

Senior Education Policies

ICT Use by Pupils and Staff

The School has the following policies, which should be referred to for any query around the use of technology for pupils or staff:

- Artificial Intelligence Policy
- Bring Your Own Device Policy
- Data Breach and Data Protection policies
- Comprehensive ICT policy on use of the Internet and email protocols. Pupils are required to comply with those policies on Internet and email use and parents' countersignature is required before use is made of the facilities
- Staff Acceptable Use Policy and Agreement

All of the above policies may be found in the Handbooks and Policies Shared Drive.

Any pupil in contravention of these rules can expect to be banned from use of the network and receive a School Detention. If illegal or unacceptable material is accessed or cyberbullying takes place, the relevant authorities will be informed, in line with the school's Anti-bullying Policy.
