To Whom It May Concern:

At Immaculata Catholic School, the safety and well-being of our students and staff are our top priorities. We adhere to all federal and state regulations, ensuring strict compliance with safety protocols, including those related to asbestos management.

We are pleased to inform you that our facilities have been certified as asbestos-free. We possess official letters from certified engineers confirming that our buildings are safe and devoid of any asbestos materials.

Recently, we proactively engaged the Health Hazards Control Unit (HHCU) of North Carolina to conduct an on-site inspection. The HHCU completed their inspection and confirmed that our institution is in full compliance with all applicable asbestos safety standards.

All related documentation is available for review at the principal's office. Should you have any questions or concerns, please feel free to reach out to us.

Thank you for your continued trust and support.

Sincerely,

Johnny Acosta
Director of Facilities
Immaculata Catholic School

Re: AHERA Initial Management Plan: Immaculate Conception Catholic School
Durham, Durham County, NC

Dear Mr. Acosta

On February 27, 2025, the Health Hazards Control Unit (HHCU) received your Asbestos Hazard Emergency Response Act (AHERA) asbestos management plan for the following schools:

<u>School Name</u>	<u>Number</u>
Immaculate Conception Catholic School	

The management plan has been reviewed and is approved. Approval of a management plan by this office does not imply that the school is in compliance with all AHERA requirements. It means only that the items deemed necessary by the HHCU for approval of the management plan were adequate. The EPA may cover additional items should they choose to conduct a compliance inspection at your facility.

Thank you for working with us on complying with the AHERA regulations. If you have any questions or need further information concerning this matter, please contact James Lueck or myself at (919) 707-5970.

Sincerely,

Edward H. Norman, MPH
Program Manager
Health Hazards Control Unit
