SCHOOL DISTRICT OF LA CROSSE

PROJECT PROGRESS REPORT

May 2025 Update

WHAT'S NEW?

The district office relocation project has officially been awarded to a general contractor, marking a major milestone as we transition toward construction. A comprehensive project update was also presented to the La Crosse School Board, outlining progress across all active sites. Community engagement efforts continued with a neighborhood meeting in Hogan, where residents received updates and shared feedback on the New Elementary School project.

PLANNING & DESIGN UPDATE

Design development remains active at the New Elementary School while the State Road Addition has moved into construction documents. A virtual walk through of State Road provided stakeholders a chance to preview progress, while the final interior finishes for the addition were reviewed and refined. Exterior material selections for State Road were also adjusted to better align with the existing architecture. At the New Elementary School site, the team finalized the building's exterior design and explored key site elements, including the plaza and main entrance. A sneak preview of interior concepts was shared to help bring the vision to life.

Staff engagement continues to inform planning. We met with staff from Emerson and Spence to visualize specific classroom and support spaces. Meanwhile, coordination meetings between the photovoltaic (PV) designer, geothermal consultant, and energy company advanced our sustainability goals.

NEXT STEPS

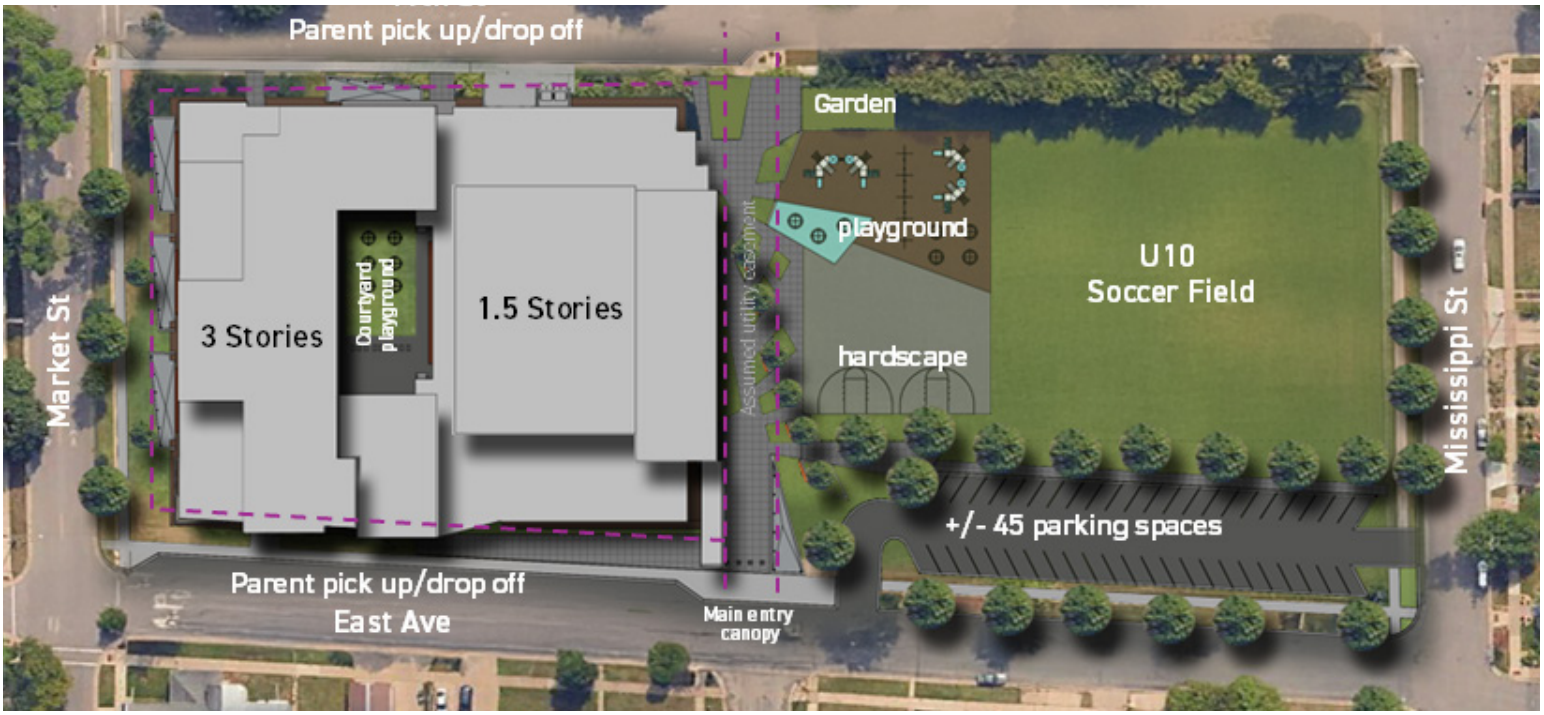

Enrollment is underway for a sustainability incentive program that will support the integration of renewable energy systems. Design documentation and construction planning will continue across multiple projects, with emphasis on refining building systems, interior environments, and site development. As progress moves forward, continued coordination with district staff, consultants, and the community will remain a top priority.
