Mission

Each child is an individual who should be challenged to reach his or her full potential. We promote high expectations, respect for self and the diversity of others. Provide a school climate which will stimulate students' emotional, ethical, physical, academic, cultural and social development. Education is a process which requires a partnership between the home, school and community.

Vision

Strive to create a joyful environment where students are encouraged to think critically and persevere through difficult challenges. Students will be leaders of their own learning who show empathy, compassion and kindness regardless of their differences. Develop collaborative, creative, global thinkers who work to cultivate a world of social change.

In partnership with EL Education, we approach teaching and learning differently. Learning is challenging, active, meaningful, collaborative, and public in our classrooms. Academic success is built on strong character qualities of collaboration and compassion, and character is shaped through high quality work.

What We Offer

- Opportunities for self-discovery through learning expeditions and meaningful tasks
- Fostering of curiosity by encouraging wonderful ideas
- Individual and group development as students work together and compete against themselves to improve their personal best
- Service opportunities where we prepare students with the attitudes and skills to be of service
- Support for students as they increasingly gain the capacity to direct their own learning

Points of Pride

- Met Growth every year growth was measured since 2019
- Experienced, effective teachers who are dedicated to our school community
- Active community involvement
- Whole school partnership with EL Education, a leading K-12 nonprofit committed to ensuring students achieve more than they think possible
- Students, staff, families and the community are committed to our school's success

Students in the Program

- Engage in learning expeditions that make learning come alive and offer real-world connections
- Participate in meaningful fieldwork, expert collaborations and service learning
- Work together as a team to reach success and support everyone's learning and growth
- Create complex work that demonstrates high-order thinking and transfer of understanding
