The Special Service department through multiple grants have purchased new heart rate technology to be utilized in your child's Adapted Physical Education (APE) class. This technology will help collect data on your child's health in regards to cardiovascular endurance, and monitor their level of activity for different curriculum. The technology will aid the APE curriculum in collecting relevant data on your child's progress.

We are piloting this technology with the hope of expanding to other schools in the district. We are looking for ways to inspire your child to become a healthier student. We are also trying to provide better care in how we teach individual students, by matching the interest of students to the curriculum that we teach.

Mr. Swearingen has used IHT Spirit technology in the past, and is excited to be bringing this program to Allen Park. The data that will be collected will not be housed or owned by IHT. We have purchased the technology and interface to monitor and track individuals progress and to provide an exceptional learning environment, it will be kept confidential and will only be used for educational purposes.

If you have any questions on how or why we are collecting this data please feel free to email Deak Swearingen at swearingen@appublicschools.com.

I **(guardian signature)**_____ , give my son/daughter

_____ permission to participate in the use of the "heart rate monitor" for Adapted P.E. If I choose to discontinue my child's participation, I will contact Deak Swearingen.
