Career Enrichment Center

50th Anniversary

For 50 years, the CEC has trained career ready and college bound students, giving Albuquerque's youth access to classes in computer science, health science, world languages, animation, robotics, law, cosmetology, and more. Tens of thousands of students have started their life-long careers with a class at CEC and we are looking to preserve and celebrate that legacy this year.

At the heart of the CEC is the Early College Academy, an APS school of choice and tuition-free public school. These 200 students take courses for dual-credit with UNM, CNM, and IAIA and each student graduates with enough credit hours for a partial or complete college degree. The Class of '26 will be ECA's 20th graduating class and we invite you to celebrate the amazing achievement of 20 years of Early College Academy.
