OREGON HEALTH AUTHORITY

School-Based Health Centers 2025 Status Update

About Oregon School-Based Health Centers (SBHCs):

SBHCs are clinics located in schools or on school grounds. They are a vital community resource with a youth-centered model. SBHCs support young people's health and well-being. Oregon SBHCs provide medical care, behavioral health[1] services and dental care. These easily accessible services support youth to grow, learn and thrive.

SBHCs have existed in Oregon since 1986. They succeed through public-private partnerships between:

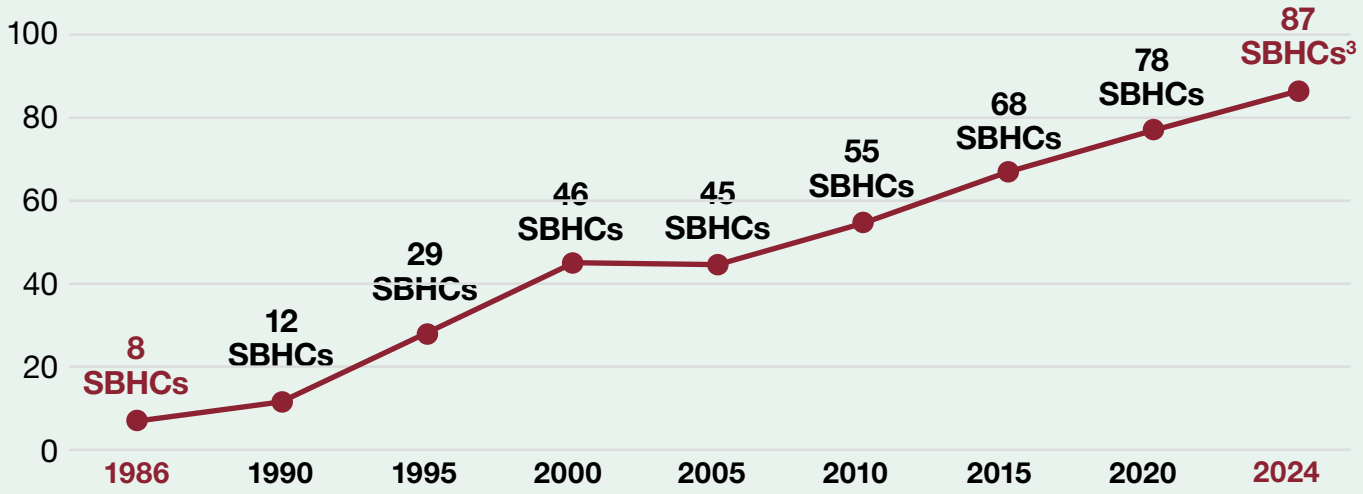

- The Oregon Health Authority – Public Health Division
- School districts and education service districts
- Local public health authorities
- Health care providers
- Parents and caregivers
- Students, and
- Community members.

SBHCs provide services in person. In some cases, they also provide services by phone or video (telehealth). By providing easy access to health care, SBHCs reduce barriers that keep students from seeking the health services they need.

Oregon SBHCs commonly provide[2]:

- Well-child exams
- Sick visits
- Minor injury treatment
- Vision, dental and other health screenings
- Immunizations
- Substance use screening and assessment
- Mental health counseling
- Reproductive health services
- Prevention and wellness messaging
- Health-related classroom presentations

Number of SBHCs over time (1986-present)

Source: Oregon SBHC State Program Office.

[1] Behavioral health is used in this report to express:
- Mental health
- Integrated behavioral health
- Substance use treatment, and
- Other services designed to support mental or emotional wellness.

[2] Service provision varies by SBHC.

[3] Number as of July 1, 2024.

SBHC fast facts from the 2024–2025 service year

As of July 1, 2024, there are:

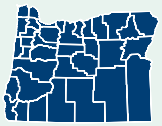

87 State-certified SBHCs in 28 counties

Types of schools

- **53** high schools
- **6** middle schools
- **12** elementary schools
- **16** combined-grade campuses

SBHCs by geographic location

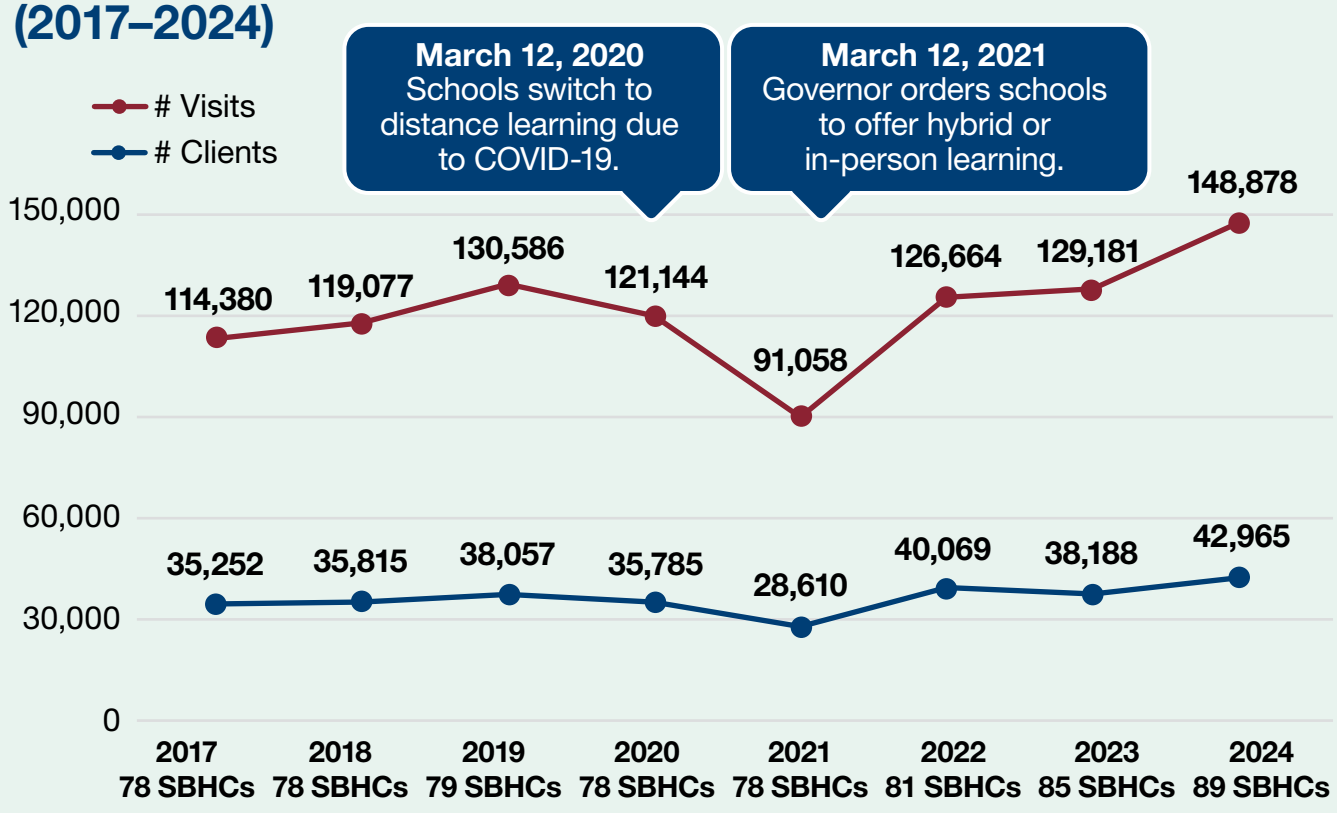

- **41** Urban
- **41** Rural
- **5** Frontier

66% are in primary care health provider shortage areas (HPSAs)

All SBHCs are sponsored by a medical entity:

- 74% are federally qualified health centers (FQHCs)
- 3% are certified rural health clinics (RHCs)
- 44% are state recognized patient-centered primary care homes (PCPCH)

Number of SBHC visits and clients, school years ending (2017–2024)

Source: Oregon SBHC encounter data.

SBHCs in the 2023–2024 service year

Unless otherwise noted, all statistics are from Oregon SBHC encounter data[4] for the 2023–2024 service year (July 1, 2023–June 30, 2024).

SBHCs provided **148,878 visits** for **42,965 clients**

73,735 school-aged youth (5–21 years) had access to an SBHC at their school[5]

97% of SBHCs had a behavioral health provider onsite

9% of SBHCs had a dental provider onsite

> *My parents work and it is hard for them to get time off. They are very happy to have the clinic here.*
>
> – Student

> *Coming to the Health Center is always really pleasant and I always get what I need. It is a really positive environment and truly is a safe space.*
>
> – Student

[4] Oregon-certified SBHCs are required to submit visit and encounter data to the SBHC State Program Office (SPO) at least two times per year.

[5] Oregon Department of Education. Student Enrollment Report 2023–2024 [Internet]. 2024. Available from: https://www.oregon.gov/ode/reports-and-data/students/Pages/default.aspx

SBHCs support access for school-aged youth

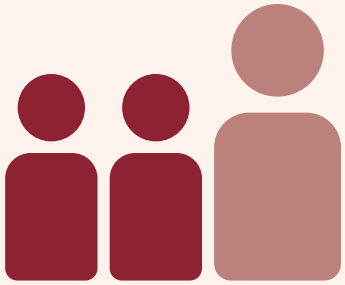

State-certified SBHCs are required, at minimum, to serve students at SBHC host schools. However, many SBHCs elect to expand their services to include:

- Students within the district
- Siblings
- Teachers and staff
- Parents and caregivers, and
- The broader community

The decision to serve populations beyond the host school is made locally.

Of those served:

- 71% of clients were school-aged youth
- School-aged clients accessed the SBHC about 3.6 times per year on average

2 out of 3 clients were between the ages of 5 and 21

- **20%** of clients were aged 5–11
- **51%** of clients were aged 12–21

The following chart provides summary data on clients and visits for all ages vs. school-aged (5–21 years) clients.

	All ages	School-aged (5–21 years)
Number of clients	42,965	30,393
Number of visits	148,878	109,575
Behavioral health visits	56,047	51,427
Telehealth visits	9,483	4,353

Source: Oregon SBHC encounter data.

SBHC State Program Office (SPO) recently began collecting data on SBHC client school enrollment. This is not a reporting requirement for state-certified SBHCs, so data are incomplete. However, during the 2023-2024 service year, SPO received enrollment data from 64 SBHCs. These data revealed the wide reach of SBHCs across communities:

- Youth clients of these **64 SBHCs** came from **696** schools, including youth from public, virtual, charter, alternative, private and home schools.

SBHCs services via telehealth

Telehealth is the use of electronic and telecommunication technologies to deliver health care services to clients. Telehealth data for SBHCs includes services to clients by health care providers located outside of SBHCs.

Percent of SBHC visits via telehealth, school years ending 2020–2024

- 2020: **9%**
- 2021: **33%**
- 2022: **16%**
- 2023: **10%**
- 2024: **6%**

Telehealth: Physical health

58% of SBHCs delivered physical health via telehealth

6% of physical health visits were via telehealth

Telehealth: Behavioral health

65% of SBHCs delivered behavioral health via telehealth

7% of behavioral health visits were via telehealth

SBHCs help advance the Oregon Health Authority's goal of eliminating health inequities by 2030. SBHCs are a trusted source of care for many youths who belong to communities disproportionately affected by health inequities.

In 17 SBHCs, more than half of the youth clients were African American or Black, American Indian or Alaska Native, Asian, Hispanic or Latino, Latina, Latinx, Native Hawaiian or other Pacific Islander, or other youth of color.

40% of SBHC school-aged clients identified as youth of color.

SBHC school-aged clients reported speaking

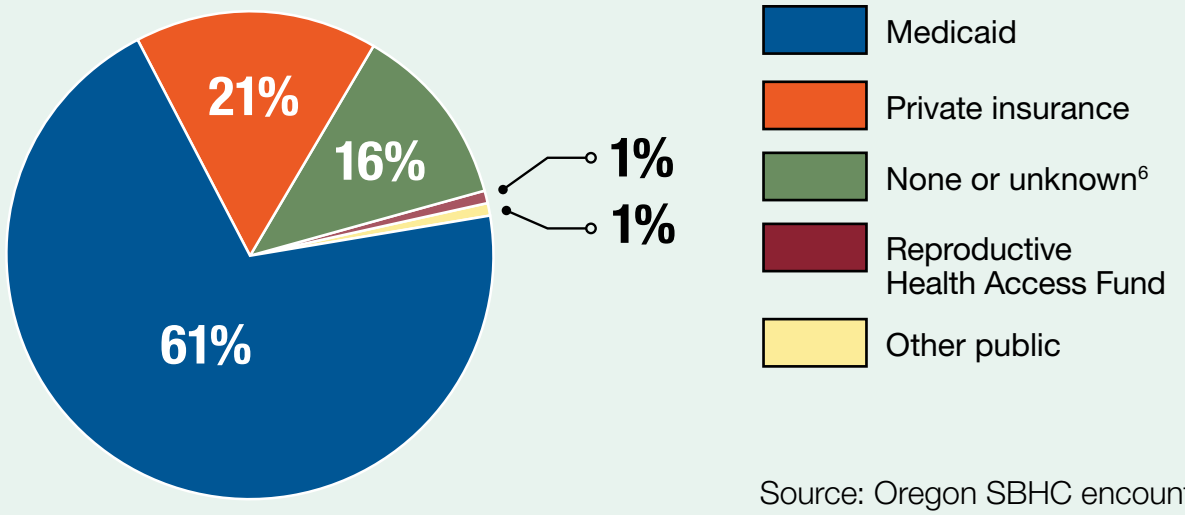

80 languages:

76% English
18% Spanish
0.5% Vietnamese
0.3% Russian
3% Other languages
3% Unknown or declined

School-aged clients who received services were:

- **6% African American or Black**
- **3% American Indian or Alaska Native**
- **4% Asian**
- **27% Hispanic or Latino, Latina, Latinx**
- **2% Native Hawaiian or other Pacific Islander**
- **62% White**
- **43% White alone, non-Hispanic**
- **12% Unknown race and ethnicity**

Payment source for SBHC school-aged clients at the first visit, 2023–2024

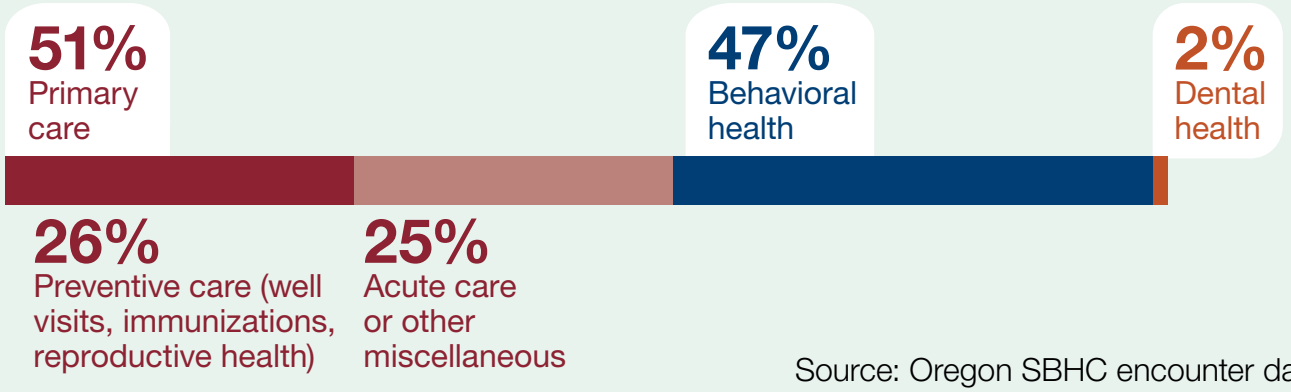

Source: Oregon SBHC encounter data.

[6] "None or unknown" categories include some clients who have insurance. However, that information is not captured in the data for a few reasons:

- It is not a billable visit
- It is a confidential visit, so insurance is not billed, or
- The student does not know or give evidence of their insurance.

Reasons for SBHC visit among school-aged youth, 2023–2024

Source: Oregon SBHC encounter data.

SBHC school-aged clients had 3.6 visits per year on average.

33% of school-aged clients received an immunization.

45% of school-aged clients received a well visit.

72% of SBHCs reported supplying at least one type of contraceptive on-site. Condoms, injectables, and long-acting reversible contraceptives were the most common forms.

SBHCs that dispense contraceptives are in **25** counties, in urban, rural and frontier areas.

61% of SBHCs provide long-acting reversible contraceptives (implants and intrauterine device (IUD) or intrauterine system (IUS)) onsite.

Oral health is an important part of overall health and well-being. SBHCs can help serve as oral health care access points for school-aged youth.

9% of SBHCs have a dental provider onsite.

2,052 dental visits were provided to **1,298 school-aged clients.**

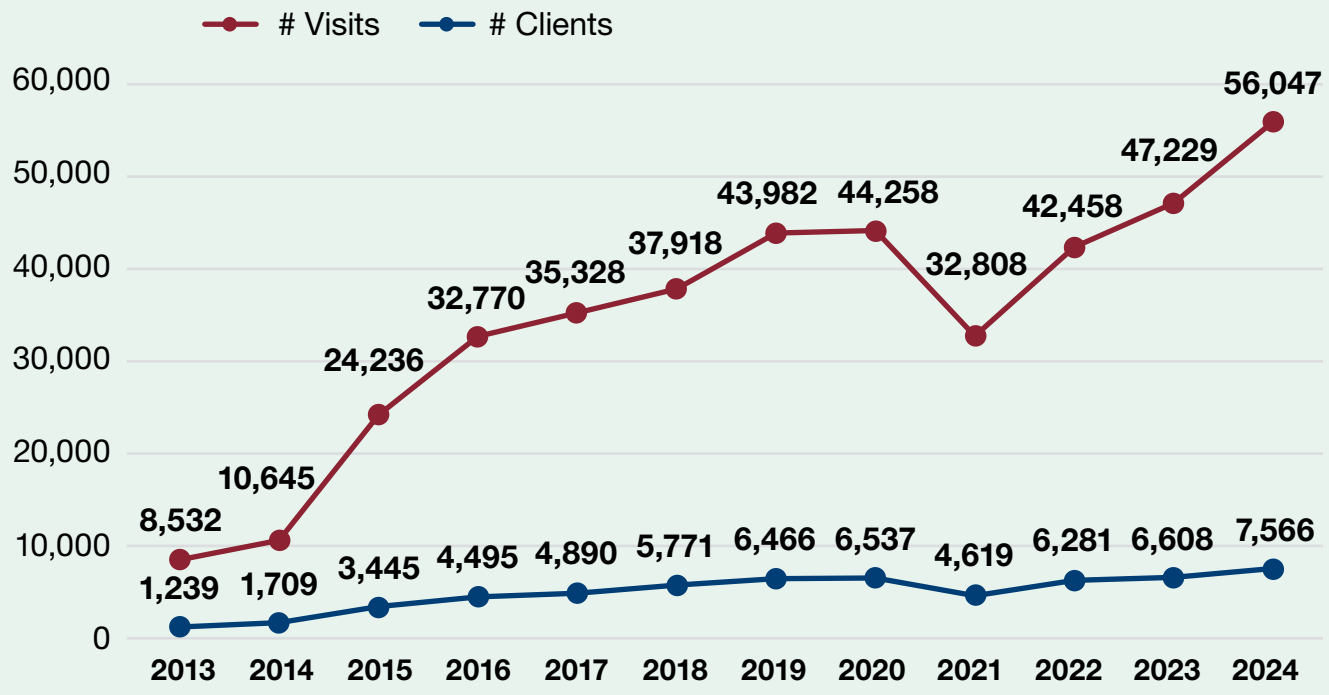

Oregon SBHCs support the integration of behavioral health care and primary care. This provides youth the option to access collaborative care all in one place.

SBHCs provided 51,427 behavioral health visits to school-aged clients.

- **6,475** school-aged clients had a behavioral health visit.
- SBHC school-aged clients who saw a behavioral health provider had **7.9 visits per year** on average.
- **52%** of school-aged clients who saw a behavioral health provider also had a physical health visit at the SBHC.
- **28%** of school-aged clients who saw a behavioral health provider also had a well visit at the SBHC.

> *My mental health therapist understands me and helps me find new strategies to understand my emotions. I know if I ever need anything I can give them a call.*
>
> – Student

SBHC trends in the number of behavioral health visits and clients, all ages, school years ending 2013–2024

Source: Oregon SBHC encounter data.

SBHC Standards for Certification Revision

SBHC Standards for Certification were first developed in 2000 in partnership with:

- The Oregon School-Based Health Alliance
- The Conference of Local Health Officials, and
- Staff representing Oregon SBHCs.

The Standards outline minimum operating requirements for Oregon state-certified SBHCs. SBHC Standards for Certification:

- Establish a clearly defined SBHC model for Oregon
- Reduce site-to-site variability
- Improve SBHC sustainability, and
- Increase the availability of quality health care for children and adolescents.

State SBHC certification is voluntary; an SBHC may choose not to take part in state certification and still operate independently. However, only state-certified SBHCs are eligible to get grant funding from the Oregon Health Authority per OAR 333-028-0260.

The Oregon SBHC Standards for Certification were last revised in 2016. In 2022, the School-Based Health Center State Program Office (SPO) began a multi-year process to update SBHC Standards for Certification, Version 4, with the following goals in mind:

- Identify and address areas in need of clarification.
- Revise requirements to align with current best practices.
- Continue to adapt the Standards to center health equity and youth engagement.

Beginning in Fall 2022, SPO conducted extensive background research to better understand current best practice recommendations for high-quality, youth-centered care. SPO's research focused on:

- Clinical guidance from state and national organizations such as the American Academy of Pediatrics, National Council for Wellbeing, Substance Abuse and Mental Health Services Administration, and Centers for Disease Control and Prevention, among others
- SBHC standards from other states
- Policy briefs, prioritizing feedback from youth from rural areas, youth identifying as LGBTQIA2S+, and youth of color, and
- Youth-centered clinical care guidance.

SPO then convened a small internal workgroup and conducted one-on-one interviews with OHA programs and other partner agencies. This was to identify areas of alignment and reduce duplication in program requirements. SPO also held a series of listening sessions with youth across Oregon. The findings were summarized in the 2024 SBHC Status Update.

Finally, SPO surveyed currently certified SBHCs to better understand their level of support for the proposed changes and how ready their SBHC would be to meet these updated requirements.

This background research took over a year to complete. It was critical in reshaping Oregon's certification model. SPO used this background information to draft:

- SBHC Program values, and
- An initial version of SBHC Standards for Certification, Version 5

Oregon SBHC Program Values:

- Accessible
- Responsive
- Accountable
- Youth-centered
- Quality
- Comprehensive
- Integrated
- Collaborative

In Fall 2023, SPO convened an SBHC Standards for Certification Review Workgroup to provide feedback on the standards draft. The Standards Review Workgroup was made up of approximately 20 SBHC staff from across Oregon representing:

- SBHC medical sponsors (FQHCs, rural health clinics, and hospital systems)
- SBHC behavioral health sponsoring agencies
- Providers
- Local Public Health Authorities
- Urban, rural, and frontier clinics, and
- Patient-centered primary care clinics.

The group held eight 2-hour meetings in Spring 2024 to produce an updated draft of SBHC standards. At the same time, SPO convened an External Partner Advisory Committee to give high-level feedback to align SBHCs with broader health and education system initiatives.

> ***These changes will allow easier compliance for SBHCs to maintain Best Practice Standards even in smaller school districts. This creates more equity and access for all.***
>
> – SBHC site coordinator

In September 2024, SPO released the final SBHC Standards for Certification, Version 5. This version of the standards goes into effect July 1, 2026. That gives certified SBHCs two years to fully comply. In the coming years, SPO will work to provide training and technical assistance and develop new systems for monitoring compliance with the revised standards.

SPO thanks everyone who took part in the SBHC Standards for Certification review process. Your thoughtful feedback and commitment strengthened these requirements. SPO looks forward to continuing working with you all to ensure Oregon youth have access to high-quality, youth-centered care.

Youth Voice

Twenty-three years ago, the Oregon SBHC State Program Office (SPO) began administering an annual Student Satisfaction Survey designed to measure:

- Student satisfaction with services
- Access
- Number of missed classes, and
- Receipt of prevention messages.

Results year after year indicated SBHC clients had:

- High levels of satisfaction with services
- An increased likelihood of accessing care
- Decreased time missed from school for health care reasons, and
- A likelihood of having received one or more prevention messages.

> *Youth opinions are important because they provide insight into the needs of young people. Understanding youth needs is essential; it is the first step in shaping clinic settings and services to be more youth-friendly and welcoming. The youth and healthcare providers can develop trust through the ability to provide feedback and observe changes, which increases the likelihood that the youth will seek help. Youth and clinic partnerships assist staff in receiving impactful feedback and stronger engagement. Giving young people a voice and an opportunity to do so is important because it helps youth feel in control of their health decisions and teaches them how to stand up for themselves when something is wrong.*
>
> Adolescent & School Health Program Youth Intern

In recent years, SPO consistently received feedback that the Student Satisfaction Survey had increased in length and complexity. This made it challenging for clinics to administer and meet the annual sample size requirements. The survey also had limited flexibility for SBHCs to gather site-specific client data. Further, the small number of surveys collected at each SBHC made it challenging for SBHCs to generalize survey results to their SBHC population.

In the 2023-2024 school year collection period, SPO no longer required SBHCs to administer the Student Satisfaction Survey. For the 2026-2027 school year and beyond, the SBHC Standards for Certification, Version 5 requires all state-certified SBHCs to routinely gather feedback from youth and families and use this feedback to implement changes in SBHC, such as improving any or all of the following:

- SBHC access
- Quality of care
- Breadth of services
- Comfort, design, and appearance of SBHC.

SPO hopes this more flexible approach will allow more authentic youth and family voices to affect health care.

For decades, SPO has shared quotes written by youth who completed the Student Satisfaction Survey in this annual Status Report publication. As SPO retires the SBHC Student Satisfaction Survey, we share with you one last time the statements youth across Oregon made last year about their SBHC.

The health center is a really nice, calming, and really feels like a safe space for students to be honest and heard.

– Student

100% recomendado. Me siento muy segura y bien atendida.

– Student

The people here are really, really nice to me. Some of my happiest moments have occurred in this place.

– Student

They work hard and they are there for you when you need them the most and if you are sad or mentally can't handle things, they are there for you and you can talk to them about anything.

– Student

So happy for this resource at my school.

– Student

I love getting seen here, all the healthcare providers are very accepting and friendly. They always ask important questions and I always feel safe here.

– Student

Son amables, respetuosos y atentos con los pacientes.

– Student

It's an extremely safe space with kind and generous people that care and respect everyone without hesitation!

– Student

I love this clinic these are some of the friendliest people I've met, and they are very helpful in making me feel secure in my choices.

– Student

La atención es muy agradable y siempre es muy eficiente.

– Student

I love the doctors here; they are all so bubbly no matter what. I come here because it's the most convenient and I love it.

– Student

I really love all the staff at the health clinic they're very nice and provide insane amounts of comfort, ability, and respect towards me!

– Student

Que me sentí comoda con el trato y la atencion que me dieron.

– Student

They all are very kind and understanding about things. I feel like they never judge me.

– Student

It is always very positive, and I always leave happier than I originally came.

– Student

Me gusto mucho, porque me trataron bien y me dieron una persona para traducer.

– Student

It's a very safe place, I'm grateful for everyone that works here because they have helped me a lot and made me feel nice and safe.

– Student

Explained everything very well where I knew exactly what was going on and even when it sounded silly to get checked out, they took the time to.

– Student

This health center has very good staff, they are always there to help and make you feel comfortable, they help you with what you need, and they help you understand what is happening to your body.

– Student

The staff are very good at getting you in as soon as possible, and they understand how to work around you schedule.

– Student

Todos son may atentos y se preocupan por mi salud.

– Student

The staff are great about getting you the help you need and informing your parents about what they did, how they helped, and what the next steps need to be.

– Student

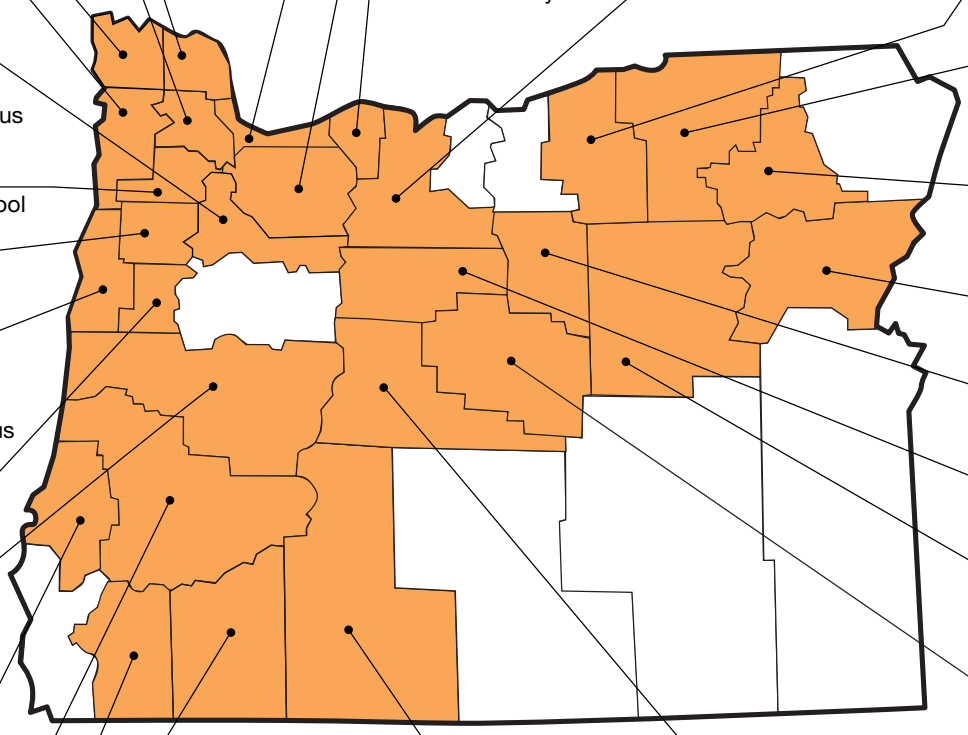

I was a little nervous, but they made me feel more knowledgeable about the vaccines I was getting.

– Student

This place is awesome. The staff is so nice and really treated me with respect and took my worries into consideration, definitely want to go back just for the staff. THEY ARE AMAZING!

– Student
