

- The **Sites** tab allows parents to block specific websites.
- Families can add websites to be blocked by entering them in the top bar.
- Sites can be removed from the list by tapping the X icon beside the URL.

Rules:

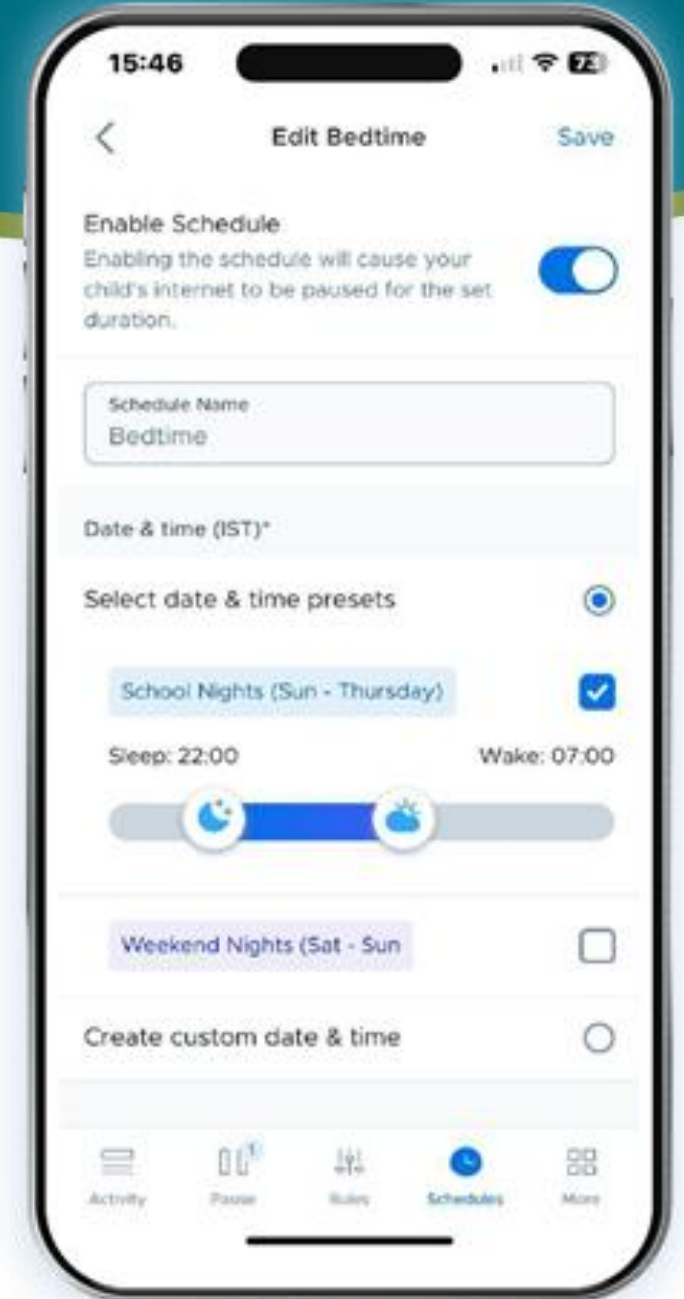

Search and video settings:

- ISD has turned on and enables safe search and video.
- ISD has turned on setting to scan keywords on major websites to ensure that students are always displayed safe search results.

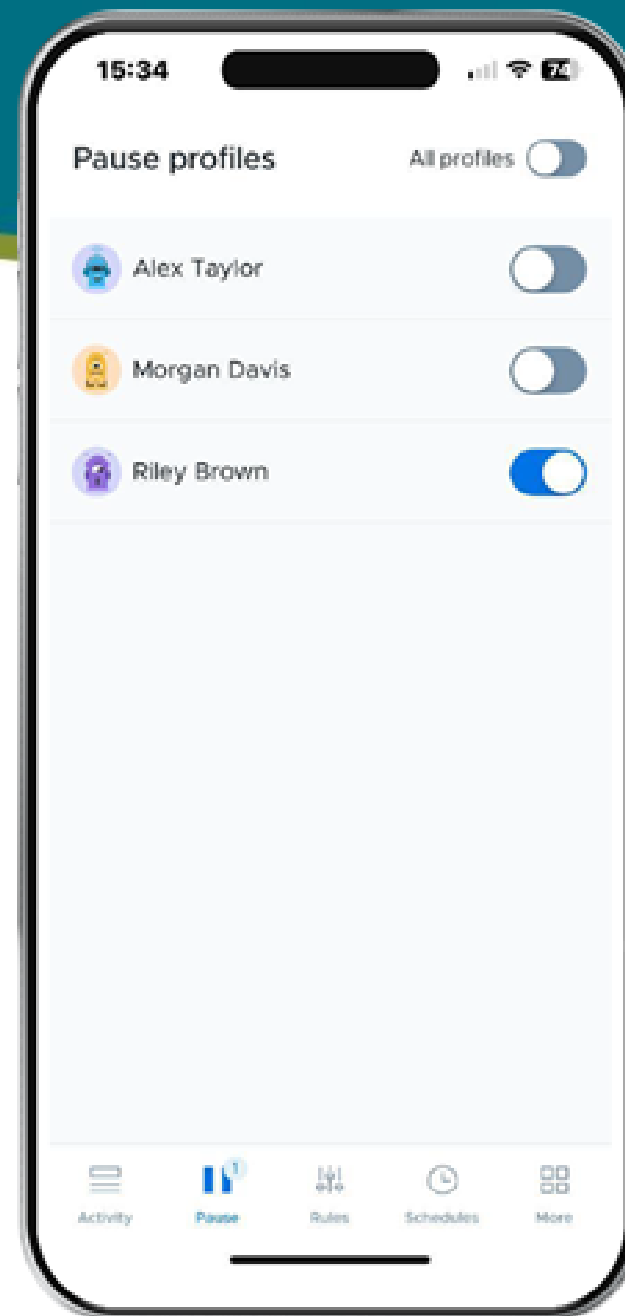

Setting Offline Schedules

- Feature allows parents to set times to disable internet access on their child's school-issued device.
- Feature can be used for bedtime or family time to encourage breaks from devices.
- The "Bedtime" setting allows parents to create a custom offline schedule.
- Parents can choose preset options for School Nights and Weekends or create a custom schedule.

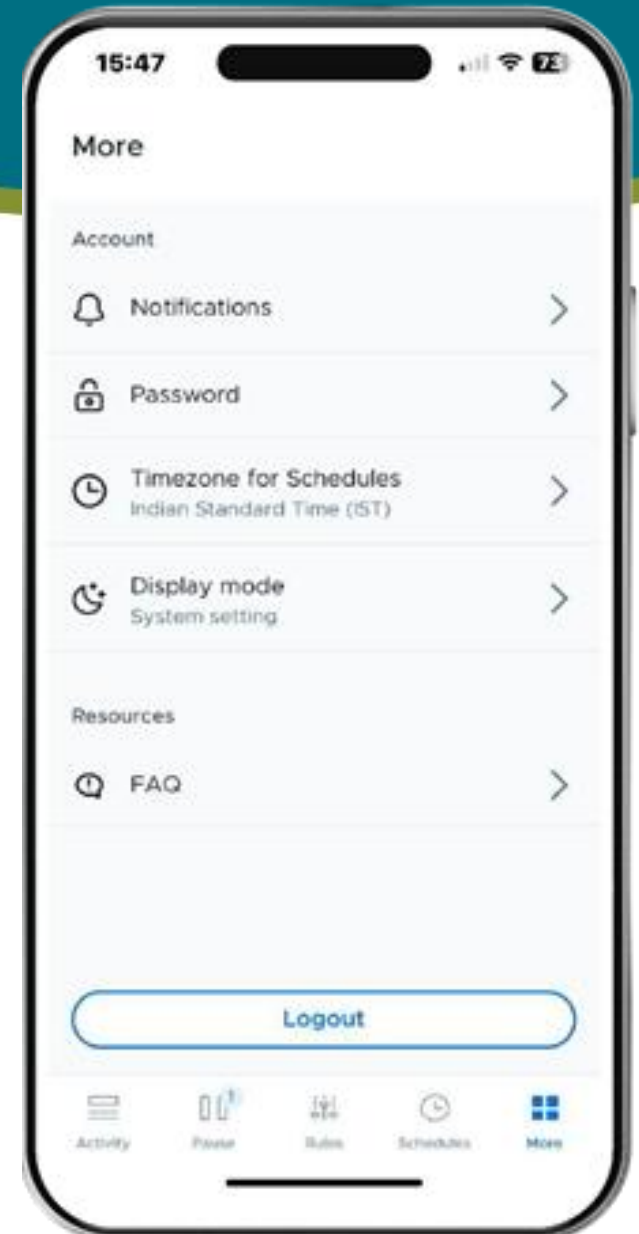

Pausing the internet

- **Pause Internet** allows parents to temporarily disable the internet on their child's school-issued device.
- Tapping "Pause" will bring up a list of users.
- To pause or unpaue the internet for a device, simply tap the toggle switch beside the child's name.
- Parents can also pause or unpaue all devices by toggling the "All profiles" button.
- Ask Erika if can be "Paused during school hours by parents (accidentally?)

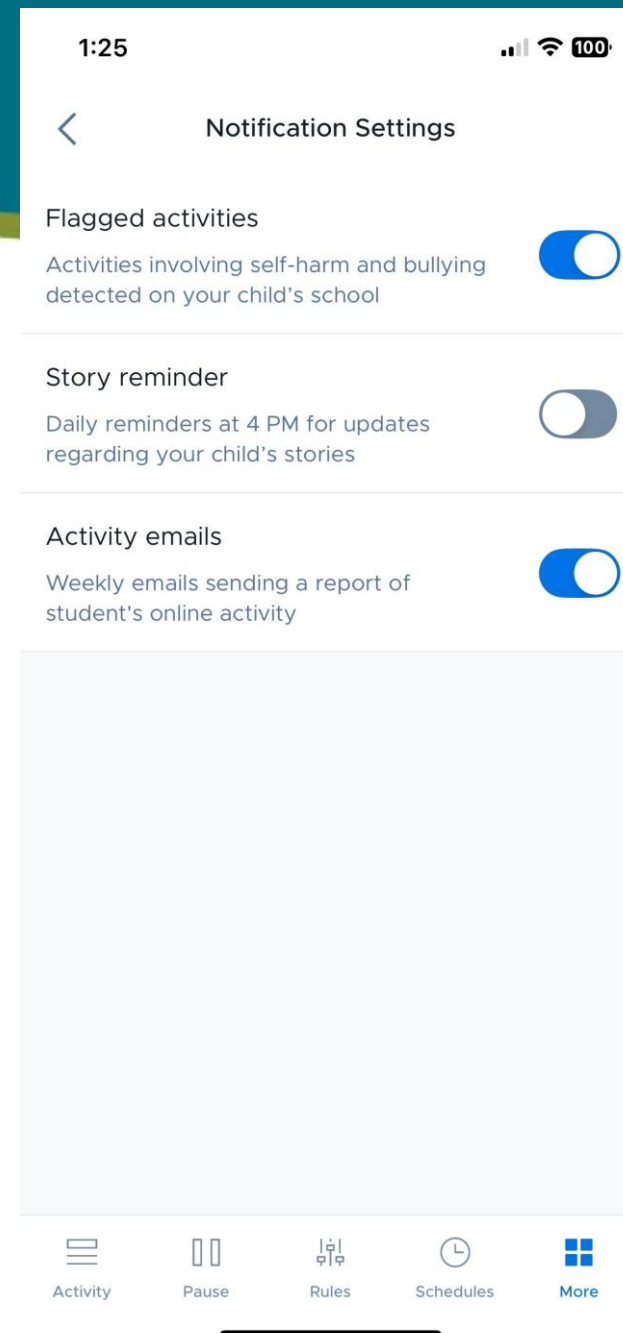

More Menu

- Tapping on "More" in the bottom right corner lets parents adjust settings for the Securly
- Home experience. This section includes the Account settings and resources.
- At the bottom of the menu, there's a button to log out as well.

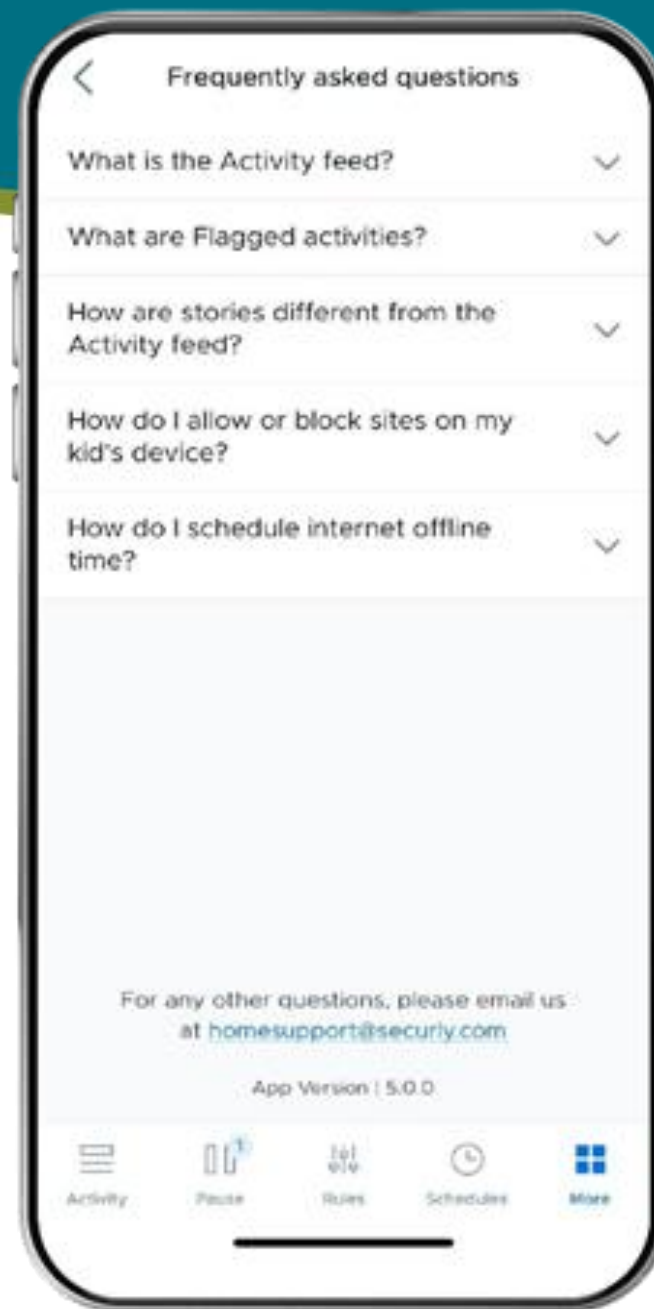

More: Notifications Settings

- Here parents can set the types of push notifications they wish to receive for different types of alerts.
- Enabling “Flagged Activities” notifications will push an alert to the parent’s device when activity indicating bullying or self-harm is detected on a child’s device.
- Enabling “Story reminder” notifications will push an alert to the parent’s device whenever there are new Stories available to view in the home app (Stories refresh at 4pm).
- Families can get a weekly email from Securly with report of student's online activity.

More: FAQs

- The FAQs page under the "Resources section" allows parents to see answers to frequently asked questions about the Securly Home app.
- Parents can also get support from Securly by tapping the email link provided at the bottom.
