

Superintendent's Report

September 2025

Updated BOE Goals

Academic Excellence

We will create individualized learning experiences while maintaining comparability in classroom instructional and assessment practices. We will utilize and foster a mastery of evolving technologies, design experiences that cultivate collaboration skills, support an appropriate balance between work and stress and develop a portrait of a graduate that enables all students to discover their greatest potential and be prepared to contribute to their community.

Inclusive and Engaging Culture, Climate, and Character

At all levels, we will cultivate a kind, safe, and supportive culture that exemplifies P.R.I.D.E.—Patience, Respect, Integrity, Dignity, and Empathy—ensuring all students thrive. Our learning environments will foster wellness, balance, and a deep appreciation for multiple perspectives, empowering students to navigate evolving challenges with confidence and compassion.

Connected Community

We will foster a strong, collaborative culture and make meaningful connections with all families and stakeholders, ensuring an inclusive and cooperative school community where every person feels valued and has a true sense of belonging. Through effective communication and deeper engagement, we will strengthen relationships among students, staff, families, and the broader community, ensuring that everyone feels heard, supported, and invested in our shared success.

Transparent and Efficient Operations

We will ensure that our facilities effectively support an excellent education for our students and provide enriching experiences for our community, all while maintaining fiscal responsibility and sustainability. Through thoughtful planning and long-term investment, we will create and maintain safe, innovative, and adaptable spaces that meet the evolving needs of our students and community for years to come.

Updated BOE Goals

Academic Excellence

- Secondary
 - SHS Portrait of a Graduate
 - Shifting to New York State Science Learning Standards (Earth & Space Science, Biology, Physics, & Chemistry)
