Re: Second Follow Up Lead Testing in School Drinking Water

Dear Mr. Christ:

Included with this letter is Stohl Environmental LLC's report for the Lead in Drinking Water Resampling performed for Holland CSD, including:

- High School – 103 Canada St., Holland, NY

This report is prepared to assist school districts in complying with the requirements of 10 NYCRR Subpart 67-4: *Lead Testing in School Drinking Water*, by identifying the sources of potable water with lead concentrations greater than the NYS "Action Level of 5 parts per billion (ppb)".

Recap of Initial Sampling and Analysis: In Compliance with NYS regulations, initial first draw water sampling was completed on May 17, 2025 and a total of 6 samples were identified as containing lead concentrations above the NYS Action Level of 5 ppb. Follow-up sampling occurred on August 7, 2025 on the 6 outlets identified as containing lead concentrations above the NYS action level. A total of 4 of the resampled outlets were identified as containing lead concentrations above the NYS Action Level of 5 ppb.

Mitigation by District and Follow-up Sampling by Stohl Environmental LLC:

- Following the receipt of initial sampling results on July 9, 2025 and the resampling results on August 25, 2025, in accordance with guidance received from NYS, the District is reported to have prohibited use of the outlets analyzed as above the NYS Action Level of 5 ppb "(1) a lead remediation plan is implemented... and (2) test results indicate that the lead levels are at or below the action level".
- Subsequent to reported mitigation by the District, Stohl Environmental LLC was requested to perform additional follow-up sampling and laboratory analysis on 3 of the 4 outlets identified as containing lead concentrations above the NYS action level.
- Follow-up sampling was performed by Stohl Environmental LLC in accordance with the requirements and protocols outlined in NYS regulations, as well as USEPA Technical Guidance Document "3-T's for Reducing Lead in Drinking Water in Schools".

- Results of Follow-up Sampling: As detailed in Section 1.2 (*Executive Summary*) of the accompanying report, based upon the follow-up sampling and analysis performed, the following is reported:
 - Of the 3 outlets sampled during the post mitigation follow up on September 24, 2025:
 - 2 outlets were analyzed by a certified and independent laboratory as at or below the action level; thus cleared for use.
 - 1 outlet was analyzed by a certified and independent laboratory as above the action level; thus needing further action.

Thank you for the opportunity to be of service to Holland CSD.

Sincerely,
Stohl Environmental, LLC.

Michael Scinta
EPA Lead Risk Assessor

Lead Testing in School Drinking Water

Prepared for:

Holland CSD

Conditions as of September 24, 2025

Summary Tabulation

Lead in Drinking Water Investigation

- 1.1. Scope of Work and Sampling Protocol
- 1.2. Executive Summary of Sampling and Analysis
- 1.3. Response Actions Required Under NYS Regulations
- 1.4. Laboratory Analytical Reports and Chain of Custody Documents
- 1.5. Laboratory Certifications

1.1 Scope of Work and Sampling Protocol:

Stohl Environmental was retained by Holland CSD to perform sampling and analysis of potable water for lead concentrations. Sampling was performed in the following building:

- High School – 103 Cananda St., Holland, NY

Scope of Work:

Stohl Environmental was charged with collecting first-draw water samples from outlets within Holland High School. Outlets are defined in NYS regulations as: “a potable water fixture currently or potentially used for drinking or cooking purposes, including but not limited to a bubbler, drinking fountain, or faucets”.

Sampling Protocol:

In accordance with NYS regulations, **Subpart 67-4: Lead Testing in School Drinking Water**, and the EPA guidance document, **3Ts for Reducing Lead in Drinking Water in Schools**, Stohl Environmental’s protocol can be summarized as follows:

- **First-draw samples** of 250 milliliters (mL) were collected from cold water outlets before any water was used. Sampling was coordinated with District representatives to assure that water was motionless in the pipes for a minimum of 8 hours, but not more than 18 hours before sample collection.
- **Laboratory Analysis:** Samples were submitted following strict chain-of-custody protocols to an independent laboratory approved by the NYS Department of Health’s Environmental Laboratory Approval Program (ELAP).

1.2 Executive Summary of Sampling and Analysis:

Summary of Samples Collected at Holland High School:

Building Name	Date of Sampling	Total Samples	At or Below Action Level*	Above Action Level*
Holland High School	May 17, 2025	31	25	6
	August 7, 2025	6	2	4
	September 24, 2025	3	2	1

**NYS Action Level is 5 parts per billion*

Listing of Outlets Requiring Remediation

The following outlets were analyzed above the NYS Action Level:

Sample #	Location	Fixture/Outlet Type	Laboratory Analysis (in ppb)		
			5/17/25	8/7/25	9/24/25
133.1-14	Kitchen Handwash	Sink	13.9	9.3	-
133.1-15	Kitchen Double Bowl Left	Sink	36.1	6.0	3.52 – Cleared
133.1-16	Kitchen Double Bowl Right	Sink	6.0	4.7 – Cleared	N/A
133.1-17	Nurses Office Sink	Sink	5.2	3.2 - Cleared	N/A
133.1-19	FACS West Wall South Sink	Sink	10.7	6.7	<1.0 – Cleared
133.1-20	FACS West Wall North Sink	Sink	6.5	36.6	114

1.3 Response Actions Required Under NYS Regulations, Section 67-4.4:

For outlets analyzed with a lead concentration more than the NYS Action Level, regulations require:

- (a) Prohibit use of the outlet until:
 - (1) a lead remediation plan is implemented to mitigate the lead level of such outlet; and
 - (2) test results indicate that the lead levels are at or below the action level;
- (b) Provide building occupants with an adequate supply of potable water for drinking and cooking until remediation is performed;
- (c) Report the test results to the local health department as soon as practicable, but no more than 1 business day after the school received the laboratory report; and
- (d) Notify all staff and all persons in parental relation to students of the test results, in writing, as soon as practicable but no more than 10 business days after the school received the laboratory report.
