SCHOOL DISTRICT OF LA CROSSE

PROJECT PROGRESS REPORT

June + July 2025 Update

Elementary Main Entrance

WHAT'S NEW?

Construction is underway on the Central High School district office. In addition, the final exterior design for the New Elementary School was formally presented to the La Crosse School Board.

PLANNING & DESIGN UPDATE

Design progress continued across several fronts in June and July. At the New Elementary School, teams reviewed overall landscaping to ensure a cohesive site experience, and further developed the interior design concept to support both function and identity. A preliminary presentation of interior finishes was shared with stakeholders, offering a first look at how the building's character is taking shape. The academic layout and key amenities were also reviewed in detail to confirm alignment with educational programming needs.

For the State Road addition, efforts were focused on enhancing the building's exterior to create a more welcoming arrival experience. A preliminary building code review was also conducted with the State of Wisconsin to help identify any early technical considerations. Throughout the month, various design coordination meetings with engineering teams supported progress across building systems and infrastructure.

NEXT STEPS

Design refinement will continue at both State Road and the New Elementary School, particularly as interior environments and systems take shape. Construction activity will increase in the coming weeks, and updates will continue to be shared with stakeholders and the broader community.
