

Use appropriate tools strategically.

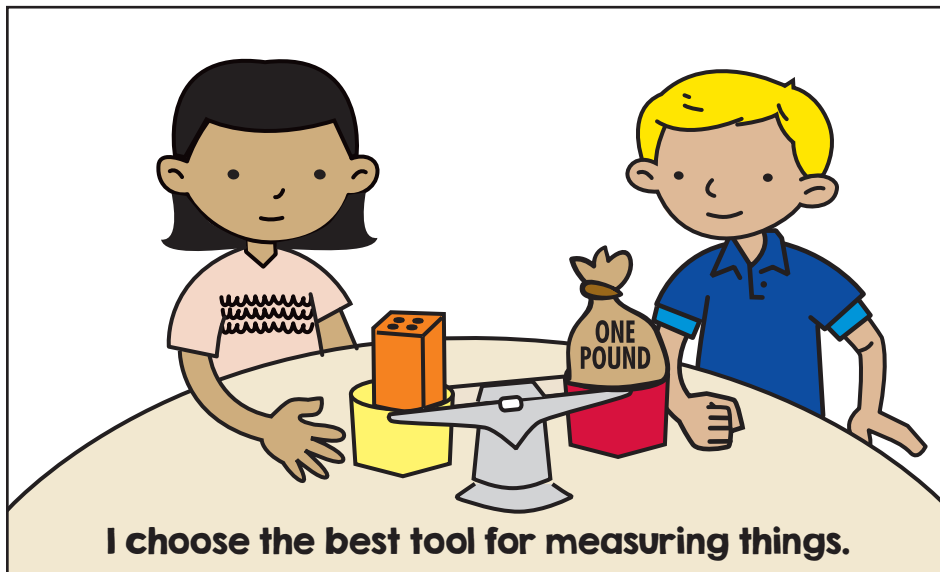

MP. 5

I can use math tools, pictures, and models to help solve problems.

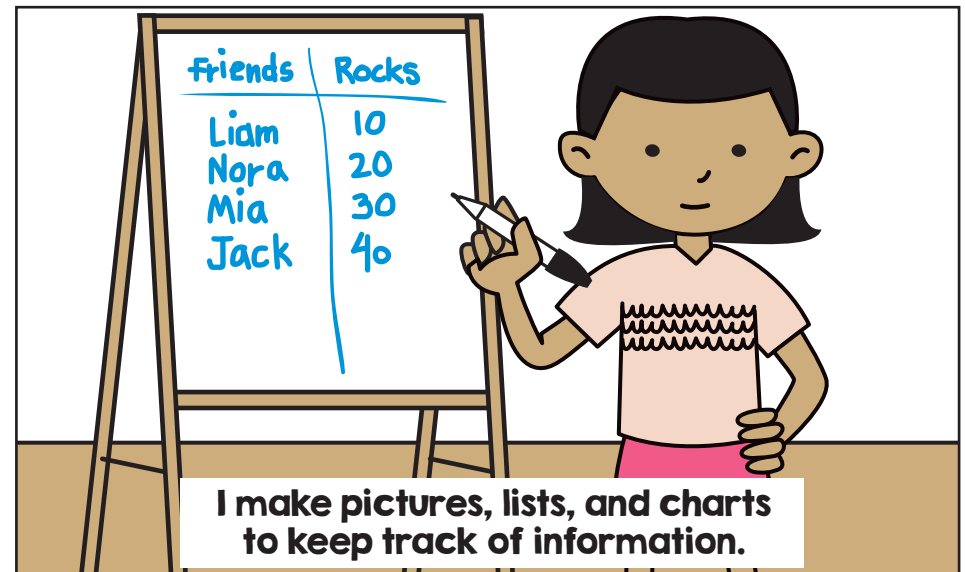

A girl is shown using various math tools. On a whiteboard, there is a number line from 0 to 40 with jumps of +10. On the desk, there is a base ten block train, a number grid, and a number line. The girl is holding a number grid.

I select from tools like the number rack, base ten pieces, number grids, and number lines.

A girl and a boy are sitting at a table. The girl is holding a balance scale. The boy is holding a bag labeled "ONE POUND". There are also some blocks on the table.

I choose the best tool for measuring things.

A girl is standing next to a whiteboard. She is writing on the board. The board has a table with the following information:

Friends	Rocks
Liam	10
Nora	20
Mia	30
Jack	40

I make pictures, lists, and charts to keep track of information.
