End of Year I-READY
GROWTH REPORTS

Directions:

Spend up to 1 hour exploring the slides.

Complete the Google Form.

Submit a Claim Form for 1 hour.

We finished our first year with i-Ready!

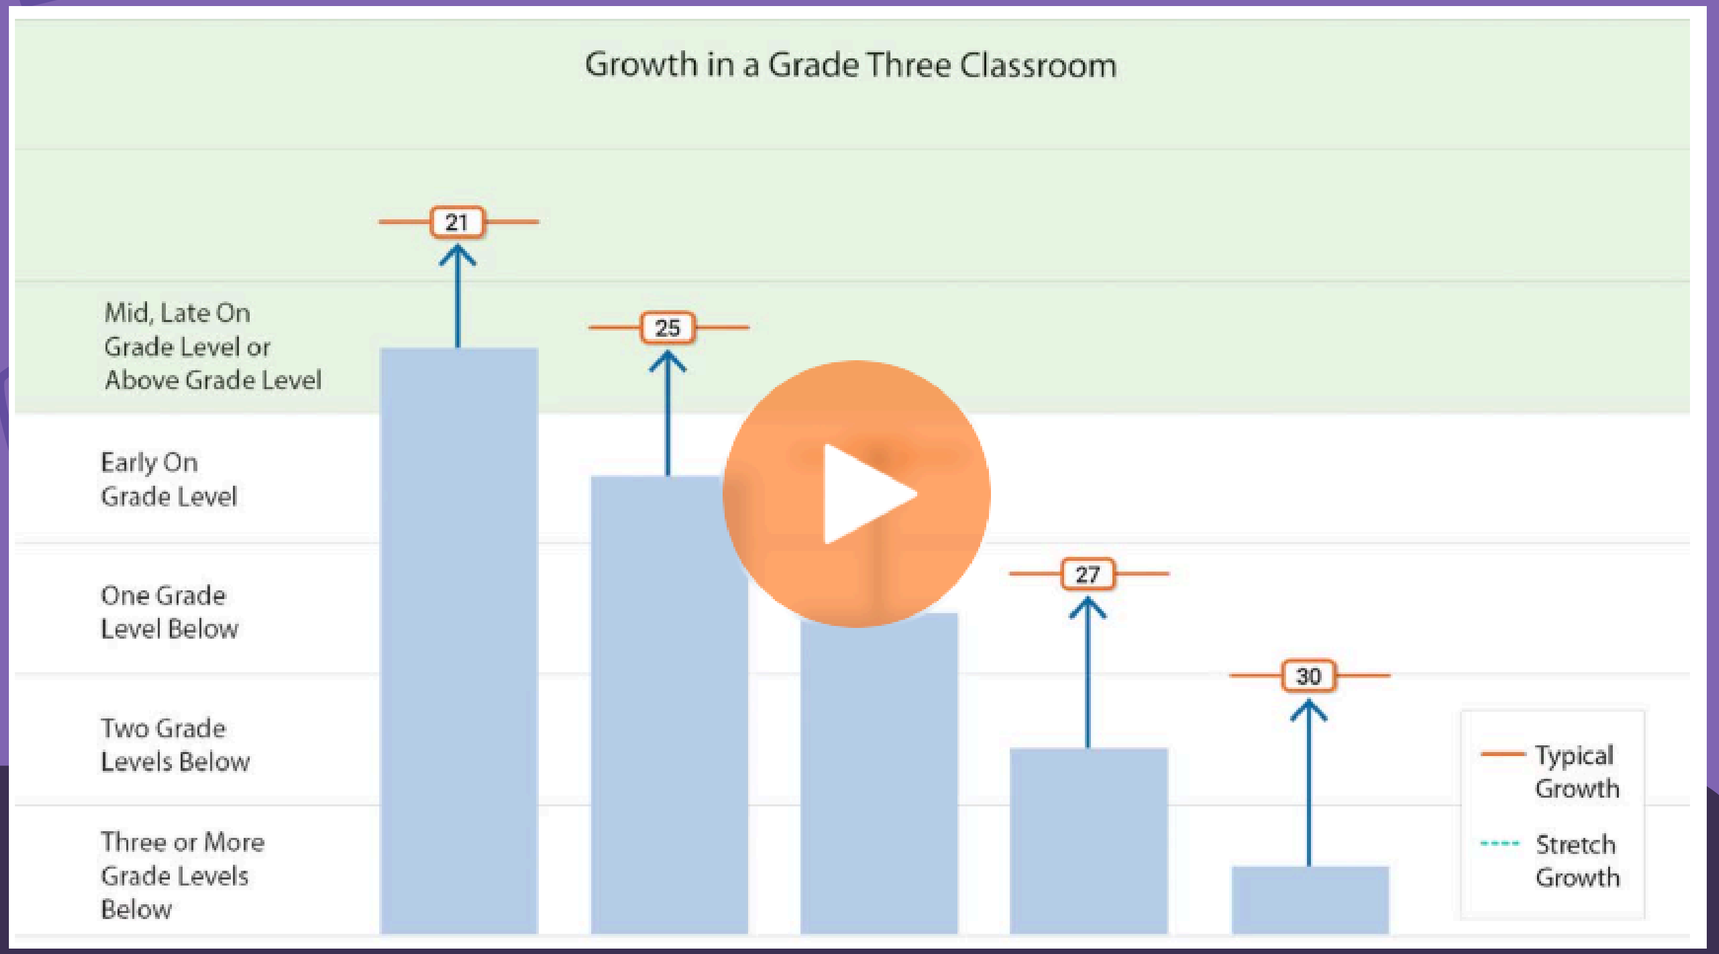

This is a great time to review the idea of typical annual growth in i-Ready and how those growth scores are set, along with the steps to using growth scores throughout the year while using data chats.

We can also dig deeper into the growth reports - these reports are great to bring to MTSS meetings, CSE meetings, or to use for parent-teacher conferences.

Spend time reflecting on your students' growth, explore the growth reports, consider how you might adjust your use of these reports and student-led data chats/worksheets for the next school year.

Learn More About Growth

Progress to Annual Typical Growth

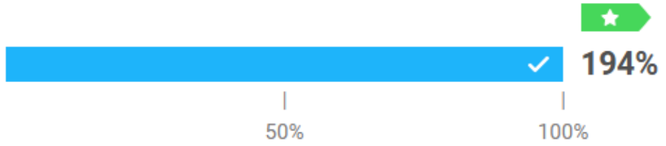

Scale Points: 70/20

This student has made 350% progress toward Annual Typical Growth. Typical Growth is the average annual growth for a student at this grade and placement level on their baseline Diagnostic.

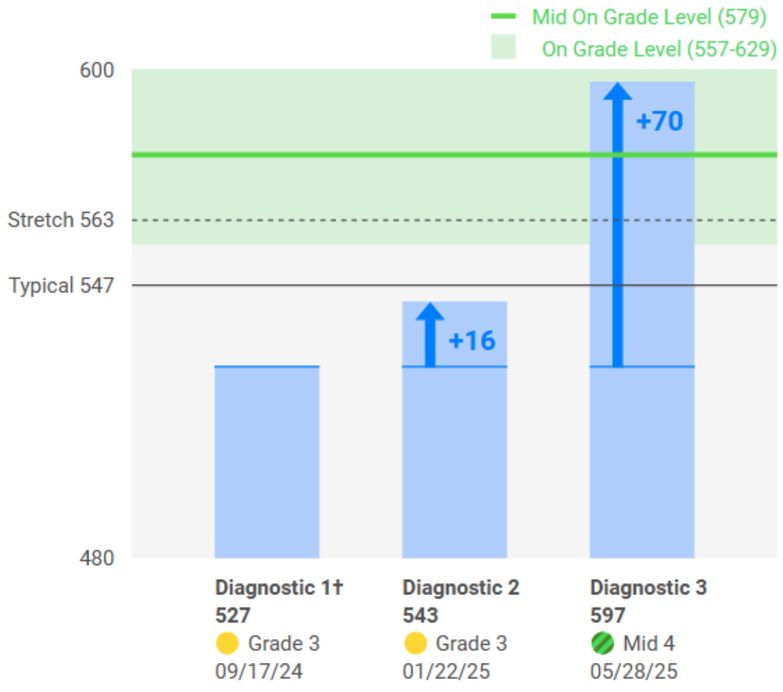

Progress to Annual Stretch Growth®

Scale Points: 70/36

This student has made 194% progress toward Stretch Growth. For students who are below grade level on their baseline Diagnostic, Stretch Growth is an ambitious, but attainable, level of annual growth that puts them on a path toward proficiency.

Overall Diagnostic Growth

†This Diagnostic is considered the baseline and is used to establish Growth Measures for this student.

Understand how i-Ready Measures Student Growth:

Every student is unique, and the path they take to achieve proficiency may be different. Rather than a “one size fits all” growth target, it’s important to focus on how much each student needs to grow to reach their goals for proficiency and to track their learning progress along the way. Determining the most appropriate amount of growth for every student can be time consuming. Based on research into the growth of millions of i-Ready students, i-Ready’s new growth model has done the work for you.

Guide Goal Setting and Communicate Broadly:

The key to setting goals is to make sure they are clear, positive, specific, measurable, and achievable:

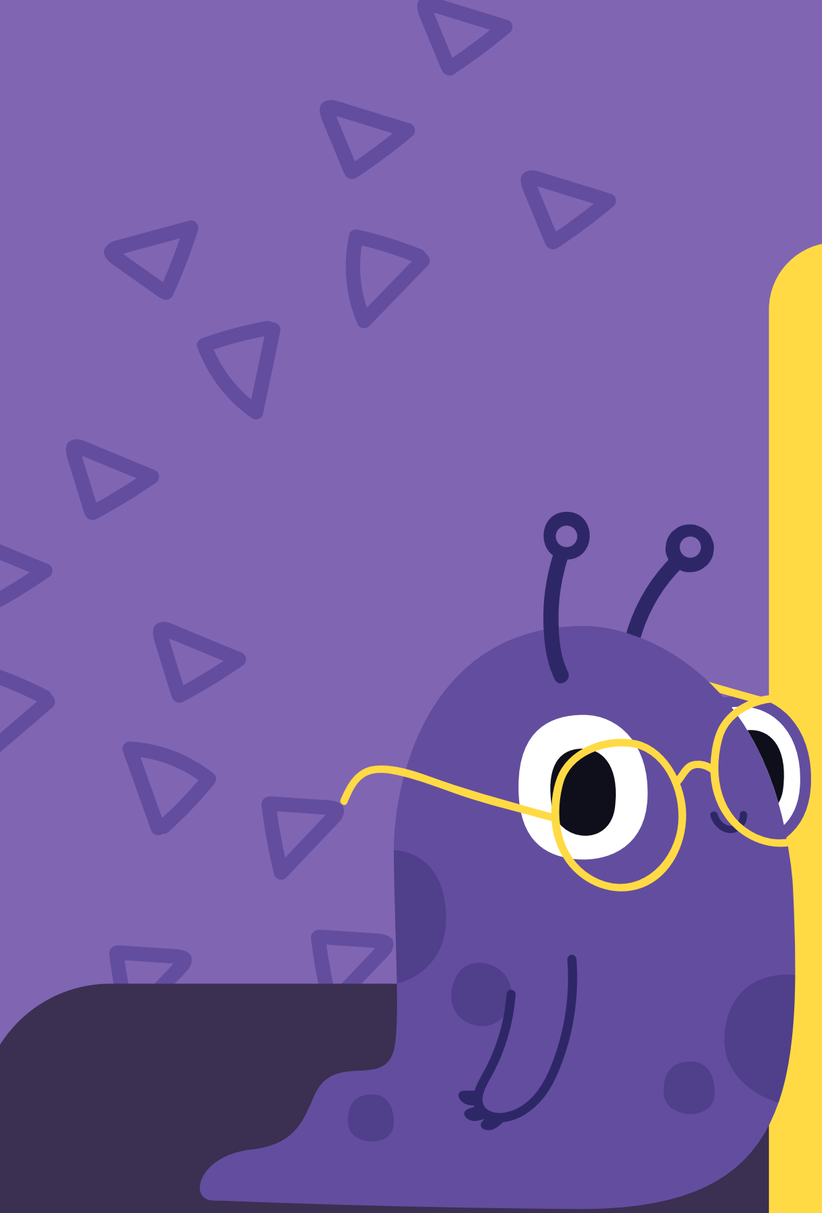

- **Focus on growth and learning to increase students' satisfaction in their progress and performance. Give them the opportunity to see what they are capable of achieving.**
- **Set collective goals, such as class or school goals, to keep individuals accountable to one another and help them grow as a team.**

Once you set your goals, communicate them broadly and ensure everyone understands what they are working to accomplish. Provide an opportunity for each person to play an important role to motivate the whole community to come together to reach it.

Tie Growth Goals to Learning Goals:

You can help students set goals for themselves that can include both performance and learning goals that promote specific habits and short- and long-term growth. Provide multiple opportunities to set goals and scaffold the goal-setting process to focus students and teachers to work toward improvement, reflect on their progress, and establish a growth mindset. Use differentiated Typical Growth and Stretch Growth measures to help you guide students to set challenging yet achievable goals.

Make Plans to Help You Achieve Your Goals:

After you set your goals, create action plans and commit to them together. Encourage students and teachers to think about the steps they need to take along the way, including:

- Consider obstacles that could prevent them from achieving their goals.
- Align your resources to ensure everyone has the tools they need to reach their goals.
- Use data to differentiate instruction and schedule time for teacher-led small group instruction and Online Instruction.
- Give students an opportunity to focus on the growth goals they defined. Have regular data chats with students, teachers, and parents to identify strengths and areas for growth and revise goals.
