

Notice to Parents/Students of Sedalia School District #200

The Individuals with Disabilities Education Act (IDEA) requires a school district to provide public notice when personally identifiable information is no longer needed to provide educational services to a child with a disability. The IDEA suggests that personally identifiable information is no longer needed to provide educational services to a child after the child has left the district for a period of three (3) successive years, or after the child turns twenty-one (21) years of age, or whichever occurs first. The district may destroy such information after this period. With respect to IDEA, The Sedalia School District #200 chooses to keep paper records for a period of five (5) successive years after a child has left the district.

The Sedalia School District #200 hereby notifies you that personally identifiable information is no longer needed to provide educational services to students who left the district in the year of 2020 or before. The paper records have been scanned to an electronic format and the district will dispose of the paper original for students who left during the year of 2020 and before.

The date of destruction for paper originals will be Thursday, October 30, 2025 at 8:00 a.m. If you are a parent or student from this time frame and have questions, please contact the Sedalia School District Special Services office at (660) 829-6450.
