EXECUTIVE SUMMARY

ACC has performed a Phase I ESA in general conformance with the scope and limitations of the ASTM E1527-21 Standard, the All Appropriate Inquiry Final Rule 40 CFR Part 312, and Department of Toxic Substances Control (DTSC) *Phase I ESA Advisory: School Property Evaluations* for the property identified as Wood Middle School, 420 Grand Street, Alameda, California (Subject Property). Exceptions to, or deletions from, this practice are described in Section 1.4.

The Subject Property consists of a portion of two parcels of land totaling approximately 16.3-acres and located on the east side of Grand Street between Otis Drive and Shore Line Drive in the City of Alameda, California. The Subject Property is currently developed with Wood Middle School consisting of four permanent buildings identified as the main classroom building, multi-purpose building, permanent classroom, and storage/concessions building. In addition, the Subject Property consists of six portable classroom buildings, a construction site (formerly Lum Elementary School), athletic fields, and associated structures.

The earliest record reviewed during this assessment was an 1895 historical topographic map depicting the Subject Property as part of the San Francisco Bay. The Subject Property remained in this configuration until approximately 1949.

By 1958, portions of the San Francisco Bay appear to be in-filled and the majority of the Subject Property is undeveloped and appears associated with the construction of the surrounding area with unpaved access roads. A non-descript structure appears developed to the southwest.

By 1963, the Subject Property appears developed with the former Lum Elementary School building to the northeast (1801 Sandcreek Way) and a shed structure and building foundation to the south.

In 1965, the Subject Property was developed with the existing Wood Middle School buildings to the southwest, athletic fields to the southeast, and associated structures (420 Grand Street).

In January 2024, the Lum Elementary School building to the northeast was demolished and was observed as an active construction site during ACC's site reconnaissance. The Subject Property has remained in this configuration to the present.

Historical Subject Property occupants include: City of Alameda (1970), Will C. Wood Middle School (1986 to 2020), and Alameda Unified School District (2000 to 2020).

No significant data gaps were identified while conducting this Phase I ESA.

The eastern portion of the multi-purpose building is shown on the 1965 building drawings as a shop classroom with associated room labeled "paint spray." Discussions with AUSD representatives stated the room labeled "paint spray" was developed as an office or storage area

dating back to at least the 1980s. The area is currently an art studio classroom. Based on discussions with AUSD representatives, the room was reportedly not developed in accordance with the 1965 plans, and it is considered a de minimis condition. For additional information see Section 3.1.

This assessment has not revealed evidence of Recognized Environmental Conditions (RECs) at the Subject Property.

The assessment has revealed evidence of a potential Business Environmental Risk (BER) at the Subject Property:

BER – Historic Fill Material: The Subject Property was historically a part of the San Francisco Bay and in-filled between 1949 and 1958. If soils are to be disturbed at the Subject Property ACC recommends characterization of the fill material for hazardous materials including, but not limited to, naturally occurring metals and naturally occurring asbestos (NOA).

BER – Historic Buildings: The Subject Property was historically developed with a non-descript building along the southwestern portion and previous school buildings. If soils are to be disturbed at the Subject Property ACC recommends sampling these areas for the presence of lead, asbestos, pesticides, and PCBs typically associated with building materials.

BER – Pad-Mounted Transformer: One concrete pad-mounted transformer will be replaced as part of the modernization scope. If soils are to be disturbed at the Subject Property ACC recommends sampling for the presence of presence of PCBs-containing transformer oil.

1.0 INTRODUCTION

On behalf of Alameda Unified School District (AUSD) (Client), ACC Environmental Consultants, Inc. (ACC) performed a Phase I Environmental Site Assessment (ESA) of the property identified as Wood Middle School, 420 Grand Street, Alameda, California (Subject Property).

1.1 Purpose

The purpose of this Phase I ESA was to assess the Subject Property for recognized environmental conditions (RECs), which are defined by the ASTM E1527-21 Standard as (1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; (3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment.

1.2 Scope of Services

ACC conducted the following:

- A search of regulatory records and files for the Subject Property, neighboring properties, and nearby sites of environmental concern to assess whether any adverse environmental conditions have impacted, or has the potential to impact the Subject Property.
- A review of historical sources including historical aerial photographs, historical topographic maps, historic city directories and historical fire insurance maps.
- A review of physical setting sources including the USGS 7.5 minute topographic maps, as well as geology, hydrogeology, and soil maps of the Subject Property and vicinity, as deemed appropriate.
- A review of the current title report for the Subject Property (if provided by the Client), and copies of all previous environmental site investigations performed at the property (if applicable and available).
- A site reconnaissance to visually assess the potential for RECs in connection with the Subject Property.
- Interviews of regulatory agencies and available persons familiar with the Subject Property.

1.3 Limitations

A Phase I ESA cannot wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this Phase I ESA is intended to reduce uncertainty regarding the potential for RECs in connection with the Subject Property within reasonable limitations of time and cost. There is a point at which the cost of information obtained or the time frame required to gather

it outweighs the usefulness of the information and, in fact, may be a material detriment to the orderly completion of real estate transactions.

Conducting a Phase I ESA alone does not provide a landowner with CERCLA liability protection. Landowners who want to qualify as bona fide prospective purchasers or contiguous property owner must comply with all of the statutory requirements identified in CERCLA Section 107(r) and 107(q). Continuing obligations must be satisfied to maintain liability protection under CERCLA for innocent landowners, bona fide prospective purchasers, and contiguous property owners. Continuing obligations start on the date that a landowner acquires title to a property. The landowner must: 1) comply with land use restrictions and institutional controls; 2) take "reasonable" steps with respect to hazardous substances releases; 3) provide full cooperation, assistance and access to persons that are authorized to conduct response actions or natural resource restoration; 4) comply with information requests and administrative subpoenas; and 5) provide all legally required notices.

The site reconnaissance was limited to a visual observation of the Subject Property. ACC shall not be responsible for areas covered by parked vehicles, overgrown vegetation, and/or other obstacles (heavy furniture, trash bins, miscellaneous stored items, etc.) preventing access or visual observation at the time of the site reconnaissance. Per the ASTM E1527-21 Standard it is not necessary to look under floors, above ceilings or behind walls.

As is the case with any investigation of limited scope, site conditions may vary from those observed and witnessed on the date of the site reconnaissance. The possibility of the discovery of the presence of hazardous substances that are not anticipated and/or were neither witnessed nor identified on the date of the site reconnaissance cannot be completely eliminated. ACC cannot offer any form of warranty and/or guarantee that the Subject Property does not contain hazardous substances and/or conditions per the results of performing this Phase I ESA. Because regulatory criteria change over time, potential concentrations of contaminants presently considered not significant may in the future fall under more stringent regulatory standards that require remediation.

Based on the ASTM E2600-22 *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*, the minimum search distance for potential vapor intrusion by a release of petroleum products is 528 feet (1/10 mile) and the minimum search distance for potential vapor intrusion by other chemicals is 1,760 feet (1/3 mile).

1.4 Project-Specific Limitations and/or Deviations

This assessment did not include any testing or sampling of materials, including soil, water, soil vapor, air or building materials. No limiting conditions or deviations were encountered during this assessment.

1.5 Significant Assumptions

No significant assumptions were made during this Phase I ESA. ACC assumes that verbal and written

information provided to ACC during this Phase I ESA process, and included in this report, is factual.

1.6 User Reliance

This report may be relied upon by Alameda Unified School District (AUSD) (User) and Department of Toxic Substances Control (DTSC). Reliance upon this report by additional parties is unauthorized unless expressed written consent is obtained from the Client and ACC.

2.0 SITE DESCRIPTION

The Subject Property consists of a portion of two parcels of land located on the east side of Grand Street between Otis Drive and Shore Line Drive in the City of Alameda, California (Figures 1 through 3). The total area of the Subject Property is approximately 16.3 acres per the Alameda County Assessor. The following addresses have been found to be associated with the Subject Property: 420 Grand Street and 400 Grand Street and 1801 Sandcreek Way.

The Subject Property, Assessor Parcel Numbers (APNs) 74-1250-1-1- and 74-1250-1-2, is accessible from Grand Street to the east. The Subject Property is currently developed with Wood Middle School consisting of four permanent buildings identified as the main classroom building, multi-purpose building, permanent classroom, and storage/concessions building. In addition, the Subject Property consists of six portable classroom buildings, a construction site (formerly Lum Elementary School), athletic fields, and associated structures. The surrounding area is developed for commercial and residential use.

Electricity is provided by Alameda Municipal Power. Gas is provided by Pacific Gas and Electric (PG&E). Water and sewer service is provided by East Bay Municipal Utility District (EBMUD).

3.0 USER PROVIDED INFORMATION AND INTERVIEWS

ACC provided Ruth Boyd, Project Manager for AUSD, a User questionnaire which requests information as described in ASTM E1527-21 Section 6. The environmental questionnaire was completed by Ruth Boyd and dated January 29, 2024. A copy of the user questionnaire is included in Appendix A.

The User is completing the Phase I ESA as a requirement by the Department of Toxic Substances Control (DTSC) prior to demolition of all buildings except the multi-purpose building and permanent classroom to construct a new gymnasium, admin/library building, and a two-story classroom building. In addition, the area of the former Lum Elementary School will be developed at a later date with athletic fields to be used by Alameda High School.

3.1 Interviews

3.1.1 Interview with Owner, Key Site Manager or Representative/Operator

Ms. Boyd stated the former Lum Elementary School building was constructed in 1959 and demolished in December 2023. Wood Middle School was constructed in 1965. Prior to that, the Subject Property location was within the former bay waters and the soil used to in fill the area is comprised of sandy material that was dredged from old beach areas between 1957 and 1958.

Mr. Robbie Lyng, Key Site Manager, stated he has worked for AUSD for 16 years. Mr. Lyng stated the room labeled "paint spray" on the 1965 building drawings was not developed in accordance with the plans. The area currently consists of a storage closet associated with an art classroom.

Ms. Boyd and Mr. Lyng were unaware of additional environmental concerns associated with the Subject Property.

3.1.2 Interviews with Occupants

Interviews with the occupants were not conducted at this time.

3.1.3 Interviews with Local Government Officials

See Section 4.4.

3.1.4 Interviews with Others

According to discussions with Mr. Felix Douglas, employee of Wood Middle School for 38 years, and Mr. Jim Hartwig, a retired teacher and employee of Wood Middle School in the 1980s, as far back as they can remember the teachers used the room labeled "paint spray" on the 1965 building drawings as an office or storage area.

3.2 Environmental Liens or Activity and Use Limitations (AULs)

The User provided no information or actual knowledge with regard to environmental liens or AULs in connection with the Subject Property.

3.2.1 Title Report

A Title Report dated March 27, 2023 was provided to ACC and is attached as Appendix B. No environmental AULs or environmental liens were noted by ACC.

3.3 Specialized Knowledge

No specialized knowledge in connection with the Subject Property and indicative of RECs was provided by the User.

3.4 Commonly Known or Reasonably Ascertainable Information

Any commonly known or reasonably ascertainable information available to ACC has been incorporated into this report.

3.5 Valuation Reduction for Environmental Issues

The User currently owns the Subject Property.

3.6 Owner and Key Site Property Manager Information

The current owner of the Subject Property is Alameda Unified School District (AUSD).

3.7 Previous Environmental Reports

ACC reviewed original building drawings of the multi-purpose building, main classroom building, and three portable classroom buildings dated 1965 and additional plans dated 2001. The drawings for the multi-purpose building show a shop classroom located on the eastern portion with associated room labeled "paint spray." For additional discussion see Section 3.1.

The plans dated 2001 show the construction of the existing elevator at the three-story classroom building at this time.

4.0 RECORDS REVIEW

ACC contracted Environmental Data Resources, Inc. (EDR) to research available environmental records and historical data for the Subject Property based on the ASTM E1527-21 Standard. A complete list of searched records and databases, as well as search distances, is attached as Appendix C. The search distances provided by EDR are in accordance with the ASTM E1527-21 Standard and AAI guidelines.

The database search by EDR revealed 45 mapped sites within a one-eighth mile radius of the Subject Property. The Subject Property and nearby properties of potential concern are discussed below.

4.1 Summary of EDR Records for Subject Property

Site Name: 1X Wood School

Site Address: 420 Grand Street

Discussion: The Subject Property is listed on the ECHO, HWTS and HAZNET databases. According to the HWTS database, the Subject Property disposed of approximately 0.0046 tons of inorganic solid waste in at least 1984.

Site Name: MECA Consulting/Alameda USD Wood School/Alameda Unified School District – Wood Food Service/Alameda Unified School District/Wood Middle School
Site Address: 420 Grand Street

Discussion: The Subject Property is listed on the RCRA NonGen/NLR, HWTS, RCRA-SQG, FINDS, ECHO, and HAZNET Databases. According to the HWTS database, the Subject Property was listed as a small quantity generator in 1986 and disposed of laboratory waste chemicals (detergent and soap) from at least 1987 to 1988, lab waste chemicals, inorganic solid waste and asbestos containing waste in at least 1991, 1995, and between 2001 to 2002, and asbestos containing waste, other inorganic solid waste, and waste oil and mixed oil from at least 2009 to 2013. According to the HWTS database, the Subject Property was not presently generating hazardous waste in at least 2022. Based on lack of evidence of a documented release, and proper removal and disposal of hazardous waste, these listings are not expected to represent a significant environmental concern to the Subject Property.

Site Name: Priscilla
Site Address: 420 Grand Street

Discussion: The Subject Property is listed on the RCRA NonGen/NLR, HWTS, FINDS, and ECHO databases. According to the HWTS database, the Subject Property generated hazardous waste temporarily in March 2022. According to the RCRA NonGen/NLR database, the Subject Property was listed as a plumbing, heating, and air conditioning contractor and not presently generating hazardous waste in at least 2022. The ECHO database reveals no violations. Based on lack of evidence of a documented release, these listings are not expected to represent a significant environmental concern to the Subject Property.

4.2 Adjacent Properties of Potential Concern

Site Name: George Chow
Site Address: 413 Grand Street
Gradient Direction: Cross Gradient

Discussion: The west-adjacent property is listed on the RCRA NonGen/NLR database. According to the RCRA NonGen/NLR database, the property was listed as a verified non-generator and not presently generating hazardous waste in at least 2020. No evaluations or violations were found for the property. Based on lack of evidence of a documented release, and proper removal and disposal of hazardous waste, these listings are not expected to represent a significant environmental concern to the Subject Property.

Site Name: SLPM Property Management
Site Address: 325 Kitty Hawk Road
Gradient Direction: Down Gradient

Discussion: The south-adjoining property is listed on the RCRA NonGen/NLR database. According to the RCRA NonGen/NLR database, the property was listed as a verified non-generator and not presently generating hazardous waste in at least 2018. No evaluations or violations were found for the property. Based on lack of evidence of a documented release, and proper removal and disposal of hazardous waste, these listings are not expected to represent a significant environmental concern to the Subject Property.

Site Name: Ruxi Zhang
Site Address: 325 Kitty Hawk Road #205
Gradient Direction: Down Gradient

Discussion: The south-adjoining property is listed on the RCRA NonGen/NLR database. According to the RCRA NonGen/NLR database, the property was listed as a verified non-generator and not presently generating hazardous waste in at least 2019. No evaluations or violations were found for the property. Based on lack of evidence of a documented release, and proper removal and disposal of hazardous waste, these listings are not expected to represent a significant environmental concern to the Subject Property.

4.3 Nearby Properties of Potential Concern

Site Name: Emeryville Shell Inc
Site Address: 604 Fortress Isle
Gradient Direction: Down/Up Gradient

Discussion: The property located approximately 224 feet north is listed on the EDR Hist Auto database. According to the listing, Emeryville Shell Inc operated a gasoline service station from at least 2007 to 2009. However, based on ACC's review of aerial photos of the property in 2009, the property is developed as a residential dwelling. The property is not listed on Geotracker and may be a transcription error.

In our opinion, none of the other sites listed on the regulatory database report pose a significant threat to the Subject Property.

4.4 Additional Environmental Record Sources

In addition, ACC submitted file review request letters, emails and/or phone calls to the following agencies for the Subject Property:

4.4.1. California EPA – Department of Toxic Substance Control (DTSC)

ACC received a response from the DTSC on January 11, 2024. Files available included:

- Information on C&T recycling with annual reports between 2009 and 2015. According to the reports, various monitors, computers, laptops, microwaves, CRTs, and CRT glasses were inventoried at the site.

ACC additionally reviewed the online DTSC Envirostor database and found the Subject Property is not listed.

4.4.2. Regional Water Quality Control Board (RWQCB)

ACC received a response from the RWQCB on January 19, 2024. No files were available for the Subject Property. ACC additionally reviewed the online RWQCB Geotracker database and found the Subject Property is not listed.

4.4.3. Alameda County Department of Environmental Health (ACDEH)

ACC received a response from the ACDEH on January 16, 2024. Files available included:

- A report of metallic mercury spill at Wood Middle School dated December 11, 1995. According to the report, Environmental Health and Safety Resources personnel conducted a remediation and indicated mercury vapors were not present in ambient air. General ventilation was created in the classroom to reduce ambient vapor concentrations. The report concluded that there should be no lasting impact on the safety of the classroom. The report attached the Material Safety Data Sheet for mercury and a Hazardous Waste Generator Inspection Report.
- Correspondence letters between Wood Middle School Principal and Alameda County Health Care Services discussing a release of mercury from a student's necklace dated December 14, 1995.
- Correspondence letters between Wood Middle School Principal and Alameda County Health Care Services discussing environmental cleanup reports for mercury dated in January 1996.
- A Hazardous Material Billing Adjustment Form for Wood Middle School to rescind billing and archived as a one-time hazmat adjustment and dated February 16, 2001.
- A Hazardous Materials Inventory describing a 640-pound lead acid battery located at the Sprint Nextel Cell Site Ca 2817 at 420 Grand Avenue dated December 7, 2007.
- A Hazardous Materials Inventory describing a 796-pound lead acid battery located at the AT&T Mobility – OTIS site at 420 Grand Avenue dated May 12, 2009.
- A Hazardous Materials Building Plan for Cell Site CA2817 dated December 16, 2009 describing responsibilities of reporting and safety contacts regarding lead-acid batteries located within cell site shelter. A photo log shows the area of the cell site shelter, to the east of the main building near the elevator maintenance room.
- A Hazardous Materials Inventory describing an 835-pound lead acid battery located at the AT&T Mobility – OTIS site at 420 Grand Avenue dated April 20, 2010.
- A Hazardous Materials Inventory describing a 1280-pound lead acid battery located at the Sprint Nextel Cell Site Ca 2817 at 420 Grand Avenue dated February 15, 2011.

- A Hazardous Materials Building Plan for AT&T Mobility – OTIS (24177) dated March 2, 2011 describing responsibilities of reporting and safety contacts regarding lead-acid batteries located within cell site shelter. A drawing set shows the area of the AT&T equipment, to the east of the main building near the elevator maintenance room as well as the roof.

4.4.4. Bay Area Air Quality Management District (BAAQMD)

ACC received a response from the BAAQCMD on January 10, 2024. No files were available for the Subject Property.

4.4.5. Alameda Fire Department (AFD)

ACC received a response from the AFD on January 18, 2024. Files available included:

- A Fire and Life Safety Inspection Report that mentions the conditions of fire sprinkler systems, fire rated doors, and extinguishers and dated January 18, 2024.

4.4.6. Alameda Building Division (ABD)

Building permit records are available via City of Alameda online database. Records included:

420 Grand Street

- A building permit to construct a ballfield and a 1,125-square foot building containing restrooms, concessions stand, and storage issued to Alameda Unified School District and dated March 18, 1999.
- An electrical permit dated December 20, 2005.
- A permit application worksheet for a meter release dated December 20, 2005.
- An alteration permit to construct median and bulb-outs on Grand Street at Wood School issued to Alameda Unified School District and dated July 8, 2014.

1801 Sandcreek Way

- A building permit to repair sewer main for Lum Elementary School that is undated.
- A public works permit to install one ADA ramp and dated July 31, 2000.
- A public works/right of way permit to install new conduit from Otis Drive to Donald C. Lum Elementary School and dated July 7, 2010
- A blank unissued public works permit dated November 10, 2011.

4.5 Historical Use Information

Information pertaining to historical uses of the Subject Property, adjoining properties, and surrounding area was obtained from the following sources: aerial photographs, historical topographic maps, historical Sanborn Maps and city directories. These resources were obtained from Environmental Data Resources (EDR).

ACC reviewed historical aerial photographs dated 1939, 1946, 1958, 1963, 1974, 1982, 1993, 1998, 2005, 2009, 2012, 2016, and 2020. A copy of the Historical Aerial Photographs is provided in Appendix D.

ACC reviewed historical topographic maps dated 1895, 1899, 1914, 1947, 1948, 1949, 1956, 1959, 1968, 1973, 1980, 1996, 1997, 2012, 2015, 2018, and 2021. A copy of the Historical Topographic Maps is provided in Appendix E.

Historical Sanborn Maps (fire insurance maps) are detailed scaled drawings that show the location and use of building structures that have occupied a given area from as early as the late 1800s. These maps can provide information that is unavailable from other sources regarding the development and use of a given property. ACC reviewed historical Sanborn maps dated 1987. Historical Sanborn Maps are provided in Appendix F.

Historical city directories were provided by R.L. Polk & Co of California, The Pacific Telephone & Telegraph Co, Pacific Bell, Cole Information Systems, Haines Company, Inc., and EDR Digital Archive Directories were reviewed for available data from the years 1920 to 2020. The Subject Property address reviewed included 400 & 420 Grand Street. A copy of the Historical City Directories is provided in Appendix G.

4.5.1 Historical Use Information on the Subject Property and Adjacent Properties

Pertinent observations from the historical resources in relation to the Subject Property and the immediately adjacent properties is as follows:

Subject Property

Circa 1895 to 1949	According to historical references reviewed, the Subject Property appears as part of the San Francisco Bay.
Circa 1958	According to historical references reviewed, portions of the San Francisco Bay appear to be in-filled and the majority of the Subject Property is undeveloped. Additional areas appear associated with the development of the surrounding area with unpaved access roads. A non-descript structure is developed to the southwest.
Circa 1963	According to historical references reviewed, the Subject Property appears developed with the recent Lum Elementary School building to the northeast (1801 Sandcreek Way) and a shed structure and building foundation to the southwest.
Circa 1968 to 2020	According to historical references reviewed, the Subject Property appears developed as the existing two school complexes to the northeast and southwest, with athletic fields to the southeast and

	associated structures (420 Grand Street). Occupants during this time include: City of Alameda (1970), Will C. Wood Middle School (1986 to 2020), and Alameda Unified School District (2000 to 2020).

Rittler Park, 1700 Otis Drive & Residential Dwellings 1701-1733 Otis Drive Adjacent Properties to the North

Circa 1895 to 1949	According to historical references reviewed, the area to the north of the Subject Property appears as part of the San Francisco Bay.
Circa 1958	According to historical references reviewed, portions of the San Francisco Bay appear to be in-filled and the area to the north of the Subject Property appears to be under construction.
Circa 1963 to 2020	According to historical references reviewed, the area to the north of the Subject Property appears developed with the existing public park. Residential developments to the north continue construction until 1968. Occupants during this time include: private residences (1991 to 2020).

Multi-Family Residential Buildings, 325 Kitty Hawk Way, 1777-1801 Shore Line Drive, & 320 Grand Street, Adjacent Properties to the South

Circa 1895 to 1949	According to historical references reviewed, the area to the south of the Subject Property appears as part of the San Francisco Bay.
Circa 1958	According to historical references reviewed, portions of the San Francisco Bay appear to be in-filled and the area to the south of the Subject Property appears to be under construction.
Circa 1963 to 2020	According to historical references reviewed, the area to the south of the Subject Property appears developed with the existing multi-family residential buildings to the southwest. The additional existing multi-family residential building is developed by 1968.

Residential Dwellings, 333-433 Kitty Hawk Place & 1900-1901 Sandcreek Way, Adjacent Properties to the East

Circa 1895 to 1949	According to historical references reviewed, the area to the east of the Subject Property appears as part of the San Francisco Bay.

Circa 1958	According to historical references reviewed, portions of the San Francisco Bay appear to be in-filled and the area to the east of the Subject Property appears to be under construction.
Circa 1963 to 2020	According to historical references reviewed, the area to the east of the Subject Property appears developed with the existing residential dwellings.

Residential Dwellings, 401-529 Grand Street, Adjacent Properties to the West

Circa 1895 to 1949	According to historical references reviewed, the area to the west of the Subject Property appears as part of the San Francisco Bay.
Circa 1958 to 1963	According to historical references reviewed, portions of the San Francisco Bay appear to be in-filled and the area to the west of the Subject Property appears to be under construction. Two non-descript structures appear developed during this time.
Circa 1968 to 2020	According to historical references reviewed, the area to the west of the Subject Property appears developed with the existing residential dwellings. Occupants during this time include: private residences (1970 to 2020).

4.6 Historical Summary for Subject Property

The earliest record reviewed during this assessment was an 1895 historical topographic map depicting the Subject Property as part of the San Francisco Bay. The Subject Property remained in this configuration until approximately 1949.

By 1958, portions of the San Francisco Bay appear to be in-filled and the majority of the Subject Property is undeveloped and appears associated with the construction of the surrounding area with unpaved access roads. A non-descript structure appears developed to the southwest.

By 1963, the Subject Property appears developed with the former Lum Elementary School building to the northeast (1801 Sandcreek Way) and a shed structure and building foundation to the southwest.

In 1965, the Subject Property was developed with the existing Wood Middle School buildings to the southwest, athletic fields to the southeast, and associated structures (420 Grand Street).

In January 2024, the Lum Elementary School building to the northeast was demolished and was observed as an active construction site during ACC's site reconnaissance. The Subject Property has remained in this configuration to the present.

Historical Subject Property occupants include: City of Alameda (1970), Will C. Wood Middle School (1986 to Present), and Alameda Unified School District (2000 to 2020).

4.7 Historical Summary for Adjacent and Surrounding Properties

Based on historical records reviewed, the adjacent and surrounding area was part of the San Francisco Bay dating back to the late 1940s. By the late 1950s, the Alameda South Shore area was constructed by in-filling the San Francisco Bay with dredged sandy fill material. Construction continued into the early 1960s, and most of the existing adjacent residential and commercial properties were completed by 1968.

No off-site, nearby properties which pose an environmental risk to the Site were identified during the historical review.

4.8 Vapor Intrusion

In accordance with the ASTM E2600 Standard, ACC assessed the Subject Property for a potential vapor encroachment condition (VEC). A vapor encroachment condition is defined by ASTM E 2600 as "the presence or likely presence of chemical(s) of concern (COC) vapors in the vadose zone of the Target Property caused by the release of vapors from contaminated soil and/or groundwater either on or near the Target Property."

4.8.1 Site

There is no evidence of a VEC in association with the Subject Property. It is ACC's opinion that a VEC at the Subject Property due to on-site source can be ruled out at this time.

4.8.2 Off-Site

It is ACC's opinion that a VEC at the Subject Property due to off-site source can be ruled out at this time.

5.0 SUPPLEMENTAL EVALUATION AREAS

Based on the Department of Toxic Substances Control (DTSC) document *Phase I ESA Advisory: School Property Evaluations*, assessment of other potential exposure media at public schools not addressed within this scope of work may be warranted to comply with requirements of the Education Code 17210, 17213.1 and 17213.

5.1 Agricultural Use

Available data does not indicate that the Subject Property was historically used for agriculture.

5.2 Mines

Available data does not indicate that the Subject Property was historically developed as a mine or used to store mine waste.

5.3 Former U.S. Government Use or Ownership

Available data does not indicate that the Subject Property was historically used or owned by the U.S. government.

5.4 Residential Use

A non-script structure was developed on the southwest portion of the Subject Property prior to development as the existing school complex (Figure 3). No information for the use of the building during this time was available in reviewed records. Historical residential development of the Subject Property cannot be ruled out. For additional discussion see Section 8.0.

5.5 Lead-Based Paint Application

The Subject Property buildings were constructed prior to 1978 and should be assumed to contain lead-based paint (LBP) based on current regulations. ACC has conducted hazardous materials surveys for Wood Middle School and Lum Elementary School since approximately the 2000s. LBP and other lead-containing building materials are known to exist at the Subject Property buildings. These materials are properly addressed and handled as part of on-going construction and/or demolition projects for AUSD Environmental Health and Safety (EHS) requirements. Additionally, suspect materials that have not already been tested will be tested as needed for future construction projects.

5.6 Railroad Use or Easements

Easements associated with railroad right-of-ways or easements that transport hazardous substances were not observed in records reviewed.

5.7 Utility Easements

Easements associated with aboveground or underground utilities or pipelines that transport hazardous substances were not observed in records reviewed.

5.8 Naturally Occurring Asbestos & Asbestos in Building Materials

In accordance with DTSC criteria, ACC assessed for the presence of ultramafic geologic units within ten miles of the Subject Property. Based on data provided by the US Geologic Survey[1] an ultramafic geologic unit (serpentine) is located at a higher elevation and within ten miles of the Subject Property. Although the probability of naturally occurring asbestos in soil at the Subject Property is low, the Subject Property was in-filled between 1949 and 1958, and the potential for NOA in fill material present at the Subject Property cannot be ruled out. For additional discussion see Section 8.0.

ACC has conducted hazardous materials surveys for Wood Middle School and Lum Elementary school since approximately the 2000s. Asbestos containing materials (ACM) are known to exist at the Subject Property buildings. These materials are properly addressed and handled as part of on-going construction and/or demolition projects for AUSD Environmental Health and Safety (EHS) requirements. Known ACM at Lum Elementary School buildings have been abated as needed as part of the ongoing demolition project. Additionally, suspect materials that have not already been tested will be tested as needed for future construction projects.

5.9 Metals & Metalloids

No available information indicates elevated naturally occurring metals at the Subject Property, and the majority of soils at the Subject Property are capped with hardscape. The Subject Property was in-filled between 1949 and 1958, and the potential for elevated naturally occurring metals in fill material at the site cannot be ruled out. For additional discussion see Section 8.0.

5.10 Hydrogen Sulfide

No available information indicates the potential for elevated naturally occurring gases such as hydrogen sulfide at the Subject Property.

5.11 Methane

No available information indicates the potential for elevated naturally occurring gases such as methane at the Subject Property.

5.12 Radon

Alameda County is located in EPA Radon Zone 2. This zone has a predicted average indoor radon screening level between 2 and 4 picocuries per liter (pCi/L)[2]. Based on California Department of

[1] USGS Geologic Map and Map Database of the Oakland Metropolitan Area, Alameda, Contra Costa, and San Francisco Counties, California, R.W. Graymer (2000)
[2] https://www.epa.gov/sites/default/files/2014-08/documents/california.pdf

Public Health data, predicted radon levels in area code 94501 may exceed 1 pCi/L[3]. The U.S. EPA recommends that individuals avoid long-term exposures to radon concentrations above 4 picocuries per liter[4]. Based on available data there is a moderate potential that radon at the Subject Property exceeds 4 pCi/L.

5.13 Naturally Occurring Hazardous Materials

No available information indicates the potential for other naturally occurring hazardous materials at the Subject Property.

5.14 Electrical Transformers, Oil-Filled Equipment, or Hydraulic Systems

ACC identified two concrete pad-mounted transformers located at the Subject Property. One pad-mounted transformer will be replaced as part of modernization scope. PCBs associated with this equipment and potential releases at this area of the Subject Property cannot be ruled out at this time. For additional discussion see Section 8.0.

A second pad-mounted transformer is located near the multi-purpose building and will remain in place. Ms. Ruth Boyd, Project Manager for AUSD, stated this pad-mounted transformer was installed in 2022. PCBs associated with this equipment and potential releases at this area of the Subject Property can be ruled out at this time.

A hydraulic powered elevator is located at the Subject Property. Based on building plans dated 2001, the elevator at the three-story classroom building was installed at this time, which is after the ban of PCBs in hydraulic oils[5]. PCBs associated with the hydraulic powered elevator and potential releases at this area of the Subject Property can be ruled out at this time.

5.15 Petroleum Deposits or Use

Based on the California Geologic Energy Management Division (CalGEM) Online Mapping System[6], the Subject Property is not situated within 500 feet of an active oil, gas and/or geothermal well(s).

5.16 Fill Material

The majority of soils at the Subject Property are capped with hardscape. The Subject Property was in-filled between 1949 and 1958, and fill material is present at the site. For additional discussion see Section 8.0.

[5] https://www.epa.gov/archive/epa/aboutepa/epa-bans-pcb-manufacture-phases-out-uses.html
[6] https://www.conservation.ca.gov/calgem/Pages/WellFinder.aspx

5.17 Debris or Stockpiles

No evidence of illegal dumping, debris piles or burn dumps at the Subject Property were observed during this assessment.

5.18 Illegal Drug Manufacturing Sites/Clandestine Methamphetamine Laboratories

No available information indicates evidence that the Subject Property has been historically used to manufacture illegal drugs. Historical data provided by EDR (Appendix C) includes a regulatory search for these types of sites and references the DTSC Emergency Response Unit and the DEA databases.

5.19 Grading Activities

Grading activities are planned based on the modernization scope. Occupation of the Subject Property at this time of grading activities will be limited to construction workers and qualified personnel.

5.20 Surface Drainage Pathways

Surface drainage is currently managed by porous surfaces throughout the Subject Property.

5.21 Termiticide Application

No available information indicates evidence of termiticide application at the Subject Property.

5.22 Munitions and Explosives of Concern

No available information indicates evidence of munition or explosives of concern located at the Subject Property.

6.0 PHYSICAL SETTINGS

The Subject Property is approximately 14 feet above mean sea level according to the U.S. Geological Survey (USGS) Oakland West 7.5 Minute Quadrangle topographic map (2021). The topography at the Subject Property is relatively flat with surrounding topography generally sloping towards the south.

Based on the Draft Geotechnical Report prepared by Miller Pacific Engineering Group for the Subject Property and dated September 15, 2023, soils encountered in exploratory soil borings consisted of sandy fill to approximately 20 feet below ground surface (ft bgs) underlain by soft clay and organic materials described as Bay Mud and similar marsh deposits.

Groundwater was encountered at approximately five feet bgs. The groundwater gradient is anticipated to be tidally influenced given the proximity to the San Francisco Bay.

7.0 SITE RECONNAISSANCE

On January 30, 2024, ACC representative Davis Leach conducted a site reconnaissance at the Subject Property. Ruth Boyd, Project Manager for AUSD, provided site access.

7.1 Methodology

The Subject Property was viewed from all adjacent public thoroughfares and was observed to the extent not obstructed by bodies of water, adjacent buildings, and/or other obstacles such as overgrown vegetation. Accessible interior and exterior common areas were viewed. Special attention was given to hazardous materials storage/use areas and potential conduits to the subsurface such as drains and sumps.

7.2 General Site Setting

The Subject Property is developed with Wood Middle School consisting of four permanent buildings identified as the main building, multi-purpose building, permanent classroom, and storage/concessions building. In addition, the Subject Property is developed with six portable classroom buildings, athletic fields, construction site (former Lum Elementary School), and associated paved areas. The main entrances to the multi-purpose and main classroom buildings are located along the western portion of the buildings. Access to the Subject Property is along Grand Street to the west. Additional access to the Subject Property is along Sandcreek Way to the northeast and Kitty Hawk Road to the east.

7.3 General description of Vicinity, Adjacent Properties and Observed Current/Past Usage

The vicinity of the Subject Property consists of residential and commercial properties. The adjacent properties as viewed during the site reconnaissance are as follows:

- North - Rittler Park (1700 Otis Drive) and Otis Drive followed by Residential Dwellings (1725 to 1805 Otis Drive)
- South - Multi-Family Residential Buildings (325 Kitty Hawk Drive, 1777-1801 Shore Line Drive, and 320 Grand Street)
- East - Residential Dwellings (333-433 Kitty Hawk Road, 1901 Kitty Hawk Place, 1900 & 1901 Sandcreek Way, and 1900 Otis Drive)
- West - Grand Street followed by Residential Dwellings (401 to 501 Grand Street)

7.4 Summary of Site Visit Observations

The Subject Property is currently occupied by Wood Middle School and Alameda Unified School District. The main classroom and multi-purpose buildings are located on the western portion of the Subject Property. The main classroom building consists of three stories and has a main office, library, computer lab, storage areas, classrooms, and at least six restrooms. An elevator is located on the eastern portion of the building and is serviced by a room accessible from the eastern exterior. A sump pump is associated with the elevator. ACC noted the sump pump piping and associated 55-gallon drum of water in a fenced area outside of the elevator maintenance room.

The multi-purpose building consists of an art room, kitchen, basketball court, music room, stage, boiler/mechanical room, and additional classrooms and custodian storage. Several floor drains were observed throughout the kitchen area.

The permanent classroom is located to the northeast of the baseball fields and consists of a large classroom with a restroom.

The storage/concession building is located to the northwest of the baseball fields and was not accessible during the time of the site reconnaissance.

The six portable classroom buildings are located to the south and east of the main building and consist of a woodshop, classrooms, and associated offices and storage.

Two baseball fields and a football field with track are located on the southeast portion of the Subject Property.

An active construction site is located on the northeast portion of the Subject Property (previously Donald D. Lum Elementary School). The construction site was fenced off and not accessible during the site reconnaissance, however ACC observed heavy machinery and building debris as demolition activities were ongoing.

No visual evidence of environmentally concerning conditions was observed on the Subject Property or adjoining properties during the site reconnaissance.

No evidence of current underground/aboveground storage tanks, significant hazardous materials storage, PCB use, or environmental violations associated with the Subject Property were observed during the site reconnaissance that are considered indicative of RECs. A checklist describing Subject Property observations is attached in Appendix H.

8.0 FINDINGS & OPINIONS

ACC has performed a Phase I ESA in general conformance with the scope and limitations of the ASTM E1527-21 Standard, the All Appropriate Inquiry Final Rule 40 CFR Part 312, and

Department of Toxic Substances Control (DTSC) document *Phase I ESA Advisory: School Property Evaluations* for the property identified as Wood Middle School, 420 Grand Street, Alameda, California (Subject Property). Exceptions to, or deletions from, this practice are described in Section 1.4.

No significant data gaps were identified while conducting this Phase I ESA.

The eastern portion of the multi-purpose building is shown on the 1965 building drawings as a shop classroom with associated room labeled "paint spray." Discussions with AUSD representatives stated the room labeled "paint spray" was developed as an office or storage area dating back to at least the 1980s. The area is currently an art studio classroom. Based on discussions with AUSD representatives, the room was reportedly not developed in accordance with the 1965 plans, and it is considered a de minimis condition. For additional information see Section 3.1.

This assessment has not revealed evidence of Recognized Environmental Conditions (RECs) at the Subject Property.

The assessment has revealed evidence of a Business Environmental Risk (BER) at the Subject Property:

BER – Historic Fill Material: The Subject Property was historically a part of the San Francisco Bay and in-filled between 1949 and 1958. If soils are to be disturbed at the Subject Property ACC recommends characterization of the fill material for hazardous materials including, but not limited to, naturally occurring metals and naturally occurring asbestos (NOA).

BER – Historic Buildings: The Subject Property was historically developed with a non-descript building along the southwestern portion and previous school buildings. If soils are to be disturbed at the Subject Property ACC recommends sampling for the presence of lead, asbestos, pesticides and PCBs typically associated with building materials.

BER – Pad-Mounted Transformer: One concrete pad-mounted transformer will be replaced as part of the modernization scope. If soils are to be disturbed at the Subject Property ACC recommends sampling for the presence of PCBs-containing transformer oil.

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

The site reconnaissance and interviews were conducted by ACC's technical staff, who was also responsible for obtaining and reviewing historical use documentation, interpreting data, identifying RECs, HRECs, CRECs, BERs, and preparation of this Phase I ESA Report. All of the activities were performed in conjunction with and under the supervision or responsible charge of, Ms. Kimberly Bunting, the environmental professional assigned to this project.

I certify that I possess sufficient education, training, and relevant experience necessary to conduct the investigative and interpretive activities presented in the paragraph above in accordance with the ASTM E1527-21 Standard and possess the ability to identify issues relevant to RECs in connection with the Subject Property.

APPENDIX A

AAI QUESTIONNAIRE

Please refer to the following documents for complete information: Archive Drawings, CEQA & Cultural Resources/History Report, Geotechnical Report, Title Report

Phase I Environmental Site Assessment User Questionnaire

Please answer the following questions to the extent possible and return via email to kbunting@accenv.com. Please provide a copy of the Title Report.

Name:	AUSD
Title:	
Phone Number:	(510) 337-7000 ext. 77930
Email Address:	
Signature:	
Date:	January 29, 2024

How long have you been associated with the property:

Please list all current and known historical address(s) and Assessor Parcel Number(s) for which this Phase I ESA is being performed (attach maps or documentations if available):

Please list the acreage of the parcel(s), square footage and age(s) of on-site structures:

Purpose for which Phase I ESA is being performed, if for a real estate transaction, please list type of transaction (sale, purchase, lease, etc.)

Demolition of all buildings except the MPR and construction of (1) new gymnasium, (1) new admin/library, and (1) new two-story classroom building.

Please list all parties who will rely on the Phase I ESA:

How do you intend to use the property (if you plan to redevelop please discuss development plans and whether on-site soils will be disturbed/excavated):

The structure for the (1) new gymnasium, (1) new admin/library, and (1) new two-story classroom building will include driven pile foundations.

Please provide the property owner or owner representative, including telephone number and/or email address (the owner will be identified in the Phase I ESA and may be interviewed by ACC as warranted and if available):

Alameda Unified School District
(510) 337-7000

construction@alamedaunified.org

Please provide the lender, and any lender-specific requirements:

Please provide a site contact, including telephone number and/or email address for purposed of scheduling the site visit:

Ruth Boyd
(510) 337-7000 ext. 77930

Please list the current tenant(s), site use(s), and years of occupancy:

In 1959, the buildings that housed Lum Elementary School were constructed and the buildings that housed Wood Middle School were constructed in 1965. Before that, the location of the study area was water until filled between 1957 and 1958.

Who provides gas, electric, water, and sewer services:

Gas: PG&E
Electric: Alameda Municipal Power (AMP)
Water: East Bay Municipal Utility District (EBMUD)
Sewer: EBMUD treats wastewater, sewer systems are owned by City of Alameda

Did a search of recorded land titles identify (or are you aware of) any environmental liens filed or recorded against the property under federal, tribal, state, or local law? If yes, please explain.

Did a search of recorded land titles identify (or are you aware of) any Activity and Use Limitations (AULs), such as engineering controls, land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded against the proeprty under federal, tribal, state, or local law? If yes, please explain.

Do you have any specialized knowledge or experience related to the property or nearby properties?

Does the purchase price being paid for this property (if applicable) reflect fair market value of the property? If you conclude that there is a difference have you considered whether the lower purchase price is because contamination is known or blieved to be present at the property?

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of release or threatened releases, for example:

Do you know the past uses of the property?

The soils of the study area are Xeropsamments, fill (see CEQA report). This soil type is comprised of sandy material that was dredged from old beach areas and brought to sites to fill locations. The geological map of the study area shows that the location of the study area was water (Radbruch 1957) until filled between 1957 and 1958.

Do you know of specific chemicals that are present or once were present at the property? If yes, are Safety Data Sheets (SDS) available?

Do you know of spills or other chemical releases that have taken place at the property?

Do you know of any environmental clean ups that have taken place at the property?

Other?

Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

Are you aware of any of the following documents prepared for the property:			
	Yes	No	Date(s)
Environmental Site Assessment			
Subsurface Soil/Groundwater Investigation			
Environmental Permits			
Hazardous Materials/Waste Permits			
National Pollution Discharge Elimination System (NPDES) Permits			
Underground Injection System Registration Documents/Permits			
Community Right to Know Plans			
Hazardous Materials Management/Business Plans			
Storm Water Pollution Prevention Plans (SWPPP)			
Spill Prevention Control & Countermeasure Plans (SPCC)			
Risk Assessments			
Geotechnical Studies	X		

Are you aware of any of the following items associated with the property?	Yes	No
Asbestos-containing materials or lead-based paint located at the Subject Property?	X	
Litigation associated with the Subject Property with regards to violations or environmental law?		
Are you aware of any Aboveground Storage Tanks (ASTs) or Underground Storage Tanks (USTs) located at the Property? If yes, what are the contents and capacities?		
Electrical transformers on the Subject Property?	X	
Are any of the past or current occupants hazardous waste generators?		
Are there any pits, ponds, lagoons for waste treatment or disposal on the Subject Property?		
Are there any wells (irrigation, production, or monitoring)?		
Are there any sumps, floor drains, or catch basins, oil-water separators, or acid neutralization systems on the Subject Property?		
Are there any storm drains on the Subject Property?		
Have there been any significant structural fires at the Subject Property?		

APPENDIX B

EXCLUSIONS FROM COVERAGE

Except as expressly provided by the assurances in Schedule A, the Company assumes no liability for loss or damage by reason of the following:

(a) Defects, liens, encumbrances, adverse claims or other matters against the title to any property beyond the lines of the Land.
(b) Defects, liens, encumbrances, adverse claims or other matters , whether or not shown by the Public Records (1) that are created, suffered, assumed or agreed to by one or more of the Assureds; or, (2) that result in no loss to the Assured.
(c) Defects, liens, encumbrances, adverse claims or other matters not shown by the Public Records.
(d) The identity of any party shown or referred to in any of the schedules of this Guarantee.
(e) The validity, legal effect or priority of any matter shown or referred to in any of the schedules of this Guarantee.
(f) (1) Taxes or assessments of any taxing authority that levies taxes or assessments on real property; or, (2) proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not the matters excluded under (1) or (2) are shown by the records of the taxing authority or by the Public Records.
(g) (1) Unpatented mining claims; (2) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (3) water rights, claims or title to water, whether or not the matters excluded under (1), (2) or (3) are shown by the Public Records.

GUARANTEE CONDITIONS

1. Definition of Terms.
The following terms when used in the Guarantee mean:
a. the "Assured": the party or parties named as the Assured in Schedule A, or on a supplemental writing executed by the Company.
b. "Land": the Land described or referred to in Schedule A, and improvements affixed thereto which by law constitute real property. The term "Land" does not include any property beyond the lines of the area described or referred to in Schedule A, nor any right, title, interest, estate or easement in abutting streets, roads, avenues, alleys, lanes, ways or waterways.
c. "Mortgage": mortgage, deed of trust, trust deed, or other security instrument.
d. "Public Records": those records established under California statutes at Date of Guarantee for the purpose of imparting constructive notice of matters relating to real property to purchasers for value and without knowledge.
e. "Date of Guarantee": the Date of Guarantee set forth in Schedule A.
f. "Amount of Liability": the Amount of Liability as stated in Schedule A.

2. Notice of Claim to be Given by Assured.
The Assured shall notify the Company promptly in writing in case knowledge shall come to an Assured of any assertion of facts, or claim of title or interest that is contrary to the assurances set forth in Schedule A and that might cause loss or damage for which the Company may be liable under this Guarantee. If prompt notice shall not be given to the Company, then all liability of the Company shall terminate with regard to the matter or matters for which prompt notice is required; provided, however, that failure to notify the Company shall in no case prejudice by the failure and then only to the extent of the prejudice.

3. No Duty to Defend or Prosecute.
The Company shall have no duty to defend or prosecute any action or proceeding to which the Assured is a party, notwithstanding the nature of any allegation in such action or proceeding.

4. Company's Option to Defend or Prosecute Actions; Duty of Assured to Cooperate.
Even though the Company has no duty to defend or prosecute as set forth in Paragraph 3 above:
a. The Company shall have the right, at its sole option and cost, to institute and prosecute any action or proceeding, interpose a defense, as limited in Paragraph 4 (b), or to do any other act which in its opinion may be necessary or desirable to establish the correctness of the assurances set forth in Schedule A or to prevent or reduce loss or damage to the Assured. The Company may take any appropriate action under the terms of this Guarantee, whether or not it shall be liable hereunder, and shall not thereby concede liability or waive any provision of this Guarantee. If the Company shall exercise its rights under this paragraph, it shall do so diligently.
b. If the Company elects to exercise its options as stated in Paragraph 4(a) the Company shall have the right to select counsel of its choice (subject to the right of the Assured to object for reasonable cause) to represent the Assured and shall not be liable for and will not pay the fees of any other counsel, nor will the Company pay any fees, costs or expenses incurred by an Assured in the defense of those causes of action which allege matters not covered by this Guarantee.
c. Whenever the Company shall have brought an action or interposed a defense as permitted by the provisions of this Guarantee, the Company may pursue any litigation to final determination by a court of competent jurisdiction and expressly reserves the right, in its sole discretion, to appeal from an adverse judgment or order.
d. In all cases where this Guarantee permits the Company to prosecute or provide for the defense of any action or proceeding, the Assured shall secure to the Company the right to so prosecute or provide for the defense of any action or proceeding, and all appeals therein, and permit the Company to use, at its option, the name of such Assured for this purpose. Whenever requested by

the Company, the Assured, at the Company's expense, shall give the Company all reasonable aid in any action or proceeding, securing evidence, obtaining witnesses, prosecuting or defending the action or lawful act which in the opinion of the Company may be necessary or desirable to establish the correctness of the assurances set forth in Schedule A to prevent or reduce loss or damage to the Assured. If the Company is prejudiced by the failure of the Assured to furnish the required cooperation, the Company's obligations to the Assured under the Guarantee shall terminate.

5. Proof of Loss or Damage.

a. In the event the Company is unable to determine the amount of loss or damage, the Company may, at its option, require as a condition of payment that the Assured furnish a signed proof of loss. The proof of loss must describe the defect, lien, encumbrance, or other matter that constitutes the basis of loss or damage and shall state, to the extent possible, the basis of calculating the amount of the loss or damage.

b. In addition, the Assured may reasonably be required to submit to examination under oath by any authorized representative of the Company and shall produce for examination, inspection and copying, at such reasonable times and places as may be designated by any authorized representative of the Company, all records, books, ledgers, checks, correspondence and memoranda, whether bearing a date before or after Date of Guarantee, which reasonably pertain to the loss or damage. Further, if requested by any authorized representative of the Company, the Assured shall grant its permission, in writing, for any authorized representative of the Company to examine, inspect and copy all records, books, ledgers, checks, correspondence and memoranda in the custody or control of a third party, which reasonably pertain to the loss or damage. All information designated as confidential by the Assured provided to the Company pursuant to this paragraph shall not be disclosed to others unless, in the reasonable judgment of the Company, it is necessary in the administration of the claim. Failure of the Assured to submit for examination under oath, produce other reasonably requested information or grant permission to secure reasonable necessary information from third parties, as required in the above paragraph, unless prohibited by law or governmental regulation, shall terminate any liability of the Company under this Guarantee to the Assured for that claim.

6. Options to Pay or Otherwise Settle Claims: Termination of Liability.

In case of a claim under this Guarantee, the Company shall have the following additional options:

a. To pay or tender payment of the Amount of Liability together with any costs, attorneys' fees, and expenses incurred by the Assured that were authorized by the Company up to the time of payment or tender of payment and that the Company is obligated to pay.

b. To pay or otherwise settle with the Assured any claim assured against under this Guarantee. In addition, the Company will pay any costs, attorneys' fees, and expenses incurred by the Assured that where authorized by the Company up to the time of payment or tender of payment and that the Company is obligated to pay; or

c. To pay or otherwise settle with other parties for the loss or damage provided for under this Guarantee, together with any costs, attorneys' fees, and expenses incurred by the Assured that were authorized by the Company up to the time of payment and that the Company is obligated to pay.

Upon the exercise by the Company of either of the options provided for in 6 (a), (b) or (c) of this paragraph the Company's obligations to the Assured under this Guarantee for the claimed loss or damage, other than the payments required to be made, shall terminate, including any duty to continue any and all litigation initiated by the Company pursuant to Paragraph 4.

7. Limitation Liability.

a. This Guarantee is a contract of Indemnity against actual monetary loss or damage sustained or incurred by the Assured claimant who has suffered loss or damage by reason of reliance upon the assurances set forth in Schedule A and only to the extent herein described, and subject to the Exclusions From Coverage of This Guarantee.

b. If the Company, or the Assured under the direction of the Company at the Company's expense, removes the alleged defect, lien, or encumbrance or cures any other matter assured against by this Guarantee in a reasonably diligent manner by any method, including litigation and the completion of any appeals therefrom, it shall have fully performed its obligations with respect to that matter and shall not be liable for any loss or damage caused thereby.

c. In the event of any litigation by the Company or with the Company's consent, the Company shall have no liability for loss or damage until there has been a final determination by a court of competent jurisdiction, and disposition of all appeals therefrom.

d. The Company shall not be liable for loss or damage to the Assured for liability voluntarily assumed by the Assured in settling any claim or suit without the prior written consent of the Company.

8. Reduction of Liability or Termination of Liability.

All payments under this Guarantee, except payments made for costs, attorneys' fees and expenses pursuant to Paragraph 4 shall reduce the Amount of Liability under this Guarantee pro tanto.

9. Payment of Loss.

a. No payment shall be made without producing this Guarantee for endorsement of the payment unless the Guarantee has been lost or destroyed, in which case proof of loss or destruction shall be furnished to the satisfaction of the Company.

b. When liability and the extent of loss or damage has been definitely fixed in accordance with these Conditions, the loss or damage shall be payable within thirty (30) days thereafter.

GUARANTEE CONDITIONS (Continued)

10. Subrogation Upon Payment or Settlement.

Whenever the Company shall have settled and paid a claim under this Guarantee, all right of subrogation shall vest in the Company unaffected by any act of the Assured claimant.

The Company shall be subrogated to and be entitled to all rights and remedies which the Assured would have had against any person or property in respect to the claim had this Guarantee not been issued. If requested by the Company, the Assured shall transfer to the Company all rights and remedies against any person or property necessary in order to perfect this right of subrogation. The Assured shall permit the Company to sue, compromise or settle in the name of the Assured and to use the name of the Assured in any transaction or litigation involving these rights or remedies.

If a payment on account of a claim does not fully cover the loss of the Assured the Company shall be subrogated to all rights and remedies of the Assured after the Assured shall have recovered its principal, interest, and costs of collection.

11. Arbitration.

Either the Company or the Assured may demand that the claim or controversy shall be submitted to arbitration pursuant to the Title Insurance Arbitration Rules of the American Land Title Association ("Rules"). Except as provided in the Rules, there shall be no joinder or consolidation with claims or controversies of other persons. Arbitrable matters may include, but are not limited to, any controversy or claim between the Company and the Assured arising out of or relating to this Guarantee, any service of the Company in connection with its issuance or the breach of a Guarantee provision, or to any other controversy or claim arising out of the transaction giving rise to this Guarantee. All arbitrable matters when the amount of liability is $2,000,000 or less shall be arbitrated at the option of either the Company or the Assured. All arbitrable matters when the amount of liability is in excess of $2,000,000 shall be arbitrated only when agreed to by both the Company and the Assured. Arbitration pursuant to this Guarantee and under the Rules shall be binging upon the parties. Judgment upon the aware rendered by the Arbitrator(s) may be entered in any court of competent jurisdiction.

12. Liability Limited to This Guarantee; Guarantee Entire Contract.

a. This Guarantee together with all endorsements, if any, attached hereto by the Company is the entire Guarantee and contract between the Assured and the Company. In interpreting any provision of this Guarantee, this Guarantee shall be construed as a whole.

b. Any claim of loss or damage, whether or not based on negligence, or any action asserting such claim, shall be restricted to this Guarantee.

c. No amendment of or endorsement to this Guarantee can be made except by a writing endorsed hereon or attached hereto signed by either the President, a Vice President, the Secretary, an Assistant Secretary, or validating officer or authorized signatory of the Company.

13. Severability.

In the event any provision of this Guarantee, in whole or in part, is held invalid or unenforceable under applicable law, the Guarantee shall be deemed not to include that provision or such part held to be invalid, but all other provisions shall remain in full force and effect.

14. Choice of Law; Forum.

a. Choice of Law: The Assured acknowledges the Company has underwritten the risks covered by this Guarantee and determined the premium charged therefor in reliance upon the law affecting interests in real property and applicable to the interpretation, rights, remedies, or enforcement of Guaranties of the jurisdiction where the Land is located.

Therefore, the court or an arbitrator shall apply the law of the jurisdiction where the Land is located to determine the validity of claims that are adverse to the Assured and to interpret and enforce the terms of this Guarantee. In neither case shall the court or arbitrator apply its conflicts of law principles to determine the applicable law.

b. Choice of Forum: Any litigation or other proceeding brought by the Assured against the Company must be filed only in a state or federal court within the United State of America or its territories having appropriate jurisdiction.

15. Notices, Where Sent.

All notices required to be given the Company and any statement in writing required to be furnished the Company shall include the number of this Guarantee and shall be addressed to the Company at **First American Title Insurance Company, Attn: Claims National Intake Center, 5 First American Way, Santa Ana, California 92707. Phone: 888-632-1642 (claims.nic@firstam.com).**

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/24/2023 has revealed that there are

2 ENVIROSTOR sites within approximately 1 mile of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there is 1 CPS-SLIC site within approximately 0.5 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/04/2023 has revealed that there are 59 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

Cortese: The sites for the list are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites).

A review of the Cortese list, as provided by EDR, and dated 09/19/2023 has revealed that there are 4 Cortese sites within approximately 0.5 miles of the target property.

HWTS: DTSC maintains the Hazardous Waste Tracking System that stores ID number information since the early 1980s and manifest data since 1993. The system collects both manifest copies from the generator and destination facility.

A review of the HWTS list, as provided by EDR, and dated 08/04/2023 has revealed that there is 1 HWTS site within approximately 0.001 miles of the target property.

WOOD MIDDLE SCH/ALAM	***420 GRANT ST***	***0 - 1/8 (0.000 mi.)***	***B12***	***30***

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2021 has revealed that there is 1 HAZNET site within approximately 0.001 miles of the target property.

EXECUTIVE SUMMARY

GEPAID: CAC000754760

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Commercial Offsite Facility Types:	Not reported
Quarterly Update:	Facility was issued a TTU Permit on July 13, 1989. Permit expired on July 13, 1994. The Facility applied for a permit renewal on December 31, 1996 but the phone number listed on the application was disconnected. On March 20, 2000, a memo was written that the addresses on file for the Facility were no longer valid. On April 19, 2000, a memo was written that the Facility had lost its business license. The EPA ID number for this facility is incorrect. The correct EPA ID number is CAD066569429

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Completed Document Type: Fact Sheets
Completed Date: 04/11/2012
Comments: The 30-Day Public Comment Period will begin April 18.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 05/14/2013
Comments: The report documented excavation of approximately 1,150 cubic yards of soil contaminated with low levels of lead. The site was cleaned up to residential standards. Targetted excavation areas ranged in depth from 2-4 feet below the ground surface. Dust was controlled through application of water and air monitoring was conducted. The soil was trucked off-site to the railroad terminal in Richmond for transport by railroad to Utah for proper disposal. Confirmation sampling showed the excavation was effective. Clean fill was imported from a quarry

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 09/19/2023

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 09/25/2023

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

Data Release Frequency: Varies

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

PHASE I ESA
420 GRAND STREET
ALAMEDA, CA 94501

TARGET PROPERTY COORDINATES

Latitude (North):	37.761315 - 37° 45' 40.73''
Longitude (West):	122.26198 - 122° 15' 43.13''
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	565007.7
UTM Y (Meters):	4179384.2
Elevation:	14 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	50005378 OAKLAND WEST, CA
Version Date:	2021
Northeast Map:	50005377 OAKLAND EAST, CA
Version Date:	2021
Southeast Map:	50005406 SAN LEANDRO, CA
Version Date:	2021
Southwest Map:	50003442 HUNTERS POINT, CA
Version Date:	2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

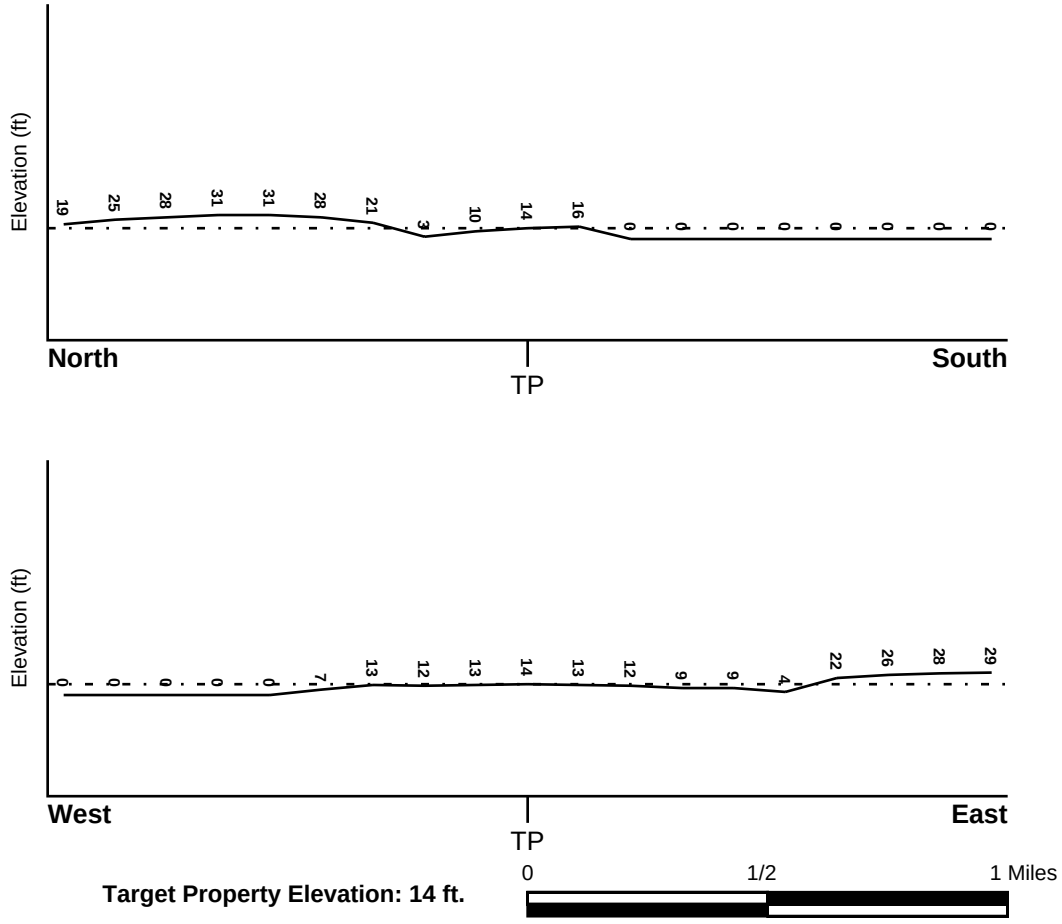

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 14 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06001C0069G	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06001C0088G	FEMA FIRM Flood data
06001C0235G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
OAKLAND WEST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Xeropsamments

Soil Surface Texture: sand

Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 145 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	59 inches	sand	Granular materials (35 pct. or less passing No. 200), Fine Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 6.6

Soil Map ID: 2

Soil Component Name: Water

Soil Surface Texture: sand

Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 3

Soil Component Name: Urban land

Soil Surface Texture: sand

Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by ACC Environmental Cons. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

P.O.# NA

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by ACC Environmental Cons. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by ACC Environmental Cons. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

William Sonneman, Principal

January 18, 1996

Dear Mr. Seto:

I have enclosed a copy of the report I was given as a result of the mercury clean-up done at Wood Middle School by Environmental and Safety Resources on December 9, 1995.

The Alameda Unified School District has procedures for a chemical spill in place. The policy is clearly stated in the Alameda Unified School District's Policy Manual. I have enclosed a copy of this policy. This policy was reviewed at a Wood School staff meeting on Monday, January 8, 1996. A memo was sent to all staff the day following the mercury incident reminding them of the procedures to follow if any hazardous spill occurs.

Thank you for the information concerning mercury contamination. Our awareness of this type of situation has been heightened at Wood Middle School. I believe proper procedures will be followed if any such situation occurs in the future.

Sincerely,

W.A. Sonneman

RE: 420 Grand Street, Alameda, CA 94501

Dear Mr. Sonneman:

On December 6, 1995, I met with you concerning the release of mercury from a student's necklace inside a classroom. Please inform me of the current status of the clean-up.

For your information, Senate Bill 198 requires every employer to establish, implement and maintain an effective written Injury and Illness Prevention Plan (Plan), and to provide specified training for employees. Contained in this Plan should be a seperate Contingency and Spill Prevention Plan. The Alameda Unified School District's procedures for the containment and clean-up of a hazardous material, and hazardous waste release/spill should also be described.

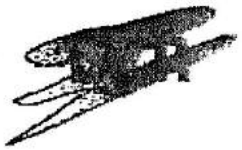

If you have any questions, please contact me at 567-6774.

Sincerely,

Larry Seto
Sr. Hazardous Materials Specialist

Report of Metallic Mercury Spill, Wood Middle School, Alameda,
ESR Project Reference #C95-1401

On December 9th, 1995, an Environmental Health and Safety (EHS) Specialist of Environmental & Safety Resources (ESR) conducted a remediation of a small metallic mercury spill at the Wood Middle School in Alameda, California. Using a Gerome mercury vapor analyzer, Specialist Richard Mainzer located and recovered a very small quantity of metallic mercury from the floor of classroom number 206.

The initial survey of the room 206 did indicate that mercury vapors were present in the ambient air. However the levels were in concentrations so low as to pose no known threat to human health and safety (0.002 mg/m^3). An area near the right front of the classroom had been impacted by the spill which spanned approximately 25 square feet. Vapor concentrations were higher near the floor in the immediate vicinity of the spill. General ventilation was created in the classroom to reduce ambient vapor concentrations.

The metallic mercury was extracted with the use of a specialized vacuum system. This system routinely vaporizes portions of recovered mercury and then filters out these vapors in an activated carbon filter. In this case, such a small quantity of *metallic* mercury was spilled that the entire amount was vaporized by the vacuum leaving no hazardous waste for disposal. Vapor readings from the waste container were negligible (0.000 mg/m^3 on the Gerome).

Environmental & Safety Resources' EHS Specialist vacated the classroom when all traces of metallic mercury had been removed from the room and ambient vapor concentrations reached zero. Even though no metallic mercury remains in classroom 206, ESR recommends that the floor be mopped and waxed before students are allowed in the area. There should be no lasting impact on the safety of this classroom.

Sincerely,

Richard Mainzer
EHS Specialist

PERMISSION GIVEN TO INSPECT FACILITY: YES ☒ NO ☐

OTHER COUNTY PROGRAMS: UST ☐ HMBP ☐ UR ☐

REMARKS: A student brought a necklace to school from Mexico that contained mercury. The necklace fell on the floor and mercury was released onto the floor of the classroom. A clean up request was made from the school district for advice. Alameda Environmental Health then contacted the Fire Dept. to handle the situation.

HAZARDOUS WASTE GENERATOR INSPECTION REPORT

STID #:	FACILITY NAME: Will C. Wood Middle School	PG. 1 OF 2

SUPPLEMENTAL FORM

It is recommended, at a minimum the following actions be taken immediately:

1) Contact a certified industrial hygienist to monitor and survey the classroom + Darkroom where the mercury was released and stored.
2) Classroom should be locked, and off-limits to all personal until the certified industrial hygienist certifies the classroom is safe (free of mercury and its vapors)
3) The necklace and droplets of mercury should be stored ~~in a bottle~~ in an air tight container, and placed in a locked cabinet until time of disposal
4) The necklace and mercury droplets must be disposed of as a hazardous waste. Contact Alameda County Household Hazardous Waste @ 670-6460 and schedule an appointment for disposal of the necklace + mercury.
5) All parents of students who may have been exposed should be contacted immediately.

CHEMICAL ACCIDENT

1. DEFINITION/DESCRIPTION

Chemical accidents of disaster magnitude would include tank truck accidents involving large quantities of toxic gases, or toxic liquids. This type of accident will likely be reported by an outside source, unless the accident has occurred immediately adjacent to the school site.

2. IMMEDIATE ACTION

Principal

a) Receive information about/review situation to determine if evacuation routes are safe (move crosswind to avoid fumes).
b) Determine which action should be implemented.
c) Sound alarm for appropriate action.
d) Notify/maintain contact with Superintendent/Public Information Officer.
e) Notify staff of treatment plans/triage area for contaminated persons.
f) Determine what further action to take.

Teachers

a) Implement appropriate action, using alternate evacuation route if required.
b) Move crosswind--never up, or downwind,--to avoid fumes.
c) Maintain control of students.
d) Take roll. Report students who are absent.
e) Notify principal of any problems in/around area.
f) Notify principal of need for first aid as appropriate.
g) Do not return to the school until principal declares the area safe.

Custodian

a) Review situation to assess extent of spill, wind direction, and proximity to building.
b) Report findings to principal.
c) Be prepared to direct fire/police department to spill site.
d) Assist in spill clean-up or containment as appropriate.

Nurse and Other Available Personnel

a) Assist with evacuation/triage, as needed, and provide first aid.
b) Direct teachers on the isolation of contaminated individuals if necessary to prevent cross-contamination.

3. FOLLOW UP ACTION

Principal

a) Determine, in coordination with M.O.F./Fire Department, whether buildings are habitable.
b) Notify staff/students of any modification in schedule.
c) Work with Public Information Office to publicize information regarding accident.
d) Arrange school site meeting to provide information to staff.

Principal's Secretary

a) Screen all calls. Refer public to Public Information Office.
b) Refer media to Public Information Office.
c) Prepare necessary bulletins.

Teachers

a) Read bulletins/announcements as provided by principal.
b) Refer all media to principal's office.
c) Cooperate with school site team to provide follow-up as appropriate.
d) Refer for counseling students who may be at risk.
e) Return to normal instructional activities as soon as possible.

Material Safety Data Sheet

May be used to comply with OSHA's Hazard Communication Standard, 29CFR, 1910.1200. Standard must be consulted for specific requirements.

SECTION 1

Manufacturer's Name:	**Quicksilver Recycling, Incorporated**	**Emergency Telephone Number: 1-800-863-7287**
Manufacturer's Address:	200 Valley Drive, Suite 2 Brisbane, CA 94005	Other Information Calls: 415-468-2000

SECTION 2 - HAZARDOUS INGREDIENTS/IDENTITY

Chemical & Common Names	OSHA PEL	ACGIH TLV	Other Exposure Limits	Percent	CAS Number
Mercury, Hg, Quicksilver	0.05 mg(Hg)/m3	0.05 mg(Hg)/m3	TWA 0.10 mg(Hg)/m3	100	7439-97-6

SECTION 3 - PHYSICAL & CHEMICAL CHARACTERISTICS

Boiling Point	675° F (357° C)	**Specific Gravity**	13.6 (Water = 1)
Vapor Density	7.0 (Air = 1)	**Vapor Pressure**	0.0012 MMGH @20°C
Solubility in Water	Insoluble	**Reactivity in Water**	N.A.
Appearance & Odor	Silver-white heavy liquid metal	**Melting Point**	-38° F (-39° C)

SECTION 4 - FIRE & EXPLOSION DATA

Flash Point:	N.A	LEL:	N.A.	UEL:	N.A.
Extinguisher Media:	Dry chemical, carbon dioxide, water spray or foam. 1984 Emergency Response Guidebook, DOT P 5800.3				
Special Fire Fighting Procedures:	For larger fires use water spray, fog or alcohol foam. Move containers away from fire if possible. Cool containers exposed to flames with water from side until well after fire is out. Use agents suitable for type of fire.				
Unusual Fire and Explosion Hazards:	Use water in flooding amounts as a fog. Avoid breathing poisonous and corrosive vapors. Keep Upwind.				

SECTION 5 - PHYSICAL HAZARDS (REACTIVITY DATA)

Conditions to Avoid:	Does not ignite readily. Flammable, poisonous gasses may accumulate in tanks and hopper cars. May ignite combustibles.
Hazardous Decomposition Products:	Thermal decomposition products include toxic mercury vapors and Oxygen.
Hazardous Polymerization:	None Known

Elemental Hg, liquid and vapor, is toxic due to it's liquid solubility, lack of charge, and membrane permeability. Inhaled vapors (80%) diffuse rapidly through alveoli membranes into the blood and are systematically transported to body tissues, including the brain. Exposure to high concentrations (1.2 mg/m3) of vapors for brief periods can cause pneumonitis, chest pains, coughing, and dyspnea. Later stomatitis, gingivitis, and salivation occur. Hg can be absorbed slowly through the skin. Chronic symptoms involve the CNS with tremors and various neuropsychiatric disturbances. The TLV would be exceeded if the contents of a small Hg clinical thermometer were dissipated in a closed 100 x 100 x 15 foot room. G.I. uptake of Hg is slow (5%).

First Aid:

Eye Contact: Flush with running water for 15 minutes including under the eyelids.

Skin Contact: Remove contaminated clothing. Wash affected area with soap and water.

Inhalation: Remove to fresh air. Restore and/or support breathing as needed. Administer Oxygen for chemical pneumonitis.

Ingestion: Gastric lavage with 5% solution of sodium formaldehyde sulfoxylate, followed by 2% NaHCO3, and finally leave 250 cc of sodium formaldehyde sulfoxylate in the stomach.

Seek medical assistance for further treatment, observation and support.

Routes of Entry:

Skin Contact: Irritation/sensitizer/neurotoxin/nephrotoxin.
Acute exposure - May cause redness and irritation. Sensitization Dermatitis may occur in previously exposed workers. Substance may be absorbed through intact skin causing anuria.

Eye Contact: Irritant.
Acute exposure may cause irritation. Solutions are corrosive and may cause corneal injuries or burns.
Chronic exposure - Mercury may be deposited in the lens of the eye, causing visual disturbances.

Ingestion: Neurotoxic, Nephrotoxic.
Acute exposure - When ingested necrosis begins immediately in the throat, mouth, esophagus and stomach. Within a few minutes, violent pain, profuse vomiting and severe purging may occur. Patient may die within a few minutes from fluid/electrolytic losses and peripheral vascular collapse, but death (from uremia) is usually delayed 5 to 12 days.

Inhalation: Irritant/ Sensitizer/Neurotoxin. 28 Mg/M3 is immediately dangerous to life and health.
Acute exposure - Inhalation of a high concentration of mercury vapors can cause almost immediate dyspnea, cough, fever, nausea, and vomiting, diarrhea, stomatitis, salivation and metallic taste. Symptoms may resolve or may progress to necrotizing bronchiolitis, pneumonitis, pulmonary edema and pneumothorax. This syndrome is often fatal in children. Acidosis and renal damage and renal failure may occur. Inhaling violent organic mercurials in high concentrations causes metallic taste, dizziness, clumsiness, slurred speech, and sometimes, fatal convulsions.
Chronic exposure: Inhalation of mercury vapor, dust, over a long period causes mercurialism. Findings are extremely variable and include tremors, salivation, stomatitis, loosening of teeth, blue lines on gums, pain and numbness in extremities, insomnia, irritability and instability, hallucinations and evidence of mental deterioration.

Store in closed unbreakable containers (Polyethylene) in a cool, dry, well-ventilated area away from sources of heat. Protect containers from physical damage.

Mercury evaporates very slowly. Spilled Hg forms many tiny globules that will evaporate faster than a single pool and can develop sufficient concentrations of vapors in an unventilated area. Such vapors can be poisonous, especially if breathed over a long period of time. Heated Hg evolves a high level of toxic vapors.

DO NOT TOUCH SPILLED MATERIAL. STOP LEAK IF YOU CAN DO IT WITHOUT RISK. FOR SMALL SPILLS, TAKE UP WITH SAND OR OTHER ABSORBENT MATERIAL AND PLACE INTO CONTAINERS FOR LATER DISPOSAL. A MERCURY SPILL KIT MAY ALSO BE USED FOR SMALL SPILLS IN THE WORKPLACE. FOR LARGER SPILLS, DIKE FAR AHEAD OF THE SPILL FOR LATER DISPOSAL. KEEP UNNECESSARY PEOPLE AWAY. ISOLATE HAZARDOUS AREA AND DENY ENTRY.

	Specific Comments	ACC Response
3c.	The revised Phase I should address and evaluate all supplemental concerns listed below and not previously addressed in the Phase I. The assessment should include a short description of the issue, resource information used (recognized publication and/or database, federal, state and/or local agency, etc.). Support documentation should be provided as appropriate.	ACC updated Section 5.0 of the Phase I report to include evaluation of additional supplemental concerns not previously addressed.
4.	The Phase I indicated there are transformers and a hydraulic elevator present on the property. Please include them on Figure 2 and clarify if there were soil samples for polychlorinated biphenyls (PCBs) taken near these locations in the Phase I Addendum.	ACC updated Figure 2 of Phase I Addendum Report with the locations of the transformers and hydraulic elevator. Surface and subsurface soil samples collected at two (2) locations in the area of transformer on August 1, 2024. Locations added to Figures 3 & 4. Samples analyzed for PCBs by method 8082. PCBs were not detected in soil samples above laboratory reporting limits. Report updated. Section 3.7 and 5.0 of Phase I ESA report updated to clarify that the elevator was installed at the Subject Property in 2001, which is after the ban of PCBs in hydraulic oils. Samples for PCBs were not collected in this area.
5.	The Phase I indicated that naturally occurring asbestos could not be ruled out. Since the majority of the site is made up of fill material, DTSC recommends sampling for asbestos.	Surface and subsurface soil samples collected at eight (8) locations across the Site on August 1, 2024 to characterize fill material for naturally occuring asbestos. Locations added to Site Figures 3 & 4. Asbestos was not detected in soil samples above laboratory reporting limits. Report updated.
6.	In section 2.1 Site Location of the Phase I Addendum, please indicate how many acres of each parcel the Site makes up.	Acreage of each Site parcel added to Section 2.1 Site Location of the Phase I Addendum.
