#### 1. Narrative description of the Prop 28 arts education program(s) funded. (2500 character limit).

Proposition 28 funding provided our district with the opportunity to expand and enrich arts education for students across all grade levels. With these funds, the district invested in new equipment and supplies to strengthen hands-on learning in visual and performing arts programs. This included updated materials for music, ceramics, media arts, film, vocal performance, and color guard, ensuring students have access to quality resources that support creativity and skill development. In addition, Prop 28 resources were used to enhance staffing in order to sustain and grow existing arts programs. Schools were able to add instructional support that broadened access and reduced class sizes, creating more opportunities for students to participate in the arts. At the elementary level, funding supported the expansion of the music program to an additional grade level, allowing more students to build foundational skills earlier in their educational journey. At the secondary level, the district offered additional course sections in high-demand programs such as music, media arts, and ceramics, enabling more students to enroll and pursue their artistic interests. Together, these investments have strengthened the district's commitment to providing equitable access to arts education. By funding staffing, supplies, and program expansion, Prop 28 has ensured that more students can participate in rich, engaging, and meaningful arts learning experiences that foster creativity, collaboration, and lifelong appreciation for the arts.
