    - **Mixing Matter** introduces students to the wonders of chemistry through engaging, hands-on experiments. In the first half, students explore chemical reactions with exploding soap monsters and fiery demonstrations that showcase the power of mixing matter. The second half reveals the superCOOL side of chemistry with experiments using liquid nitrogen. This program connects to the new PA STEELS Standards through phenomena-based learning. Thanks to Kindergarten teacher Michelle Siesko, who applied for a scholarship, and our generous PTO, the assemblies are fully funded and will be offered free of charge to students.
