SCHOOL DISTRICT OF LA CROSSE

PROJECT PROGRESS REPORT

January 2025 Update

WHAT'S NEW?

Project planning meetings began in early January and will continue every other week moving forward. The architects (Bray) will meet with district administration biweekly to review the project's progress.

The project schedule is tentatively set as follows:

Central High School Renovation for District Office
May 2025 to October 2025

State Road Addition and Renovation
September 2025 to August 2026

New Elementary at Hogan Site
March 2026 to August 2027

Survey crews have been on-site at each location to document existing conditions.

PLANNING & DESIGN UPDATE

Planning and design meetings have focused on reviewing options for each project to determine the best solutions for the district. For the New Elementary, design concepts have concentrated on identifying the optimal location and orientation for the new building on the site.

NEXT STEPS

- Final survey documentation is expected within the next week, which will allow our engineers to begin site design for all three projects.
- Geotechnical and soil boring crews will be on-site in February to test soil conditions at each location, providing essential data that will inform the project engineers' design of the building's structure.
- District representatives will be touring recently completed elementary school projects, including schools in Sparta and the Madison area.
- Staff meetings will be scheduled with specific groups to gather input on the design of their individual spaces.
- A preliminary meeting with the City of La Crosse is planned to discuss the projects and the necessary approval processes.
- A traffic impact analysis will be conducted at the New Elementary site to assess how the new building will affect the surrounding streets.
- Determine timing of next community meeting.
