SCHOOLOGY

for parents

This is a comprehensive parent guide for all things Schoology! You can use the Table of Contents below to find the information relevant to you.

SCHOOLOGY
for parents

In the past, parents had to create their own Schoology accounts and get their student's code from the front office.

As of August 2025, parent accounts are automatically created through our integration with Skyward/Family Access Integration.

If you already had a Schoology parent account before Fall 2025...
Nothing will change. You can continue logging in as usual.

If your old account was created with an email that does not match the email address you provided the district when you enrolled your student, **then follow the steps below.**

If you are new to the District

1. Go to the Schoology Login Page: https://app.schoology.com/login
2. Click **"Forgot Your Password"**
3. Enter the **email address you provided to SVSD during enrollment** and select **"Send My Login Info"**
4. Check your email for a link to set your Schoology password.

Mobile View Instructions

When you first login, your screen may look blank. To see your student's activity, you will need to switch to their view. If you are on your phone, follow these instructions.

1. Click on the **menu** icon in the upper left corner. Select **My Children.** Click on your student.
2. Now you are looking at your **Student's View** of Schoology. Activity such as **Course Updates** and **Assignments** will populate the screen.
3. To see **Grades**, click More, Grades, and Grade Report. Click on each course and grades will populate below.

Tips for Understanding Grades

When looking at your student's grade in Schoology, you can differentiate between assignments that are missing, graded, and turned it but not yet graded.

You can see recent assignment submissions on the Student Activity Page

Missing Assignments are marked with an orange hexagon.

Graded Assignments have a score.

Ungraded Submitted assignments have a paper icon.

**Ungraded Tests/Quizes** are marked with a dash (regardless of whether or not they have been turned in).

Family Digest

You can adjust how often your receive updates about your student's activity in Schoology in the Family Digest.

Once you are logged in, make sure you are on your student's profile.

1. If your name is in the top right corner of your screen, click on it, and then select a child. Your **Digest** settings will be the same for all of your children, so it doesn't matter which child you pick right now. Click on the small white carrot next to your child's name in the top right corner of your screen, then select **Settings**.
2. Select the **Notifications** tab, then set your preferences.
