

## Digital Learning Initiative Goals

- Ensure that all students are college and/or career ready
- Increase student engagement
- Transform teaching and learning in the classroom
- Ensure equitable access to digital tools and resources for blended learning opportunities

## What is a Google Chromebook?

- Similar to a Netbook
- Designed to access the web and its wealth of resources
- Full Sized Keyboard
- Large Display
- Clickable Trackpad
- Chrome OS which is similar to the Chrome web browser
- Wi-Fi Accessible
- 8 Hours of Battery Life

## 1:1 Student Expectations

- Look after my Chromebook very carefully at all times
- Chromebooks will never be left unattended
- Chromebooks must be situated securely on the working surface
- Make sure the Chromebook is not subject to careless or malicious damage (i.e. as a result of horseplay)
- Take care when the Chromebook is transported that it is as secure as possible. Chromebooks **MUST** be carried in its protective case, using shoulder strap at all times.
- Carry Chromebook in the closed position with two hands.

## 1:1 Parent Expectations

- Monitor student Internet and social media website use at home
- Contact teacher who has assigned the project if any questions or concerns arise.
- Parents/Guardians are encouraged to obtain their child's log-in and password in order to monitor the student's computer usage at home. If parents have any difficulties receiving their password, they should contact their student's Library Media Specialist or main office.
- If the damage is deliberate, willful or purposeful, the parents or guardian will pay the full repair/ replacement cost of the Chromebook, protective sleeve and/or AC power adapter. Replacement cost for the chrome book would be approximately \$300.00

## Acceptable Use Policy (AUP)

- Students are responsible for good behavior on school computer networks just as they are in a classroom or a school hallway. General school and district rules for behavior and communications apply.
- The network is provided for students to conduct research. Individual users of the district computer networks are responsible for their behavior and communications over those networks. Users will comply with the standards established by the district. Also, the district has purchased software for Internet content filtering.
- The system coordinator and network administrators may review files and communications to maintain system integrity and insure that users are using the system responsibly. **Users should have no expectations of privacy in their electronic files stored on Fairfield County School District network and/or devices.**

# FCSD is going DIGITAL!!!

1:1 TECHNOLOGY ACCESS	
<b>CD – 1st</b>	Access to handheld mobile devices and computers for in school use
