## Single-Year Completion Registered Manufacturing Applied Technologies Program Schedule

The Manufacturers' Association Registered Manufacturing Applied Technologies Pre-Apprenticeship Program is designed for high school **Juniors or Seniors** who are considering Apprenticeship after graduation. This interactive Pre-Apprenticeship provides the opportunity to explore high-demand STEM careers before graduation.

- |  |   |                          |
|--|---|--------------------------|
| ✓ Kick off                                     | ✓ SolidWorks Design                             | ✓ Three Shop days        |
| ✓ Precision Measurement / Formula Applications | ✓ Emerging Technologies / 3D Printing           | ✓ Graduation Celebration |
| ✓ OSHA 10 Certification                        | ✓ Intro to Blueprint Reading / Quality Controls |                          |

2025-26  
Schedule

## What can a student do with a pre-apprenticeship?

- ➔ **Apply for a registered apprenticeship (RA)**, with a fantastic 67 hour advantage! Apprenticeship provides a valuable "foot up" to employment for any of the thousands of manufacturers in Pennsylvania, the nation, and globe.
- ➔ **Use the transferable, portable, and in-demand skills** learned to seek an apprenticeship or employment in another industry.
- ➔ **Start working:** Manufacturers are looking for people and often offer opportunities for additional (often paid for or reimbursed) education and training. Through the program, students will have the opportunity to network with employers!
- ➔ **Go to college:** continue their education with work-based learning experience, direction, and basic skills knowledge.
