**Meal Programs/Sponsorship:**

The National School Lunch Program (NSLP) is a federally assisted meal program operating in public and nonprofit private schools and residential child care institutions. It provides children nutritionally balanced, low-cost, or free lunches each school day. CREC also offers breakfast and after-school snack programs in some schools. CREC sponsors meal programs in most locations; however, some CREC sites are sponsored by other School Food Authorities (SFA). The Food Service Program Coordinator handles coordination of meal programs among the different sponsors and towns. Please contact the Food Service Program Coordinator if you have questions about sponsorship. See the site list at the end of the document for more details.

### **Healthy Food Certification:**

Section 10-215f of the Connecticut General Statutes requires that each board of education or governing authority for all public schools participating in the National School Lunch Program (including the Connecticut Technical High School System, charter schools, interdistrict magnet schools and endowed academies) must certify annually to the Connecticut State Department of Education (CSDE) whether the district will follow the Connecticut Nutrition Standards for all foods sold to students separately from reimbursable school meals. **All CREC Schools participate in this program.**

The Connecticut Nutrition Standards apply to all sources of food sales on school premises at all times including, but not limited to, school stores, vending machines, school cafeterias and any fundraising activities on school premises. **Only approved items may be sold in all CREC schools.** Districts that opt to implement healthy food certification (HFC) receive an additional 10 cents per lunch, based on the total number of reimbursable lunches (paid, free and reduced) served in the district in the prior school year.

### **State Competitive Foods Regulations:**

Regulations of Connecticut State Agencies apply to all public schools that participate in the USDA Child Nutrition Programs. The sale or dispensing of candy to students is prohibited anywhere on school premises from 30 minutes before the start of any state or federally subsidized meal or milk program (National School Lunch Program, School Breakfast Program, After-School Snack Program and Special Milk Program) until 30 minutes after the end of the program. Any food and beverage sales held anywhere on school premises during this time frame must comply with this regulation, including beverages that meet the requirements of state statute and food that meets the Connecticut Nutrition Standards. Regulations also prohibit coffee, tea and soft drinks during this time frame.

### **State Beverage Requirements:**

Only five categories of beverages can be sold to students in public schools at all times and from all sources including, but not limited to, cafeterias, vending machines, school stores and fundraisers. This statute

applies to all public schools, regardless of whether they participate in the USDA Child Nutrition Programs or healthy food certification (see “Healthy Food Certification”). Beverages that do not meet the statutory requirements can be sold to students only if the board of education votes to allow exemptions and the beverages are sold at the location of events that occur after the school day or on the weekend, provided they are not sold from a vending machine or school store. Prohibited beverages include soda (regular and diet), coffee (regular, decaffeinated and iced), tea (regular, herbal and iced), hot chocolate, sports drinks, energy drinks, and any other beverages that do not meet the statutory requirements.

### **Student Nutrition and Physical Activity (Student Wellness Policy):**

The Capitol Region Education Council policy #6142.10 (a) recognizes that student wellness and proper nutrition are related to physical well-being, growth, development, and readiness to learn. CREC is committed to providing a learning environment that promotes student wellness, proper nutrition, nutrition education, and regular physical activity as part of the total educational experience. In a healthy school environment, students will be exposed to, and participate in, positive nutritional and lifestyle practices that can improve student achievement.
