

Carroll ISD Emergency Communications

Carroll ISD provides parents and guardians with timely electronic notifications regarding student safety and emergencies. The purpose of these notifications is to keep families informed and engaged in their child's well-being.

Safety and Emergency Notifications

In the event of an emergency, threat, or other safety-related incident affecting students, parents or guardians will receive immediate electronic notifications. Notifications will be sent as #SafeDragon alerts via the District's social media accounts, text message, and District email managed by the Communications Department. Principals and campus staff may participate in communications, but the primary source of information during an emergency will be the #SafeDragon alert system.

Staff Responsibilities

Campus principals, assistant principals, and designated administrative staff are responsible for working closely with District Administration and the Communications Department to ensure accurate and timely information is communicated during an emergency, as well as confirming messages are delivered and documenting all notification actions.

Parent Responsibilities

Parents and guardians are responsible for keeping all emergency contact information current in Skyward. Please ensure phone numbers, emails, and approved pickup persons are updated so the District can reach you quickly and release your student safely in the event of an emergency.

Accessibility and Updates

Parents and guardians may update their contact information at any time through their child's campus or in Skyward. Carroll ISD will make reasonable efforts to ensure all notifications are accessible and received in a timely manner.
